ABSTRACT

Since the collapse of Communism in Central and Eastern Europe and the Former Soviet Union, the reform process has been considerably influenced by the neoclassical economic approach to transition. This has heavily emphasized competitive markets and economic liberalization measures *per se*, often ignoring the establishment of adequate institutional frameworks and resulting in high transition costs and the sidelining of environmental concerns. Alternative models of market transformations in post-Communist societies have been forwarded in the literature, though these have been arguably less influential. We explore the role of these economic ideologies in shaping transition paths, with a focus on the Post-Keynesian economic approach as an alternative to the neoclassical paradigm. We further propose a holistic approach to transition to account for appropriate institutional developments in the area of environmental sustainability. We argue that transition economies need to reconsider their 'market transformation' process in order to capitalize on their potential and mark their own contribution to positive shifts in sustainable development paradigms. book explores the hypothesis of the emergence of a dependent capitalism in Central and Eastern Europe In a first theoretical part this book presents the main approaches that structure the field of comparative capitalism and then examines this model shaped by the inflow of foreign capital In an original way it proposes to integrate the form of the monetary regime into the dependent capitalism analysis and to extend it to Balkan countries The monetary regime is seen as complementary to the other elements of the institutional configuration of dependent capitalism In the second part the authors adopt a historical and empirical perspective First they demonstrate how dependent capitalism has emerged in Central and Eastern Europe and the Baltic States over the last 30 years as part of the process of socio economic transformation that began in 1990 The crisis of 2008 was an indicator of this dependence on Western capital Secondly they extend the analysis to the Balkan countries and show that dependence is even stronger for them particularly in the monetary area as evidenced by the implementation of currency boards or euroization phenomena This book is of interest to academics and students as well as to business and

Eastern Europe in Crisis and the Way Out Christopher Saunders,2016-07-27 In this volume practitioners and theorists from East and West assess the results of four years of transformation in Eastern Europe In a general assessment of the stabilisation policies pursued some authors take a critical view of the conventional monetary and fiscal restrictive programmes which have helped to bring down inflation and to introduce elements of the market economy but have also left the economies concerned with heavily reduced output and real incomes An evolutionary strategy of structural transformation and demand management should play a primary role in recovery from the transformational recession Further issues discussed are the reform of the financial sector liberalisation of foreign trade privatisation and restructuring and the social aspects of transformation Transition and Beyond S. Estrin,G. Kolodko,M. countries Using country specific cases such as Uzbekistan Burma and Haiti it focuses on those territories which have encountered problems reforming allowing the reader to gain an accurate understanding of the factors that inhibit the success of economic reform the different context in which economic reform is attempted and the different challenges that individual countries face An international team of contributors including Bo S dersten Deepak Lal and Ron Findlay have been brought together to analyze these topical issues making this an informative and thought provoking book of interest to those involved in the field of development studies The Bulgarian Economy Derek C Jones,Jeffrey Miller,2019-01-22 First published in 1997 this volume examines how Bulgaria has been an early starter but a slow and often erratic mover in the path of stabilization and systemic transition This book provides a most useful account of the development to date and of the costs associated with Bulgarian strategy or lack of empirical analysis and theoretical reflections especially in comparison with other transition economies It will be of great interest to any scholar official or businessman involved not only with Bulgaria but more generally with post communist countries
