Economics Of Imperfect Competition And Employment:

The Economics of Imperfect Competition and Employment George R. Feiwel,1989 Economics of Imperfect Competition and Employment George R. Feiwel,1989-06-18 This study and its companion Joan Robinson and Economic Theory looks at Joan Robinson her impact upon modern economics her challenges and critiques and the advances made in the science and art of economics It studies her ideas themes and concerns from many different perspectives **Economics of Imperfect Competition and Employment** George R. Feiwel,1989 THE ECONOMICS OF IMPERFECT COMPETITION AND EMPLOYMENT: JOAN ROBINSON AND BEYOND; JOAN ROBINSON AND MODERN ECONOMIC THEORY ,1989 *Joan Robinson and Modern Economic Theory* George R. Feiwel,1989-02-01 *The Economics of Imperfect Competition* Joan Robinson,1934 **Monopsony in Motion** Alan Manning,2005-01-30 What happens if an employer cuts wages by one cent Much of labor economics is built on the assumption that all the workers will quit immediately Here Alan Manning mounts a systematic challenge to the standard model of perfect competition Monopsony in Motion stands apart by analyzing labor markets from the real world perspective that employers have significant market or monopsony power over their workers Arguing that this power derives from frictions in the labor market that make it time consuming and costly for workers to change jobs Manning re examines much of labor economics based on this alternative and equally plausible assumption The book addresses the theoretical implications of monopsony and presents a wealth of empirical evidence Our understanding of the distribution of wages unemployment and human capital can all be improved by recognizing that employers have some monopsony power over their workers Also considered are policy issues including the minimum wage equal pay legislation and caps on working hours In a monopsonistic labor market concludes Manning the free market can no longer be sustained as an ideal and labor economists need to be more open minded in their evaluation of labor market policies Monopsony in Motion will represent for some a new fundamental text in the advanced study of labor economics and for others an invaluable alternative perspective that henceforth must be taken into account in any serious consideration of the subject **Economics of Imperfect Competition** Joan Robinson,1969-10 *The Economics of Imperfect Competition and Employment* George R. Feiwel,1989 **A Companion to the History of Economic Thought** Warren J. Samuels,Jeff E. Biddle,John B. Davis,2008-04-15 Assembling contributions from top thinkers in the field thiscompanion offers a comprehensive and sophisticated exploration ofthe history of economic thought The volume has a threefold focus the history of economic thought the history of economics as adiscipline and the historiography of economic thought Provides sophisticated introductions to a vast array oftopics Focuses on a unique range of topics including the history ofeconomic thought the history of the discipline of economics andthe historiography of economic thought **A Model of Employment and Real Wages Under Imperfect Competition** Matthew Grey,Jakob B. Madsen,1996 **Fighting Market Failure** Maria Cristina Marcuzzo,2012-03-12 This collection brings together fifteen essays published

between 1994 and 2008 which all look into the contribution of a remarkable group of economists known as the Cambridge school or the Cambridge Keynesians. The people involved are better defined as a group rather than a school to denote not adherence to a common body of doctrine but rather the idea of both cohesion and sharing. This collection focuses on Keynes, Kahn, J. Robinson, and Sraffa who all shared in the physical space and lifestyle of the University of Cambridge. The bond between them was intellectual partnership, a recognised common ground, dialogue, and acceptance of criticism. Some of the essays in this collection address the content as well as the method and style of the type of economics associated with the Cambridge tradition at the very core of which those economists stand. The first section opens with a chapter presenting the group within the physical and metaphorical place which was Cambridge, and the remaining five chapters centre on the life and work of each economist. The second section has papers looking at them in pairs as it were and revolves around the theme of their collaboration in various intellectual achievements. In particular, the opening piece makes the rather bold point that the road to the General Theory was not a solitary path. In other two papers, much is said of Sraffa's intellectual isolation in Cambridge and the difficulty of communication with Joan Robinson. The chapters in the third section take up aspects of their theories and approaches which justify the importance and relevance of the Cambridge tradition in economics. This book should be of interest to students and researchers within the history of economics and economic thought, particularly those focussing on the Cambridge or Keynesian traditions.

The Economics of Joan Robinson Maria Cristina Marcuzzo, Luigi Pasinetti, Alessandro Roncaglia, 2005-08-12 Joan Robinson is widely regarded as the greatest female economist. Her published work spanned six decades and is analysed here by a distinguished international team of scholars.

Increasing Returns and Economic Analysis Kenneth J. Arrow, Yew-Kwang Ng, Xiaokai Yang, 1998-04-12 Selected papers from many leading Australian, American, Asian, British, and European economists of an international conference at Monash University sparked by the first Australian visit by Kenneth J. Arrow, Nobel Laureate in Economics. Part 1 extends the recently emerged New Classical Economics which uses inframarginal analysis to formally examine classical economic problems of specialization with insights on trade, growth, and many other issues. Part 2 analyses the implications of increasing returns and the associated non-perfect competition on some macro problems like the effects of nominal aggregate demand on output and the price level. Part 3 analyses the relationships of information, returns to scale, and issues of resources and trade.
