*El-Hi Textbooks & Serials in Print, 2000 ,2000*      Embryology of Flowering Plants: Terminology and Concepts, Vol. 3 T B Batygina,2019-04-23 Plant embryology dealing with the regularities of initiation and the first stages of development of an organism is now flourishing because of the overall progress being made in natural sciences Such discoveries of the 20th century as production of plants from a single somatic cell experimental haploidy and parasexual hybridization were of general biological significance The combined efforts of embryologists geneticists and molecular biologists yielded the discovery of specific genes that control meiosis egg cell development and early stages of embryogenesis The tendency to synthesize data of embryology and genetics has become increasingly noticeable It is connected with the fact that the majority of problems connected with morphogenesis such as differentiation specialization the evaluation of features and the definition of the notions gene and feature and genotype and phenotype concern embryology and genetics embryogenetics in one way or another Evolutionary embryology has given rise to a new approach to the study of problems of adaptation in plants In connection with the problem of preserving biological diversity under conditions of ecological stress special attention is paid to ecological embryology revealing the critical periods in early ontogenesis and plasticity and tolerance of reproductive systems at the level of species and population The study of variability of morphogenesis and phenotype in population life cycle variations and the diversity of reproductive systems is the most important point in the population embryology of plants

*El-Hi Textbooks in Print ,1980*      Wetlands Ecology Susanta Kumar Chakraborty,Poulomi Sanyal,Ratnadeep Ray,2023-03-11 This book discusses current knowledge and challenges with the ecological management and conservation of wetlands with a focus on the East Kolkata Wetlands of India This area is referred to as a Ramsar Site a designation given to areas with special protection statuses since it is the largest natural waste recycling system in the world The site faces many threats to its biodiversity and ecosystem functioning due to anthropogenic activity in the region and therefore an assessment of the ecosystem services bio ecological uniqueness and issues stemming from climate change and human impacts is needed to develop protection strategies for the future ecological functioning and sustainability of the wetlands The authors use GIS and remote sensing techniques to assess and monitor harmful industrial and environmental impacts on the wetlands and to inform mitigation and conservation strategies in the face of ongoing threats such as pollution habitat destruction and bioinvasion The book also highlights various social and economic aspects tied to the functioning and management of the wetlands along with ecological biological and physio chemical considerations The study will be of use to students and researchers in aquatic ecology biodiversity and environmental sustainability and conservation as well as to environmental planners engineers and policymakers      **Ecological Restoration in International Environmental Law** Anastasia Telesetsky,An Cliquet,Afshin Akhtar-Khavari,2016-12-01 Human activities are depleting ecosystems at an unprecedented rate In spite of nature conservation efforts worldwide many ecosystems including those critical for human well being have been

damaged or destroyed States and citizens need a new vision of how humans can reconnect with the natural environment With its focus on the long term holistic recovery of ecosystems ecological restoration has received increasing attention in the past decade from both scientists and policymakers Research on the implications of ecological restoration for the law and law for ecological restoration has been largely overlooked This is the first published book to examine comprehensively the relationship between international environmental law and ecological restoration While international environmental law IEL has developed significantly as a discipline over the past four decades this book enquires whether IEL can now assist states in making a strategic transition from not just protecting and maintaining the natural environment but also actively restoring it Arguing that states have international duties to restore this book offers reflections on the philosophical context of ecological restoration and the legal content of a duty to restore from an international law European Union law and national law perspective The book concludes with a discussion of several contemporary themes of interest to both lawyers and ecologists including the role of private actors protected areas and climate change in ecological restoration

