studies with clarity and precision but it is Goubert's own judgements direct forceful and iconoclastic which make this an invaluable text

The Development of the Economies of Continental Europe 1850-1914 (Routledge Revivals) Alan Milward, S. Saul, 2012-08-06 This work first published in 1977 is a reissue of a trailblazing work the first textbook of economic history to deal comprehensively with the economic development of the whole continent in this period and to do so from a continental rather than a British perspective But it is more than merely a textbook it is an interpretative synthesis of the wide range of research on this subject in many countries As such it will be an indispensable guide for teachers and will extend and improve the scope of teaching by making available for the first time in English the results of continental research In addition it is a work of fundamental interest to economists in which theories and hypotheses of economic development are now examined in a much wider historical context In this way the book is an exploration of the objective validity of earlier theories and the starting point for further research into economic development and European history The work covers the continental development of the German and French economies after 1870 and then in that context analyses the development of the smaller western economies It then considers the relatively underdeveloped economies of eastern and southern Europe and includes the first attempt at a synthesis of economic development before 1914 in the Balkans It concludes with an analysis of the international economy and its relationship to the economic development of the continent
