Economic Trends In Chinese Agriculture:

Economic Trends in Chinese Agriculture Kenneth Richard Walker, 1993 1988 marked the end of an important chapter in China's agricultural development following a series of reforms in the previous decade. This is the single most comprehensive summary of these developments. This volume surveys different aspects of reform while assessing its historical significance. It examines planning trends in production, livestock, consumption, incomes, technology, and policy. **Productivity and Growth in Chinese Agriculture** Yanrui Wu, Kaliappa Kalirajan, 2016-07-27 China's agricultural growth in the past two decades has been called a miracle. An analysis of the sources of this miraculous growth is the focus of the present volume. In addition, this book also investigates the impact of economic reforms on agriculture, the potential of grain production in China, and regional disparities in agricultural production and growth performance. This book adds to the literature and contributes to the current debates on food security and rural development. **Policy Reform, Economic Growth and China's Agriculture** Christopher Charles Findlay, Will Martin, Andrew Watson, 1993 China's Agricultural Development Xiao-yuan Dong, 2017-03-02 This book identifies the main challenges Chinese agriculture is confronting and considers how these challenges might be met. The performance of China's agricultural production is comprehensively assessed while the factors that affect agricultural productivity are examined through detailed econometric analysis and up-to-date nationally representative data. China's Remarkable Economic Growth John Knight, Sai Ding, 2012-04-12 China's economy has been growing at ten per cent per annum for the last three decades. This book considers one of the biggest questions facing contemporary economists: why and how is the Chinese economy growing so fast? *China's Economic Growth Prospects* Cai Fang, 2016-01-29 China has grown rapidly since the reform initiation of the 1970s. *China's Economic Growth Prospects* narrates the contribution of demographic transition to recent economic growth in China and provides suggestions for ways in which it can sustain growth over the next few decades. The expert author provides reasons for the economic slowdown since the second decade of the twenty-first century, explores the challenges facing China's long-term sustainability of growth with the disappearance of the demographic dividend, and proposes policy suggestions. He concludes that in order to avoid the middle income trap, economic growth in China must transform from an inputs-driven pattern to a productivity-driven pattern. Academics, researchers, and students of economics and business, particularly those specialising in China, will find this book to be a useful resource. Investment bankers, journalists, politicians, and policy makers will find the discussions of past experience and the future potential of the Chinese economy to be of interest. *China's Economic Growth* Yanrui Wu, 2004-03 The current growth of the Chinese economy is of immense importance for the global economy. This book outlines the main characteristics of Chinese economic growth over the last two decades and investigates in detail the key determinants of growth, especially capital formation and productivity issues. It goes on to examine the important related questions of employment and underemployment, regional disparity, and economic integration, exploring in detail how far economic

integration has taken place in south China including the economies of Hong Kong and Taiwan and how far this integration has been a determinant of economic growth The book makes comparisons with other East Asian economies and concludes with a consideration of the prospects for continuing growth in the twenty first century **Agricultural Trade and Policy in China** Scott D. Rozelle,2017-12-04 This title was first published in 2003 This prominent and commanding volume collates the best research available on China s agricultural trade Critically analyzing the agricultural supply and demand factors that underlie trade patterns such as agricultural productivity and policy it also explores China s agricultural trade and policy including implications for China and elsewhere Long term issues and productivity growth are taken into consideration as are specific issues such as WTO accession The slate of authors combines the leading established scholars in the field and the best of the next generation including those from China and the West Rapid Growth of Selected Asian Economies. Khan,1995-04-01 Agriculture remains the dominant sector in the economies of most Sub Saharan African countries However the experience of agricultural growth in the region stands in sharp contrast to the robust performance of agriculture in many Asian countries particularly China In a number of African countries labor productivity has fallen and land productivity has not risen significantly In China on the other hand land and labor productivities have increased steadily over the past two decades An

examination of factors underlying the contrasting experiences of China and countries in Sub Saharan Africa reveals important differences in the institutional and policy environments affecting the use of new and profitable technologies to raise land and labor productivities

China's Economic Future, 1996 *Farmland, Farming and Food in the National Economy of China, 1947 - 2020* Jane Du, 2024-11-29 This book presents a concise yet detailed analysis of China's agricultural economy and food security in historical perspective. The book begins with an overview of China's socialist economic transition and Deng Xiaoping's reforms with an emphasis on agricultural economy and food production before discussing China's food industry and security in more recent years. Combining accessible qualitative interpretations with a rich data set, the author analyses the transitions and evolving policies in China's agricultural production and shows how these are essential for understanding contemporary food security challenges in the country. Covering topics including food imports and supply, dietary changes, international trade policies, and other geopolitical factors impacting food security, the book presents new insights into the interplay between domestic and international systems. Bridging gaps between historical understanding and contemporary policy relevance, this book will be useful reading for researchers in varied disciplines including economic history, agricultural economics, China's economy, and economic development.

