**The Economics of Taste: The art market in the 1960's** Gerald Reitlinger, 1970      The art market in the 1960s  
Gerald Reitlinger,      **The Economics of Taste** ,1970      *New Frontiers in the Economics of Innovation and New Technology* Cristiano Antonelli, Dominique Foray, Bronwyn H. Hall, W. Edward Steinmueller, 2006-01-01 This Festschrift explores the truly exceptional breadth and depth of Paul David's work focusing upon his contributions to the topics of path dependence, the economics of knowledge and the diffusion of technology. The book consists of 15 papers plus an introduction by the editors and an entertaining postscript by Dominique Foray. For economic historians, the papers on path dependence assembled in this book and particularly the conceptual paper by Antonelli should be essential reading. Nikolaus Wolf  
*Economic History Review* Recent research on the economics of innovation has acknowledged the importance of path dependence and networks in the evolution of economies and the diffusion of new techniques, products and processes. These are topics pioneered by Paul A. David, one of the world's leading scholars in the economics of innovation. This outstanding collection provides a fitting tribute to the diversity and depth of Paul David's contributions. The papers included range from simulation models of the evolution of market structure in the presence of innovation through historical investigations of knowledge networks and empirical analysis of contemporary networks to the analysis of the diffusion of innovations using simulation and analytic models and of the diffusion of knowledge using patent data. With an emphasis on simulation models, data analysis and historical evidence, this book will be required reading for researchers in innovation, economics and regional development as well as economists, sociologists and historians of innovation and intellectual property.      **Global Art Markets** Iain Robertson, Derrick Chong, Luís U. Afonso, 2024-11-29 The art market is worth billions globally despite the effects of the Covid-19 health pandemic. This book brings together a strong cast of contributors to explore contemporary and historical themes. Readers of the book will gain awareness of how historical foundations of arts markets continue to impact on contemporary global developments while transformational digital technology shakes up the art world. With new insights into emerging arts markets, the book also covers themes and phenomena such as NFTs, secrecy platforms and financialization in the arts. The result is a book that will prove valuable reading for scholars involved in art markets studies.      *Economics As a Science of Human Behaviour* Bruno S. Frey, 2013-06-29 This book champions the view that economics is a social science and that moreover it may serve as a new paradigm for the social sciences. Economics is taken to be part of those sciences which deal with actual problems of society by providing insights, improving our understanding and suggesting solutions. I am aware that the way problems are addressed here has little in common with economics as it is generally understood today: most economists make strong efforts to imitate the exact sciences. Economics tends to become a branch of applied mathematics; the majority of all publications in professional journals and books are full of axioms, lemmas and proofs and they are much concerned with purely formal deductions. Often when the results are translated into verbal language or when they are applied

empirically disappointingly little of interest remains The book wants to show that another type of economics exists which is surprisingly little known This type of economics has its own particular point of view It centres on a concept of man or a model of human behaviour which differs from those normally used in other social sciences such as sociology political science law or psychology I do not however claim that economics is the only legitimate social science On the vii viii PREFACE contrary economics can provide useful insights only in collaboration with the other social sciences an aspect which has been disregarded by mathematically oriented economics
