particularly in China and elsewhere in Asia will be particularly interested in the book **OECD Economic Surveys: China 2010** OECD,2010-02-02 This 2010 edition of OECD's periodic review of China's economy finds that China's spectacular expansion has continued in recent years making for impressive improvements in living standards The slowdown associated with the global financial and *No Great Wall* Felix Boecking,2020-05-11 This book an in depth study of Nationalist tariff policy fundamentally challenges the widely accepted idea that the key to the Communist seizure of power in China lay in the incompetence of Chiang Kai shek's Nationalist government It argues instead that during the second Sino Japanese War China's international trade the Nationalist government's tariff revenues and hence its fiscal policy and state making project all collapsed Because tariffs on China's international trade produced the single greatest share of central government revenue during the Nanjing decade the political existence of the Nationalist government depended on tariff revenue Therefore Chinese economic nationalism both at the official and popular levels had to be managed carefully so as not to jeopardize the Nationalist government's income Until the outbreak of war in 1937 the Nationalists management of international trade and China's government finances was largely successful in terms of producing increasing and sustainable revenues Within the first year of war however the Nationalists lost territories producing 80 percent of tariff revenue Hence government revenue declined just as war related expenditure increased and the Nationalist government had to resort to more rapacious forms of revenue extraction a decision that had disastrous consequences for both its finances and its political viability **After Tamerlane** John Darwin,2010-08-08 Tamerlane the Ottomans the Mughals the Manchus the British the Japanese the Nazis and the Soviets All built empires meant to last forever all were to fail But as John Darwin shows in this magisterial book their empire building created the world we know today From the death of Tamerlane in 1405 to America's rise to world hyperpower to the resurgence of China and India as global economic powers *After Tamerlane* is a grand historical narrative that offers a new perspective on the past present and future of empires **Economic Change in China, c.1800-1950** Philip Richardson,1999-11-18 This book is the first attempt to focus on the long term process of economic change in pre Communist China It examines the extent to which China had become a modern economy by 1950 and analyzes the origins of some of the modern features in the traditional economy With maps tables and bibliography to guide the student this concise study will provide an invaluable introduction to crucial aspects of Chinese history **The Oxford Handbook of Africa and Economics** Célestin Monga,Justin Yifu Lin,2015-07-02 For a long time economic research on Africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field This was understandable the reputation of Africa centered economic research was not enhanced by the well known limitations of economic data across the continent Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel

laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it. They have been amply rewarded: the richness, complexities and subtleties of African societies, civilizations, rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from around the world. In collecting some of the most authoritative statements about the science of economics and its concepts in the African context, this handbook, the first of two volumes, opens up the diverse acuity of commentary on exciting topics and in the process challenges and stimulates the quest for knowledge. Wide ranging in its scope, themes, language and approaches, this volume explores, examines and assesses economic thinking on Africa and Africa's contribution to the discipline. The editors bring a set of powerful resources to this endeavor, most notably a team of internationally renowned economists whose diverse viewpoints are complemented by the perspectives of philosophers, political scientists and anthropologists.

China and the Birth of Globalization in the 16th Century Dennis O. Flynn, Arturo Giráldez, 2024-10-28. Including 11 essays published over the last 15 years, this volume by Dennis O. Flynn and Arturo Giráldez concerns the origins and early development of globalization. It opens with their 1995 Silver Spoon essay and a theoretical essay published in 2002. Subsequent sections deal with Pacific Ocean exchanges, interconnections between the Spanish, Ottoman, Japanese and Chinese empires, and the necessity of multidisciplinary approaches to global history. The volume follows the evolution of the authors' thinking concerning the central role of China in the global silver trade, as well as interrelations among silver and non-silver markets. Research before 2002 paved the way for development of a coherent Birth of Globalization narrative that portrays economic factors in the context of powerful epidemiological, ecological, demographic and cultural forces. In the final essay, Flynn and Giráldez argue for incorporating the work of all academic disciplines when attempting to understand the history of globalization, advocating an inclusive historical data base which recognizes contextual realities and an inductive process of reasoning.

States, Intergovernmental Relations, and Market Development Jinhua Cheng, 2018-05-17. This book is a theoretical and empirical analysis of institutional foundation of long-term economic growth from the perspective of state-market and central-local relations. The book argues that in order to safeguard sustainable market development, it is necessary to centralize certain functions of the state to overcome local predatory governmental rulings and to decentralize others to increase local governmental market incentives simultaneously. This institutional approach is conceptualized as Dual Intergovernmental Transformation for Market Development (DITMD). This book develops the DITMD model through an in-depth empirical comparison on contemporary China and the 19th-century United States.

Transnational Legal Processes Michael Likosky, 2002-04. This work comprises 24 linked essays by leading transatlantic scholars in international law and the social sciences, examining the socio-legal aspects of multi-jurisdictional legal techniques and trans-jurisdictional social phenomena. The contributors bring a range of disciplinary expertises including anthropology, economics, law and sociology to bear on key questions raised by transnational legal processes. The pieces explore legal developments in multiple territories including Africa, Asia, Latin America and the United States. The volume is designed as a general reader for courses on law and globalisation and related studies. The collection is made up of four parts, each addressing a central theme in transnational law and legal action: law making and compliance, human rights, commerce and governance. The essays discuss such diverse problems as the role of foreign actors in the ethnic conflicts of Kosovo and Rwanda, the power the United States and the UK wield over international capital markets and the adaptability of existing public international law to deal with the challenges wrought by globalisation.

Handbook of World Exchange Rates, 1590-1914 Markus A. Denzel, 2017-03-02. As a world economy emerged from the 16th-17th centuries onwards, a global cashless payment system arose. This had its base in Europe, first in Italy, then in the rising regions of the north-west with Amsterdam and then London as the central financial market. The mutual quotation of exchange rates, which provide the data tabulated and analysed here, mark the integration into a global network of all areas with significant economic potential. The primary aim of this book is to provide a compact account of the exchange rates in all these financial markets from the late 16th century up to the First World War. This makes possible an instant conversion between the major world currencies at nearly any date within that period, while the important introduction provides the

explanation and context of developments The present handbook therefore serves as an invaluable resource for those concerned with all aspects of commercial and financial history

The Cambridge Economic History of Modern Europe: Volume 1, 1700-1870 Stephen Broadberry, Kevin H. O'Rourke, 2010-06-24 Unlike most existing textbooks on the economic history of modern Europe which offer a country by country approach The Cambridge Economic History of Modern Europe rethinks Europe's economic history since 1700 as unified and pan European with the material organised by topic rather than by country This first volume is centred on the transition to modern economic growth which first occurred in Britain before spreading to other parts of western Europe by 1870 Each chapter is written by an international team of authors who cover the three major regions of northern Europe southern Europe and central and eastern Europe The volume covers the major themes of modern economic history including trade urbanization aggregate economic growth the major sectors of agriculture industry and services and the development of living standards including the distribution of income The quantitative approach makes use of modern economic analysis in a way that is easy for students to understand
