A Quarter Century of Community Psychology Tracey A. Revenson, Anthony R. D'Augelli, Sabine E. French, Diane Hughes, David E. Livert, Edward Seidman, Marybeth Shinn, Hirokazu Yoshikawa, 2011-06-27 This work contains original research from the first

25 years of the American Journal of Community Psychology selected to reflect community psychology's rich tradition of theory, empirical research, action, and innovative methods. This volume will be of interest to community mental health workers, social science and social work researchers, health care professionals, policymakers, and educators in the fields of community and preventative psychology. *International Community Psychology* Stephanie Reich, Manuel Riemer, Isaac Prilleltensky, Maritza Montero, 2007-07-03

Community psychology (CP) has a rich history and presence internationally that many people may not be aware of. Today's increasingly global environment encourages reviewing the world-wide goals and practices of CP. The desire to promote collective well-being clearly transcends geographical boundaries. The goal of developing a global perspective and discourse between countries has been delayed by the lack of a single accessible source for information. This book provides the first in-depth guide to global community psychology research and practice history and development theories and innovations presented in one field-defining volume. Included are contributions from countries with long histories of oppression, social movements, and political turmoil; long-time democracies and former dictatorships. Fully formed CP establishments compare with fledgling ventures into the field. The contributors document the complex relationships between CP and ideological currents, other strands of psychology, and social science, cultural and historical traditions, and economic developments. The goals of this book are several: Promote international collaboration, enhance theory utilization and development, identify biases and barriers in the field, accrue critical mass for a discipline that is often marginalized, minimize the pervasive US-centric view of the field. Practitioners and researchers will find in *International Community Psychology* new perspectives on the communities they serve. As a text for advanced and graduate-level courses, it depicts a robust field with a legitimate mission. When concepts of community and sometimes even of psychology may not always translate from one nation to the next, this book provides a world of needed context.

Ethical Transformations for a Sustainable Future Deva Temple, 2017-09-29

It has become increasingly apparent that humanity's complex social, political, and economic systems are incompatible with the finite capacity of the Earth to replenish resources and absorb wastes. If the planet is to continue to be habitable for the myriad web of other creatures that make life possible, humans must transform their systems so that they are aligned with natural systems. One thing is sure: it will not be Nature's laws, the delicate interdependence that characterizes Earth's ecosystems that change. The change must begin within each person and from there permeate throughout our social, political, and economic structures. The contributors to this volume believe that such transformations are urgently needed and possible, and they offer specific examples. They suggest solutions that call for new perspectives in our ethics, beliefs, traditions, economy, business, gender relations, education, and technology. They show that human beings have the power to implement changes in all natural and social environments. The chapters in this book have been organized around three keywords: Reconnecting, Reframing, and Rethinking. The contributors argue that we need to reconnect with the Earth and nature as well as with each other and parts of ourselves that we have ignored for too long. We

need to reframe the way in which people prioritize choices in the economy the way we do business and pursue development and we need to rethink the mission of education and the roles of technology Diversity and Developmental Science Dawn P. Witherspoon, Gabriela Livas Stein, 2023-01-30 This book examines the challenges faced by developmental scientists as the population under the age of 18 in the United States has become a majority minority with no racial ethnic group having a numeric majority The volume tackles how these demographic shifts compel scientists to consider the unique and universal processes that promote the growth thriving and resilience of these populations across this new landscape and also takes into account systems of oppression power privilege racial justice and structural disadvantage It describes the challenges of conducting research with diverse populations and offers practical methodological solutions The book provides an overview of the current demographic shifts and their implications for developmental researchers It examines key diversity science constructs that need to be considered for all developmental research within this new global context in which societies are becoming more diverse In particular chapters address how to measure and conceptualize these constructs using within group designs as well as research that includes youth from multiple backgrounds In addition the volume focuses on the contexts that shape the developmental trajectories of youth and how best to capture these contexts with an eye toward diversity science Key areas of coverage include Identifying best practices in the conceptualization and measurement of race and ethnicity in developmental science at the individual and contextual levels Stimulating a dialogue that translates to an actionable agenda designed to tackle issues of conceptualization and measurement of key constructs associated with race ethnicity Leading edge strategies for building interdisciplinary teams to conduct ethical and responsible work with diverse populations that include scholars of color Finally the book addresses translational work including how the incorporation of diversity science can influence policy and help build collaborative research teams that are well poised to conduct ethical research in these diverse populations The volume provides recommendations for researchers to incorporate diversity science into their work This book is a must have resource for researchers professors clinicians therapists and other professionals as well as graduate students in developmental clinical child and school psychology public health ethnic studies counseling anthropology African American Black Studies Latinx Latino Chicano Studies and Asian American Studies **Ethical**
