**Economic Thought and Ideology in Seventeenth Century England** Joyce Oldham Appleby, 1980      **Capitalism and a New Social Order** Joyce Appleby, 1984-08 Examines the vision of Jeffersonian Republicans and their impact on early American politics In 1800 the Jeffersonian Republicans decisive victors over what they considered elitist Federalism seized the potential for change in the new American nation They infused in it their vision of a society of economically progressive politically equal and socially liberated individuals This book examines the fusion of ideas and circumstances which made possible this triumph of America s first popular political movement When the Federalists convened in New York to form the more perfect union promised by the new United States Constitution they expected to build a strong central government led by the revolutionary members of the old colonial elite This expectation was dashed by the emergence of a vigorous opposition led by Thomas Jefferson but manned by a new generation of popular politicians interlopers migr s polemicists what the Federalists called the mushroom candidates They turned the 1790s into an age of passion by raising basic questions about the characters of the American experiment in government When the Federalists defenders of traditional European notions of order and authority came under attack they sought to discredit the radical beliefs of the Jeffersonians Although the ideas that fueled the Jeffersonian opposition came from several strains of liberal and libertarian thought it was the specific prospect of an expanding commercial agriculture that gave substance to their conviction that Americans might divorce themselves from the precepts of the past Thus capitalism figured prominently in the Jeffersonian social vision Aroused by the Federalists efforts to bind the nation s wealthy citizens to a strengthened central government the Jeffersonians unified ordinary men in the southern and middle states mobilizing on the national level the power of the popular vote Their triumph in 1800 represented a new sectional alliance as well as a potent fusion of morality and materialism      A Companion to the History of Economic Thought Warren J. Samuels, Jeff E. Biddle, John B. **History of Economic Thought** Nathaniel Wolloch, 2016-10-04 From antiquity to our own time those interested in political economy have with almost no exceptions regarded the natural physical environment as a resource meant for human use Focusing on the period 1600 1850 and paying particular attention to major figures including Adam Smith T R Malthus David Ricardo and J S Mill this book provides a detailed overview of the intellectual history of the economic consideration of nature from antiquity to modern times It shows how even someone like Mill who was clearly influenced by romantic notions regarding the spiritual need for contact with pristine nature ultimately regarded it as an economic resource Building on existing scholarship this study demonstrates how the rise of modern sensitivity to nature from the late eighteenth century in particular was in fact a dialectical reaction to the growing distance of modern urban civilization from the natural environment As such the book offers an unprecedentedly detailed overview of the intellectual history of economic considerations of nature whilst underlining how the history of this topic has been remarkably consistent **British Society**

**1680-1880** Richard Price, 1999-10-28 Richard Price here offers a sweeping interpretation of modern British history He challenges the dominant assumption that the nineteenth century marked the beginning of modern Britain British Society argues on the contrary that nineteenth century British society was the extension of an earlier era whose main themes first appeared in the late seventeenth century and which continued to shape the social economic and political history of the country until the end of the nineteenth century This book casts light on the main themes of economic political and social history and offers alternative interpretations on questions and issues that are central to the history of modern Britain It follows in the great tradition of works such as Briggs s Age of Improvement and Perkin s Origins of Modern English Society and will be of enormous interest to all students and scholars of the period On the History of Economic Thought A. Ruymbeke,2025-10-02 A revealing account of the choices French immigrants faced as they settled in South Carolina Winner of the National Huguenot Society's 2007 Book of the Year award *From New Babylon to Eden* traces the persecution of Huguenots in France and the eventual immigration of a small bloc of the French Calvinist population to proprietary South Carolina Placing the Carolina migration in the context of the larger Huguenot diaspora Van Ruymbeke proffers an account that challenges accepted history Describing their settlement as a process of acculturation and creolization rather than simply assimilation he contends that most of these French Calvinists sought to create their own churches but were thwarted by an Anglicized elite eager to dominate Anglo Carolinian society He also reveals that most members of the initial generation were only moderately prosperous and that it was their descendants who acquired the wealth often associated with lowcountry Huguenots A new foreword by Owen Stanwood and preface from the author consider the continuing significance of the book nearly twenty years after its original publication *An Anxious Pursuit* Joyce E. Chaplin,2012-12-01

In *An Anxious Pursuit* Joyce Chaplin examines the impact of the Enlightenment ideas of progress on the lives and minds of American planters in the colonial Lower South She focuses particularly on the influence of Scottish notions of progress tracing the extent to which planters in South Carolina Georgia and British East Florida perceived themselves as a modern improving people She reads developments in agricultural practice as indices of planters' desire for progress and she demonstrates the central role played by slavery in their pursuit of modern life By linking behavior and ideas Chaplin has produced a work of cultural history that unites intellectual social and economic history Using public records as well as planters and farmers' private papers Chaplin examines innovations in rice indigo and cotton cultivation as a window through which to see planters' pursuit of a modern future She demonstrates that planters actively sought to improve their society and economy even as they suffered a pervasive anxiety about the corrupting impact of progress and commerce The basis for their accomplishments and the root of their anxieties according to Chaplin were the same race based chattel slavery Slaves provided the labor necessary to attain planters' vision of the modern but the institution ultimately limited the Lower South's ability to compete in the contemporary world Indeed whites continued to wonder whether their innovations some of them defied by slaves truly improved the region Chaplin argues that these apprehensions prefigured the antimodern stance of the antebellum period but she contends that they were as much a reflection of the doubt inherent in theories of progress as an outright rejection of those ideas **Trust and Distrust** Mark Knights,2021-12-02 *Trust and Distrust* offers the first overview of Britain's history of corruption in office in the pre modern era 1600 1850 and as such will appeal not only to historians but also to political and social scientists Mark Knights paints a picture of the interaction of the domestic and imperial stories of corruption in office showing how these stories were intertwined and related Linking corruption in office to the domestic and imperial state has not been attempted

