The Economics of Gender in Mexico Elizabeth G. Katz, Maria Cecilia Correia, 2001-01-01 Extrait de la couverture Mexico has witnessed major demographic social and economic changes since the 1960s In this context the distinct roles of men and women have also changed as exemplified by female labor force participation which almost tripled in the second half of the 20th century However traditional gender roles continue to constrain men's and women's opportunities and well being in Mexico The book examines these issues from a life cycle and economic perspective It looks at the way traditional gender roles shape male and female economic activities and outcomes beginning with school age children and their education patterns continuing with the labor force participation of adults in rural and urban areas and ending with the situation of elderly men and women The book contains new material on changes in the maquiladora sector which has historically provided important work opportunities for women as well as the distinct impact of ejido reform on rural men and women

Economic Life of Mexican Beach Vendors Tamar Diana Wilson, 2012-11-02 Economic Life of Mexican Beach Vendors Acapulco Puerto Vallarta and Cabo San Lucas is based on interviews with 82 men and 84 women who vend their wares on beaches in three Mexican tourist centers Assuming that some people may actively choose self employment in the informal or semi informal economy the employment and educational aspirations of the vendors and their levels of satisfaction with their work are explored Most of the vendors had other family members who were also vendors and 75.45 percent had 5 or more family members who vended most usually on Mexican beaches The vendors are aware of the forces of globalization though they do not express these forces in those words as revealed by their responses to questions as to how the current world economic recession has affected them The beach vendors live in essentially segregated neighborhoods that can be considered apartheid like far from the tourist zones Most of the vendors or their parents are rural to urban migrants and cross ethnic linguistic and economic borders as they migrate to and work in what have been called transnational social spaces Of the vendors interviewed 82.49 percent speak an indigenous language and of these 60.73 percent speak Nahuatl The majority are from the state of Guerrero but there were also Zapotec speakers from Oaxaca Both indigenous and non indigenous women take part in beach vending They are often wives daughters or sisters of male beach vendors and they may be single married living in free union or widowed Their income is often of central importance to the household economy This monograph aims to bring their stories to tourists and to scholars and students of tourism development and of the informal or semi informal economy in Mexican tourist centers

Gender Inequalities and Development in Latin America During the Twentieth Century María Magdalena Camou, Silvana Maubrigades, Rosemary Thorp, 2017-05-15 This book presents evidence of the evolution of the gender inequalities in Latin America during the twentieth century using basic indicators of human development namely education health and the labour market There are very few historical studies that centre on gender as the main analytical category in Latin America so this book breaks new ground Using case studies from Argentina Chile Colombia Mexico and Uruguay the authors show that there is evidence of a correlation between economic growth and the decrease in gender inequality but this process is also not linear Although the activity rate of women was high at the beginning of the twentieth century female participation in the labour market diminished until the 1970s when it began to increase dramatically Since the 1970s fertility reduction and education improvements and worsening labour market conditions are associated to the steadily increase of women participation in the labour market By gauging the extent to which gender gaps in the formation of human capital access to resources quality of life and opportunities may have operated as a restriction on women s capabilities and on economic growth in the region this book demonstrates that Latin America has lagged behind in terms of gender equality

Labor Market Dynamics in Developing Countries Mariano Bosch,William Francis Maloney,2005 Abstract The authors study the dynamics of three developing country labor markets using recent advances in the estimation of continuous time Markov processes They first examine the flows of workers among five states three types of paid labor unemployment and out of the labor force The authors find a high degree of commonality in patterns of worker flows among the three countries and attempt to compare the flexibility of the markets by examining an index of overall mobility Second they seek to establish whether the issues of advanced country labor markets apply to developing country markets or whether the latter constitute a different phylum Paralleling the mainstream literature on the role of being out of the labor force as discouraged unemployment the authors then identify some common stylized facts about the role of the informal self employed and salaried sectors and to what degree they serve as a holding pattern versus a desirable alternative to formal sector work In the process the authors identify very strong differences in mobility patterns between men and women and attempt to shed some light on whether these differences arise from discrimination or perhaps instead the constraints imposed by household responsibilities Finally they study labor market adjustment across the business cycle in Mexico and identify patterns of job creation and destruction among the three paid sectors and confirm the mainstream view of the role of out of the labor force as a procyclical phenomenon

The Gender Impact of Social Security Reform Estelle James,Alejandra Cox Edwards,Rebeca Wong,2008-09-15 As populations age and revenues diminish government and private pension funds around the world are facing insolvency The looming social security crisis is especially dire for women who live longer than men but have worked less in the formal labor force This groundbreaking study examines alternative social security systems and their disparate impacts on men and women Emphasis is placed on the new multi pillar systems that combine a publicly managed benefit and a mandatory private retirement saving plan The Gender Impact of Social Security Reform compares the gendered outcomes of social security systems in Chile Argentina and Mexico and presents empirical findings from Eastern and Central European transition economies as well as several OECD countries Women s positions have improved relative to men in countries where joint pensions have been required widows who have worked can keep the joint pension in addition to their own benefit the public benefit has been targeted toward low earners and women s retirement age has been raised to equality with that of men The Gender Impact of Social Security Reform will force economists and policy makers to reexamine the design features that enable social security systems to achieve desirable gender outcomes
