volume uses archival material juxtaposed with Hayek's published work to challenge the existing perceptions of his life and thought. It examines the methods by which Hayek interacted with and schemed against the knowledge communities that he encountered during his very long life. Chapters explore the rules of engagement that Hayek employed when interacting with fifth leading knowledge communities including the Nobel Prize selection committee who were led to believe his claim about having predicted the Great Depression. It also explores his interactions with William Beveridge the founder of the modern British Welfare State, A. C. Pigou the founder of the market school, J. M. **Ideology and the International Economy** R. Leeson, 2003-09-09. For twenty five years the International Monetary Fund administered a worldwide system of fixed exchange rates until their system was destroyed by a combination of market forces and those who advocated market forces. The first destructive element has been extensively analyzed; the second has hitherto been almost completely ignored. Robert Leeson examines the process by which the case for flexible exchange rates was transformed from an academic exercise to become the organizing principle for international monetary relations. *American Book Publishing Record*, 2003.

The Black Condition Howard Dodson, Colin A. Palmer, 2009. Michigan State University Press. ProQuest Schomburg Center for Research in Black Culture and The New York Public Library are pleased to present a unique research study and teaching resource for professors and students of black studies. In the more than thirty five years since the field of black studies established its presence in American higher education, the volume of research writing and publications on the global black experience has increased exponentially. With the extraordinary volume of research resources on the black experience currently available, the challenge of selecting appropriate materials for research study and teaching has become extremely difficult. Schomburg Studies on the Black Experience is a resource designed to assist users in making such choices. *The British National Bibliography* Arthur James Wells, 2006. *Books In Print 2004-2005* Ed Bowker Staff, Staff Bowker, Ed, 2004.

**Micro Foundations of Macro Rational Expectations Models** Cherry, Robert, Clawson, Patrick, Dean, James W, Simon Fraser University. School of Business Administration and Economics, 1980. **Rethinking Expectations** Roman Frydman, Edmund S. Phelps, 2013. This book originated from a 2010 conference marking the fortieth anniversary of the publication of the landmark Phelps volume *Microeconomic Foundations of Employment and Inflation Theory*, a book that is

often credited with pioneering the currently dominant approach to macroeconomic analysis. However, in their provocative introductory essay, Roman Frydman and Edmund Phelps argue that the vast majority of macroeconomic and finance models developed over the last four decades derailed rather than built on the Phelps volume's microfoundations approach. Whereas the contributors to the 1970 volume recognized the fundamental importance of according market participants' expectations an autonomous role, contemporary models rely on the rational expectations hypothesis (REH), which rules out such a role by design. The financial crisis that began in 2007, preceded by a spectacular boom and bust in asset prices that REH models implied could never happen, has spurred a quest for fresh approaches to macroeconomic analysis. While the alternatives to REH presented in *Rethinking Expectations* differ from the approach taken in the original Phelps volume, they are notable for returning to its major theme: understanding aggregate outcomes requires according expectations an autonomous role. In the introductory essay, Frydman and Phelps interpret the various efforts to reconstruct the field, some of which promise to chart its direction for decades to come. The contributors include Philippe Aghion, Sheila Dow, George W. Evans, Roger E. A. Farmer, Roman Frydman, Michael D. Goldberg, Roger Guesnerie, Seppo Honkapohja, Katarina Juselius, Enisse Kharroubi, Blake LeBaron, Edmund S. Phelps, John B. Taylor, Michael Woodford, and Gylfi Zoega.