before and Knights does this by drawing on extensive interdisciplinary sources relating to the East India Company as well as other colonial officials in the Atlantic World and elsewhere in Britain's emerging empire. Both corruption and office were concepts that were in evolution during the period 1600-1850 and underwent very significant but protracted change which this study charts and seeks to explain. The book makes innovative use of the concept of trust which helped to shape office in ways that underlined principles of selflessness, disinterestedness, integrity and accountability in officials.

Subversive Spiritualities Frédérique Apffel-Marglin, 2011. Even in the twenty-first century, some two-thirds of the world's peoples quietly live in non-modern, non-cosmopolitan places. In such places, the multitudinous voices of the spirits, deities, and other denizens of the other-than-human world continue to be heard, continue to be loved or feared or both, continue to accompany human beings in all their activities. In *Subversive Spiritualities*, Frédérique Apffel-Marglin draws on a lifetime of work with the indigenous peoples of Peru and India to support her argument that the beliefs, values, and practices of such traditional peoples are eco-metaphysically true. In other words, they recognize that human beings are in communion with other beings in nature that have agency and are kinds of spiritual intelligences with whom humans can be in relationship and communion. Ritual is the medium for communicating, reciprocating, creating, and working with the other-than-humans who daily remind the humans that the world is not for human exclusive use. Apffel-Marglin argues that when such relationships are appropriately robust, human lifeways are rich, rewarding, and in the contemporary jargon, environmentally sustainable. Her ultimate objective is to re-entangle humans in nature by promoting a spirituality and ecology of belonging and connection to nature and an appreciation of animistic perception and ecologies. Along the way, she offers provocative and poignant critiques of many assumptions of the development paradigm as benign, including feminist forms of development advocacy of most anthropological and other social scientific understandings of indigenous religions and of common views about peasant and indigenous agronomy. She concludes with a case study of the fair trade movement, illuminating both its shortcomings, how it echoes some of the assumptions in the development paradigms, and its promise as a way to rekindle community between humans as well as between humans and the other-than-human world.

**Conversing by Signs** Robert Blair St. George, 2000-11-09. The people of colonial New England lived in a densely metaphoric landscape, a world where familiars invaded bodies without warning, witches passed with ease through locked doors, and houses blew down in gusts of angry providential wind. Meaning, Robert St. George argues, was layered, often indirect, and inextricably intertwined with memory, apprehension, and imagination. By exploring the linkages between such cultural expressions as seventeenth-century farmsteads, witchcraft narratives, eighteenth-century crowd violence, and popular portraits of New England Federalists, St. George demonstrates that in early New England, things mattered as much as words in the shaping of metaphor. These forms of cultural representation, architecture, and gravestones, metaphysical poetry, and sermons, popular religion, and labor politics are connected through what St. George calls a poetics of implication. Words, objects, and actions are referentially interdependent.

demonstrate the continued resilience and power of seventeenth century popular culture throughout the eighteenth century Illuminating their interconnectedness St George calls into question the actual impact of the so called Enlightenment suggesting just how long a shadow the colonial climate of fear and inner instability cast over the warm glow of the early national period

*Spatial Representations and the Jacobean Stage* R. West, 2015-12-28 *Spatial Representations and the Jacobean Stage* offers a timely alternative to theatre criticism's neglect of the intensely spatial character of theatrical performance The book shows that early modern audiences were highly aware of the spatial aspects of the stage West examines the ways Jacobean dramatists used stage space to explore the spatial transformations of early modern society social mobility wandering populations rural enclosure sea travel localized empirical thought Dramas by Shakespeare Jonson Middleton and Webster are scrutinized for their treatment of these controversial themes

*Fellowship and Freedom* Thomas Leng, 2020-04-29 This is the first modern study of the Fellowship of Merchant Adventurers England's most important trading company of the sixteenth century in its final century of existence as a privileged organisation Over this period the Company's main trade the export of cloth to northwest Europe was overshadowed by rising traffic with the wider world whilst its privileges were continually criticised in an era of political revolution But the Company and its membership were not passive victims of these changes rather they were active participants in the commercial and political dramas of the century Using thousands of neglected private merchant papers *Fellowship and Freedom* views the Company from the perspective of its members in the process bringing to life the complex social worlds of early modern merchants For members freedom meant not just the right to access a privileged market but also to trade independently which could conflict with the fellowship of corporate affiliation and the responsibilities to the collective that it entailed The study's major theme is the challenge of maintaining corporate unity in the face of this and other pressures that the Company faced It restores the centrality of the Merchant Adventurers within three important historical narratives England's transition from the margins to the centre of the European and later global economy the rise and fall of the merchant corporation as a major form of commercial government in premodern Europe and the political history of the corporation in an era of state formation and revolution
