Education As The Cultivation Of Intelligence:

Education As the Cultivation of Intelligence Michael E. Martinez, 2014-04-08 The book argues that the intellectual abilities that are crucial to modern life correspond to the cognitive functions that are reasonably called intelligence These intellectual abilities are learnable and we have the knowledge to teach them directly **Education As the Cultivation of Intelligence** Michael E. Martinez, 2014-04-08 Martinez defines intelligence from a cognitive perspective as a repertoire of those skills strategies and knowledge structures that are most instrumental in human effectiveness He posits that in today s complex fast paced technologically dense and information rich society intelligence is the supreme human resource The current social context not only demands intelligence but rewards it economically psychically and in other ways His central argument in this book is this The intellectual abilities that are crucial to modern life including economic viability and effectiveness in daily living correspond to the cognitive functions that are reasonably called intelligence these intellectual abilities are learnable we now know enough about the structure and mechanisms of intelligent thought and behavior to teach them directly Martinez explicates his argument and provides research based evidence to support his claim **Intelligence, and Thought** Robin Barrow, 2015-06-03 In this text first published in 1993 Barrow decisively rejects the traditional assumption that intelligence has no educational significance and contends instead that intelligence is developed by the enlargement of understanding Arguing that much educational research is driven by a concept of intelligence that has no obvious educational relevance Dr Barrow suggests that this is partly due to a widespread lack of understanding about the nature and point of philosophical analysis and partly due to a failure to face up to the value judgements that are necessarily involved in analysing a concept such as intelligence If intelligence is to be of educational significance it must be understood in terms that allow it to be educable Written by a philosopher of education this study offers a reasoned and extended argument in favour of an original view of philosophical analysis It focuses on the issue of intelligence from a philosophical perspective It should be of interest to students of education philosophy and the philosophy of education alike Computation and Applications Kangshun Li, Yong Liu, 2024-06-30 This two volume set CCIS 2146 and CCIS 2147 constitutes the refereed proceedings of the 14th International Symposium on Intelligence Computation and Applications ISICA 2023 held in Guangzhou China during November 18 19 2023 The 82 full papers included in these proceedings were carefully reviewed and selected from 178 submissions The papers presented in these two volumes are organized in the following topical sections Part I Frontiers of evolutionary Intelligent Optimization Algorithms Exploration of computer vision Machine learning and its applications Part II Machine Learning and its applications Big data analysis and Information security Intelligent application of computer Artificial Intelligence, Medical Engineering and Education Qingying Zhang, Matthew He, Felix Yanovsky, 2024-02-15 Artificial Intelligence AI is a rapidly developing field of computer science which now plays an increasingly important role in many disciplines A catalyst for significant change research into AI is of particular importance
