The Influence of Air Power Upon History Walter J. Boyne,2003-05-31 A comprehensive balanced overview of war in the air from a world renowned authority on aviation history and New York Times bestselling author Booklist The Influence of Air Power Upon History makes a startlingly new analysis of the far reaching implications flight has had on warfare politics diplomacy technology and mass culture Author Walter Boyne examines the application of air power from the very earliest days of the balloon down to the current era of space warfare and postulates some new and controversial theories that are certain to arouse comment Where Alfred Thayer Mahan s classic work The Influence of Sea Power Upon History catalogues the elements that made naval prowess a determinant of a nation s strength The Influence of Air Power Upon History traces the development of air power philosophy by examining the theory and practice of air power as it is exercised in both war and peace The author unerringly depicts the contributions made by the people and planes of each era some of them famous some virtually unknown but all vitally important He highlights the critical competence of individuals at every step of the way comparing the works of Guilio Douhet William Mitchell John Warden and others philosophically even as he compares the combat capabilities of leaders such as Hugh Trenchard Bomber Harris Herman Goering Curtis LeMay and Henry Hap Arnold Boyne s views on World War II bombings and air power in the Vietnam War will please many readers and perhaps shock many others The Influence of Air Power Upon History is an important book for the public and for the military and is destined to be hotly debated for years to come

Parameters ,1997 **The Limits of Air Power** Mark Clodfelter,2006-01-01 Tracing the use of air power in World War II and the Korean War Mark Clodfelter explains how U S Air Force doctrine

evolved through the American experience in these conventional wars only to be thwarted in the context of a limited guerrilla struggle in Vietnam. Although a faith in bombing's sheer destructive power led air commanders to believe that extensive air assaults could win the war at any time, the Vietnam experience instead showed how even intense aerial attacks may not achieve military or political objectives in a limited war. Based on findings from previously classified documents in presidential libraries and air force archives as well as on interviews with civilian and military decision makers, *The Limits of Air Power* argues that reliance on air campaigns as a primary instrument of warfare could not have produced lasting victory in Vietnam. This Bison Books edition includes a new chapter that provides a framework for evaluating air power effectiveness in future conflicts.

Striving for Air Superiority Craig C. Hannah, 2002. Annotation: Tactical bombing. Gen. Jimmy Doolittle reportedly observed: "Is breaking the milk bottle. Strategic bombing is killing the cow." Most nations have historically chosen between building tactical and strategic air forces; rarely has a state given equal weight to both. The advantages of tactical air power are obvious today as small wars and petty tyrants bedevil us, but in a Cold War world split between continental superpowers, strategic bombing took precedence with calamitous consequences. In the 1960s, the U.S. Air Force lacked the equipment and properly trained pilots to assure air superiority because the Tactical Air Command (TAC) had become little more than a handmaiden to the Strategic Air Command (SAC). TAC focused primarily on the interdiction of enemy bombers and virtually ignored its other responsibilities. Its aircraft were designed to shoot at large lumbering bombers and not to engage in dog fights with highly maneuverable MiGs. Hannah shows how a tactical air force that won a victory in World War II deteriorated into a second-rate force flying aging aircraft during the early years of the Cold War, recovered briefly over Korea, then slid into obsolescence during the 1950s. His explanation of why America's fighter aircraft did not work in Vietnam is instructive and unsettling. Hannah explains how TAC struggled through the war in Vietnam to emerge in the 1970s as the best tactical air force in the world. He sidesteps politics and inter-service rivalries to focus on the nuts and bolts of tactical air power. The result is a factual, informative account of how an air force first loses its way, then finds its mission again.

Sub-Saharan Africa & U.S. National Interests Anthony D. Marley, 1998-06. Four articles include U.S. national interests in Sub-Saharan Africa, a military model for conflict resolution in Sub-Saharan Africa, phantom warriors' disease as a threat to U.S. national security, and military downsizing in the developing world: process, problems, and possibilities. Also includes a 24-page report: U.S. Security Strategy for Sub-Saharan Africa, 1995.

Into the Blue: American Writing on Aviation and Spaceflight Joseph J. Corn, 2011-10-13. *Into the Blue* revisits the remarkable trajectory of Americans in air and space, gathering sixty of the best eyewitness and participant narratives from Benjamin Franklin's letters on the first hot air balloons to Chris Jones's account of being marooned on the International Space Station. Here are those who made flight happen: Orville and Wilbur Wright, self-taught pioneers whose homespun invention stunned the world; World War I ace Eddie Rickenbacker, whose memoirs excerpted here for the first time in unedited form describe the frightening novelties of aerial combat and daredevils like