**Restoration Ecology** Jelte van Andel,James Aronson,2012-04-12 Enlarged enhanced and internationalized edition of the first restoration ecology textbook to be published with foreword by Dr Steven Whisnant of Texas A M University and Chair of the Society of Ecological Restoration Since 2006 when the first edition of this book appeared major advances have taken place in restoration science and in the practice of ecological restoration Both are now accepted as key components of the increasingly urgent search for sustainability at global national and community levels hence the phrase New Frontier in the title While the first edition focused on ecosystems and landscapes in Europe this new edition covers biomes and contexts all over the world Several new chapters deal with broad issues such as biological invasions climate change and agricultural land abandonment as they relate to restoration science and ecological restoration Case studies are included from Australia North America and the tropics This is an accessible textbook for senior undergraduate and graduate level students and early career scientists The book also provides a solid scientific background for managers volunteers and mid career professionals involved in the practice of ecological restoration Review of the first edition I suspect that this volume will find its way onto the shelves of many restoration researchers and practitioners and will be used as a key text in graduate courses where it will help fill a large void My own copy is already heavily bookmarked and will be a constant source of research ideas and lecture material Environmental Conservation Companion Website A companion website with downloadable figures is available at [www.wiley.com/go/vanandel/restorationecology](http://www.wiley.com/go/vanandel/restorationecology)

**The Software Encyclopedia 2000** Bowker Editorial Staff,2000-05

Sustainable Increase of Marine Harvesting: Fundamental Mechanisms and New Concepts Olav Vadstein,Yngvar Olsen,2013-06-29 How can we increase the production and harvest of living marine resources in the new millennium Bridging potentials and environmental constraints This was the theme of the 1st Maricult Conference

arranged in Trondheim Norway in June 2000 in connection with termination of the Norwegian research programme Maricult 1996 2000 [www.maricult.org](http://www.maricult.org) The intention for the conference was not only to present a state of the art overview of the research conducted as part of the programme but also to describe other experiences and to discuss the ideas and the scientific status of the programme with the international scientific community A total of 50 oral communications and 8 posters were presented at the conference Sixteen of them are included in the present volume They deal with such topics as strategies for improving marine harvest underlying mechanisms for marine productivity new concepts of mariculture with emphasize on mussels and nutrient supply and environmental impact

**Metal Ecotoxicology Concepts and Applications** Michael C. Newman, Alan W. McIntosh, 2020-11-25 This book provides an in depth discussion of various aspects of metal ecotoxicology State of the art information and techniques in areas ranging from metal behavior in surface waters to bioaccumulation kinetics and toxicokinetics to community effects are presented in a hierarchical arrangement Specific topics discussed include metals in abiotic components of ecosystems autecology effects of metals relative to the individual or a single species and metals in marine and freshwater systems in the context of synecology species associated and interacting as a unit This is an important book that will be useful to researchers risk assessment consultants regulatory personnel and teachers and students

*Networks of Invasion: A Synthesis of Concepts*, 2017-01-19

Networks of Invasion bridges a conceptual gap between ecological network studies and invasion biology studies This book contains chapters detailing pressing concerns regarding invasive species in food webs but also extends the idea of networks of invasion to other systems such as mutualistic networks or even the human microbiome Chapters describe the tools models and empirical methods adapted for tackling invasions in ecological networks Contains chapters detailing pressing concerns regarding invasive species in food webs Deals with topical and important reviews on the physiology populations and communities of plants and animals

**Aquatic Parasitology: Ecological and Environmental Concepts and Implications of Marine and Freshwater Parasites** Nico J. Smit, Bernd Sures, 2025-06-16 This open access volume is the first to provide a comprehensive overview of the ecological and environmental characteristics of marine and freshwater parasites In three clearly organized sections world leading authors present the current state of our knowledge as well as the future trends for their respective fields in aquatic parasitology First the basic life cycle strategies of the various major groups of aquatic parasites are presented including protists myxozoa aquatic fungi helminths and arthropods Subsequent chapters explore the ecological implications of aquatic parasites covering topics such as biodiversity evolution community structures behavior and conservation to name a few In addition important developments in research are presented such as the use of different molecular tools and eDNA in aquatic parasitology The final section is devoted to the new field of environmental parasitology where readers will find contributions on biological markers invasive species and bioindicators of environmental pollution among others Due attention is also given to zoonoses aquaculture and the effects of climate change on aquatic