Economic Growth and Employment in China Thomas G. Rawski, 1979 Investigating the relation between growth and employment in China, this report shows that over the past two decades the world's largest developing nation made significant strides towards the goal of full employment of its labor force by the ability of the agricultural sector to absorb the unemployed.

Sources of Chinese Economic Growth, 1978-1996 Chris Bramall, 2000-09-14 This analysis of the political economy of growth in the era of Deng Xiaoping takes issue with the growth accounting methodologies and market-centred explanations which characterize so much of the literature on transition-era China. By adopting an approach which echoes the pioneering work of Chalmers Johnson, Alice Amsden, and Robert Wade on other East Asian Economies and which makes full use of the rich statistical materials that have become available since 1978, this book shows that Chinese growth was driven by a combination of state-led industrial policy and the favourable infrastructural legacies of the Maoist era. And in giving due weight to the sheer complexity of the growth process by looking in detail at the experience of four very different Chinese regions, it avoids over-simplistic macroeconomic generalization. Nevertheless, even this type of approach is inadequate because it fails to explain why industrial policy has been so much more successful in China than in other countries. This book therefore goes beyond the development state approach to argue that state autonomy in China reflected the remarkably equal distribution of income and wealth at the end of the 1970s and paradoxically the destruction of party structures and institutions during the Cultural Revolution. The policy implications are stark. The Chinese experience demonstrates that industrial policy and state spending on physical and social infrastructure can produce rich rewards; conversely, slavish reliance on foreign direct investment and trade are likely to limit the pace of growth. But attempts to replicate China's success in Latin America, sub-Saharan Africa, and South Asia will fail.

because their governments will not resist rent seeking by classes and interest groups Moreover as the state becomes weaker in the wake of the re emergence of a powerful capitalist class even Chinese growth may prove unsustainable

Developments in the Asian Rice Economy M. Sombilla, Mahabub Hossain, B. Hardy, 2002 **China's New Sources of Economic Growth: Vol. 2** Ligang Song, Ross Garnaut, Cai Fang, Lauren Johnston, 2017-07-20 China's efforts in searching for new sources of growth are increasingly pressing given the persistence of the growth slowdown in recent years This year's book elucidates key present macroeconomic challenges facing China's economy in 2017 and the impacts and readiness of human capital innovation and technological change in affecting the development of China's economy The book explores the development of human capital as the foundations of China's push into more advanced growth frontiers It also explores the progress of productivity improvement in becoming the primary mechanism by which China can sustain economic growth and explains the importance of China's human capital investments to success on this front The book demonstrates that technical change is a major contributor to productivity growth and that invention and innovation are increasingly driving technical change but so far lumpily across regions sectors and invention motivations Included are chapters providing an update on reform and macroeconomic development educational inequality the role of intangibles in determining China's economic growth and China's progress in transitioning towards being an innovative country The book also covers the regional dimension of innovation and technological progress by sector in agricultural productivity renewable energy and financial markets Chapters on trade investment regional cooperation and foreign aid explore further the mechanisms through which technological change and innovative activities are emerging locally and internationally **The Chinese Economy Under Maoism** Andrew M. Greeley, 2017-07-05 Over sixty years have elapsed since the Communists gained control of the Chinese mainland The years between 1949 and 1969 were a time of constant change and periodic cataclysm the initial purges the Great Leap Forward and the Cultural Revolution all bound up with the Communist conception of how to move the country into modernity in the shortest possible time The Chinese Economy under Maoism summarizes and evaluates the economic consequences of the Communist path to development in a concise factual presentation that can be readily comprehended by non economists The authors review the major features of the Chinese economy prior to the Communist takeover and discuss the policies performance and problems of the individual sectors of the Chinese economy during its initial years under Communism Included in their review are industry agriculture foreign trade resource allocation population employment and living standards A concluding chapter summarizes Chinese economic growth and presents a discussion of future policy alternatives and an optimum economic policy for China Based on important findings of Western scholars with many original interpretations by the authors this material is presented from a developmental point of view Since it was originally published in 1972 sections of the book devoted to comparative studies of progress in India and the former Soviet regime will be of particular interest now Free of technical language and providing insights into the economy of one of the most important
