The Evolution of Society Erik W. Aslaksen, 2023-02-17 This book covers the work of Erik W Aslaksen who continues to develop the view of society and its evolution published in earlier work *The Social Bond* Springer 2018 *The Stability of Society* Springer 2020 and *Measures of Social Evolution* Springer 2021 bringing together core material of that work with the results of recent investigations in order to present the evolution of society as an integrated and continuous story leading right up to the present time A story of human action driven by our beliefs desires and an ideology arising out of our ability to transform and exploit our environment through the development and application of technology The distinguishing feature of the work is the treatment of society as an information processing system and applying the system methodology for handling complexity as it is applied e g in engineering This focus on information is particularly pertinent in the current circumstances where the world has arrived at a critical point in its history through the conjunction of a number of issues that appear to be spiralling out of control Global warming and the associated climate change the destruction of our environment through such processes

as land clearing and industrialisation with associated loss of biodiversity the rapidly increasing visibility of the inequality in the quality of life with associated tensions and above all the determination of the US led Western alliance to cling to its hegemonial role apparently at all cost With the sophistication and proliferation of nuclear weapons the latter has the potential to bring on the end of civilisation as we know it The resolution of any of these issues depends on the information available to all parties involved and hence the availability and quality of information is seen as the crucial and overarching issue of the present time A number of aspects of this issue including the role of education economic inequality and the control of the media are treated in some detail and proposals for some small steps in the right direction are put forward

Exploring Unequal Achievement in the Schools George Ansalone,2009-03-16 One of the most disturbing problems in American education today is the unequal achievement of children in schools Few problems have sparked greater concern than the issue of why students from different social origins differ so significantly in their academic performance This book explores the role played by families and schools in this troubling problem It employs a social constructionist approach in considering how ascribed characteristics race gender and class intersect with the daily interactions of teachers and students in classrooms and with the educational practices and structures within schools tracking testing and teacher expectations to play an exacting role in the construction of success or failure It suggests that the new student identity that begins to emerge

as a result of these processes provides a self fulfilling prophesy of expectation and belief which defines how students see themselves as learners and achievers Through these practices schooling becomes a crucial factor in the social construction of academic success The author s final conclusion is inescapable unequal achievement in school is largely a social construction But it is a social construction facilitated both by student attributes including gender race and class and by the educational structures and policies some schools employ Because of this undeniable fact parents educational practitioners and policy makers must continue to investigate social policies and practices relative to student abilities and make every effort to understand how they may be related to achievement Informed by research they must endeavor to see this power inherent in schooling and the need to effect change
