Kenosis of God David T. Williams, 2009-04-10 My first impression of the title *Kenosis of God* was that this was going to be an academic book replete with boring complex and difficult exegetical and theological arguments On the contrary I found out after reading that it was very engaging exciting and very refreshing book on Christian Theology The major strengths of this book are that it is 1 thoroughly biblical 2 historically and theologically consistent with evangelically Christianity 3 philosophically logical and coherent and above all 4 relevant to the Christian life I enthusiastically commend this book not only to Bible students and academic theologians but to Christians who desire not only to know the truth of Christian Theology but its implications on the Christian life Professor Samuel Waje Kunhiyop PhD Head of Postgraduate School South African Theological Seminary The book argues that the kenosis of Jesus is not an isolated act in the history of incarnation but is embedded in the very nature of his divinity The entire Trinity operates in kenosis a deliberate choice to self limitation in order to relate with one another and with the powerless The book shows that each person of the Trinity Father Son and the Holy Spirit participates and works in a kenotic way in their relation to the humanity The creator who accepts to give dominion to the people He created Jesus who limits himself by becoming a human being and the Spirit who dwells in and works through the Church accepting the risk of being grieved by the human fallen nature Dr Lubunga wEhusha of the Evangelical Seminary of Southern Africa

Environmental Solidarity Pablo Martínez de Anguita, 2012-05-23 The past few decades have seen the beginnings of a convergence between religions and ecological movements The environmental crisis has called the religions of the world to respond by finding their voice within the larger Earth community At the same time a certain religiosity has started to emerge in some areas of secular ecological thinking Beyond mere religious utilitarianism rooted in an understanding of the deepest connections between human beings their worldviews and nature itself this book tries to show how religious believers can look at the world through the eyes of faith and find a broader paradigm to sustain sustainability proposing a model for transposing this paradigm into practice so as to develop long term sustainable solutions that can be tested against reality

A recent poll revealed that one in four Americans believe in both creationism and evolution while another 41% believe that creationism is true and evolution is false A minority only 13% believe only in evolution Given the widespread resistance to the idea that humans and other animals have evolved and given the attention to the ongoing debate of what should be taught in public schools issues related to the teaching and learning of evolution are quite timely Evolution Challenges Integrating Research and Practice in Teaching and Learning about Evolution goes beyond the science versus religion dispute to ask why evolution is so often rejected as a legitimate scientific fact focusing on a wide range of cognitive socio cultural and motivational factors that make concepts such as evolution difficult to grasp The volume brings together researchers with diverse backgrounds in cognitive development and education to examine children s and adults thinking learning and motivation and how aspects of representational and symbolic knowledge influence learning about evolution The book is organized around three main challenges inherent in teaching and learning evolutionary concepts folk theories and conceptual biases motivational and epistemological biases and educational aspects in both formal and informal settings Commentaries across the three main themes tie the book together thematically and contributors provide ideas for future research and methods for improving the manner in which evolutionary concepts are conveyed in the classroom and in

Macroevolution, Contingency, and Divine Activity Bradford McCall, 2023-10-27 What are the things that God values in the creative process How does one define God's activity in such a world How is God's involvement different from a contingent what this author labels contingentist instance Why do we need a God idea at all Herein Bradford McCall addresses how divine amorepotent love works with and within a contingentist i.e. radically contingent evolutionary theory and worldview Within the course of this project he reaches a via media between the somewhat radical formalist position of Simon Conway Morris and the veritably radical contingent position of Stephen Jay Gould But how is the contingentist amorepotent and uncontrolling love of God understood as purposeful McCall argues in detail that there in fact is some sort of purposiveness that is nevertheless working in a chastened Gouldian position and he distinguishes between contingency and veritable divine involvement He contends that God does not insist upon a particular outcome but merely allows propensities to work themselves out God amorepotently loves the population of the natural world into greater forms of complexity relationality and beauty in varied and multifarious forms along with the extension of diversity
