Economics for Collaborative Environmental Management Graham R. Marshall, 2005 Includes lessons from Africa Central America North America and Asia and detailed coverage of collaborative management in irrigated environments of Australia s Murray Darling Basin Essential reading for economists policy makers researchers leaders practitioners and students working in environmental and natural resource management Mainstream economics has a tight grip on public discourse yet remains poorly equipped to comprehend the collaborative vision for managing environmental and resource commons This ground breaking book diagnoses the weaknesses of mainstream economics in analysing collaborative and other decentralized approaches to environmental management and presents a unique operational approach to how collaborative environmental governance might be brought to fruition in a variety of contexts whether in industrialized or developing countries The result is a powerful useful and badly needed approach to economics for collaborative environmental management of the commons

Spatial Economics for Building Back Better Masahisa Fujita, Nobuaki

Hamaguchi, Yoshihiro Kameyama, 2021-10-17 The central theme of this book is national land and infrastructure design in the age of the declining population and the recovery from the Great East Japan Earthquake in the affected regions in Japan Based on the theory of spatial economics and evidence from Japanese history the authors show that the growing economy with a population increase develops into a multi cored and complex structure In the population decline phase however such construction will be destabilized because of agglomeration economies in the central core Then a catastrophic shock that strikes may provoke the decline of the lower rank size provincial cities and their eventual disappearance if they compete only in lower prices of staple products Not only is the practice bad for the residents it also leads to lower national welfare resulting from the loss of diversity and overcrowded big cities The authors argue that small local towns can recover and will be sustained if they will endeavor in innovative production by making good use of local natural resources and social capital Under the ongoing declining population in Japan an undesirable concentration in Tokyo will proceed further with increasing social cost and risk The recent novel coronavirus pandemic has highlighted that concern

Development Economics for Developing Economies Ephraim Matanda, Hlupeko Dube, Munyaradzi Mawere, Misheck Diza, 2024-11-17 This book offers a fresh perspective on development economics specifically tailored to the unique challenges and opportunities facing developing economies Drawing on the historical experiences of now developed nations it explores how emerging economies particularly in Africa can finance their development reduce reliance on external aid modernise infrastructure and alleviate poverty The book emphasizes the crucial interplay between development economics and finance advocating for a synergistic approach to achieve efficient and effective growth Recognising the increasingly multidisciplinary nature of modern research it champions a hybrid approach that merges economic and financial perspectives fostering a more comprehensive understanding of development challenges This book s unique contribution lies in its integrated presentation of development economics and finance within a single cohesive framework By bridging these two critical fields it provides valuable insights into contemporary research trends and their practical applications across diverse disciplines and global contexts More than just a textbook it serves as a catalyst for debate on multidisciplinary approaches to development equipping students and practitioners with the knowledge and tools to navigate the complexities of economic growth in the developing world

Labour Economics for Development** Sandrine Cazes,Sher Verick,2013 In developing countries labour markets play a
central role in determining economic and social progress since employment status is one of the key determinants of exiting
poverty and promoting inclusion Yet the reality in most developing countries is that the labour market fails to create the jobs
in the formal economy that would help individuals and their families prosper In recognition of these challenges governments
and other stakeholders in developing countries have increasingly prioritised policies and programmes to promote decent
work However this requires navigating a range of complex issues and debates surrounding the linkages between
development processes and labour market outcomes This volume consists of three main thematic parts Part I provides a
broad overview of key issues including characterising the employment challenge in developing countries and the link
between economic growth distribution poverty and employment Drawing on the literature and country examples Part II
analyses the specific topics of wages migration and education The final section shifts to a more normative focus addressing
labour market institutions and policies along with systematic approaches to quantifying labour markets in developing
countries *Perspectives on Labour Economics for Development* is an invaluable reference for policy makers in middle and low
income countries as well as an ideal handbook for teachers and students of economics and development
