**Bottoming Out the Universe** Richard Grossinger,2020-04-07 An exploration into consciousness the universe and the nature of reality Draws on transdimensional physics and biology reincarnation and past life memories animal consciousness multiple identities thoughtforms soul pictures and paranormal phenomena like crop circles and poltergeists Explores the riddle of personal identity and how it differs from consciousness Reveals that consciousness is more than encompassing all that exists it also speaks to what has yet to manifest Scientific orthodoxy views the universe as conceived of matter protons

neutrons electrons down to the smallest particle quarks But when you keep digging what is beneath quarks The scientific worldview does not take into account consciousness or life itself How did consciousness become part of the material universe Is it a by product of brain chemistry or a constituent of reality Or to dig deeper which is more fundamental the existence of an objective physical universe or our subjective experience of it In this investigation into consciousness the universe and the nature of reality Richard Grossinger offers a wide ranging foundation for reimagining the universe as based in consciousness rather than matter He presents in depth analysis of the standard scientific description of the universe revealing the holes in its theories Exploring the interpenetration of matter and all reality by consciousness the author looks at reincarnation and past life memories examining famous and lesser known but verifiable accounts He then explores the nature and origin of consciousness with accompanying explorations of animal consciousness the brain as a computer multiple identities thoughtforms soul pictures and paranormal phenomena like UFOs faeries and poltergeists He also examines concepts from physics that combine elements of both consciousness and matter such as collapsing waveforms and the uncertainty principle of quantum mechanics Examining nonlocal and transpersonal modes of consciousness Grossinger looks at the difference between consciousness and personal identity He expands this discussion with reflections on Sethian cosmology using Seth's own words and Jane Roberts s and John Friedlander s interpretations He reveals that consciousness also encompasses what has yet to manifest and explains why the universe exists at all why there is something rather than nothing Skewering the materialist paradigm and placing consciousness alongside mass gravity and heat as an essential component of the universe Grossinger proposes that reality is a thoughtform where sentient beings collaborate to bring about a concrete realm vibrating at their own frequency 2013 Richard Grossinger, 2011-05-31 For the Earth to move to the next vibration says Richard Grossinger consciousness must change in profound ways and these involve core elements of humanity evil grief bliss and compassion 2013 locates these elements in often unlikely places and seeks their nature and capacity for change With playfulness and precision 2013 tackles the questions of creation and existence in their twenty first century incarnation In these intellectual field notes the author's absorbing style combines memoir with scientific deconstruction metaphysical ontology and experimental prose that recalls the Black Mountain school to draw transcendental insight from the ephemeral space time we call daily life Moving with equal ease between matters cosmic and earthly Grossinger details existence as an exhilarating adventure always pushing us toward a higher state in this wide ranging humorous and heartfelt book Including an informal course in psychic development 2013 sheds light on the ephemera of planets and iPods politics and Zen Buddy Holly and road trips in its study of the elements of psychic development that could transform humankind and the Earth