parasites All chapters include original high quality illustrations and never before seen photographs which complement the diverse aspects of aquatic parasitology described Thus this book is a must for every parasitologist and ecologist **Wildlife Review** ,1963 **Building Evaluation** Wolfgang F.E. Preiser,2013-12-14 This book is about building evaluation in the broadest sense and it transcends the meaning and conventional boundaries of the evolving field of post occupancy evaluation by focusing on evaluation throughout the building delivery process This process is seen not just as being linear with a product in mind i e the completed and occupied building but rather it is seen as a cyclic evolution which has as its goal the continuous improvement of the quality of buildings This goal can only be accomplished if evaluation occurs throughout the building delivery process and if 1 the evaluation that does occur is systematic and rigorous 2 the data that is obtained can be fed into data bases and clearinghouses for use in future generations of buildings and 3 there is continuity in information flow The idea for this book originated with a symposium that was part of a conference held at the Technical University in Delft Netherlands in July of 1988 i e LAPS 10 the tenth biannual conference of the International Association for the Study of People and their Physical Surroundings Authors presented papers based on their book chapters and discussions ensued about the expanded boundaries of the field about theoretical methodological and practical issues as well as applications in building evaluation Other relevant topics were identified and several additional authors were invited to participate in order to round out the contents of this book **Park Science** ,1993 **River Futures** Gary J. Brierley,Kirstie A. Fryirs,2012-09-26 Across much of the industrialized world rivers that were physically transformed and ecologically ruined to facilitate industrial and agricultural development are now the focus of restoration and rehabilitation efforts River Futures discusses the emergence of this new era of river repair and documents a comprehensive biophysical framework for river science and management The book considers what can be done to maximize prospects for improving river health while maintaining or enhancing the provision of ecosystem services over the next fifty to one hundred years It provides a holistic overview of considerations that underpin the use of science in river management emphasizing cross disciplinary understanding that builds on a landscape template The book frames the development of integrative river science and its application to river rehabilitation programs develops a coherent set of guiding principles with which to approach integrative river science considers the application of cross disciplinary thinking in river rehabilitation experiences from around the world examines the crossover between science and management outlining issues that must be addressed to promote healthier river futures Case studies explore practical applications in different parts of the world highlighting approaches to the use of integrative river science measures of success and steps that could be taken to improve performance in future efforts River Futures offers a positive practical and constructive focus that directly addresses the major challenge of a new era of river conservation and rehabilitation that of bringing together the diverse and typically discipline bound sets of knowledge and practices that are involved in repairing rivers It is a valuable resource for anyone involved in river restoration and management including restorationists scientists

managers and policymakers as well as undergraduate and graduate students      **Ecology of Marine Fish** Henrique Cabral, Mario LePage, Jeremy Lobry, Olivier Le Pape, 2024-11-28 Ecology of Marine Fish offers updated reviews of the current knowledge on the ecology of marine fish This book is an all inclusive reference on the diversity of marine fish their behaviors their role in marine food webs as well as the human and environmental impacts on marine fish such as pollutants and climate change It takes a historical approach to discussing spatial and temporal patterns of fish populations and introduces the changing patterns of the present Each chapter provides an in depth review of the science behind marine fish populations and the methodological tools to study them This book is an excellent resource for anyone in the fisheries sector including scientists and researchers fisheries managers marine resource managers marine biologists fish farmers marine ecologists policy makers leaders and regulators operations researchers as well as students and faculty studying marine fish ecology Provides the latest scientific research and developments in the field Presents a wide scope of different methodological approaches useful for field studies Includes information on the role of marine fish in food webs and the impacts of climate change      **Wildlife Abstracts** U.S. Fish and Wildlife Service, 1954      **Ecology of Marine Bivalves** Richard F. Dame, 2016-04-19 Exploring the potential use of bivalves as indicators and monitors of ecosystem health this book describes live and computer simulated experiments mesocosm studies and field manipulation experiments This second edition discusses major new developments including phase shifts in many coastal and estuarine ecosystems dominated by suspension feeding bivalves the invasion or introduction of alien bivalve species the rapid growth of environmental restoration focused on bivalves and the examination of geological history with regard to global climate change and its impact on bivalve dominated systems
