Japanese Studies from Pre-History to 1990 Richard Perren, 1992

The Japan-British Exhibition of 1910 A. Hotta-Lister, 2013-10-23 The rapid development of Japan at the turn of the last century including the defeat of Russia in 1904 5 intrigued the western Imperial powers but also aroused reactions of contempt and suspicion Britain was the most important of the powers upon which Japan earnestly wished to impress herself to mitigate the rising tide of anti Japanese sentiment An exhibition in London therefore was seen as a timely event by the Meiji Government to advance Japanese agendas in political economic and educational terms This is the first major study of this remarkable venture fully reviewed and documented and concerned principally with the Japanese side of the story

[The Emergence of Modern Japan](#) Janet Hunter, 2014-06-06 The main emphasis of this book is upon political social and economic developments as conditioned by Japan s interaction with the outside world the advance of industrialisation and the emergence of the Japanese nation state Unlike previous textbooks on the history of modern Japan Janet Hunter s book adopts a thematic approach which makes the period much more accessible for readers who wish to pursue their particular interests throughout the period Moreover it will also establish a greater awareness of the cultural and institutional continuities which are crucial to any proper understanding of modern Japan

The Japanese Economic and Social System Claude Lonien, 2003 The Japanese economy is currently at a crossroads and the embarrassing situation the country faces today is even worse than the Meiji restoration of 1868 the defeat after World War II in 1945 and the yen appreciation after the Plaza Agreements of 1985 Indeed the traditional Japanese model is doomed to failure mainly due to economic and industrial structures that are inappropriate towards increasing globalization liberalization and deregulation However Japanese style industrial capitalism is in this work compared to the economic and social models of other developed countries and this enables us to point out the path the Japanese economy may take in the 21st century in order to survive

After Socialism Gabriel Kolko, 2006-10-03 Does socialism have a future in the world of the twenty first century If not what is the future for progressive politics This is a major contribution to contemporary social and political thought written by one

of the world's leading critical historians Gabriel Kolko ask the difficult questions about where the left can go in a post Cold War world where neoliberal policies appear to have triumphed in both the West and the former Soviet bloc. In trying to answer this he interrogates both the origins and development of socialist ideas and the contemporary dynamics of the globalized economy dominated by American military cultural and political might. While avoiding the temptations of either pessimism or utopianism, Kolko offers an original and practical solution about the way forward for a liberal politics.

Global Great Depression and the Coming of World War II John E. Moser, 2015-11-17. The Global Great Depression and the Coming of World War II demonstrates the ways in which the economic crisis of the late 1920s and early 1930s helped to cause and shape the course of the Second World War. Historian John E. Moser points to the essential uniformity in the way in which the world's industrialized and industrializing nations responded to the challenge of the Depression. Among these nations there was a move away from legislative deliberation and toward executive authority, away from free trade and toward the creation of regional trading blocs, away from the international gold standard and toward managed national currencies, away from chaotic individual liberty and toward rational regimentation. In other words, away from classical liberalism and toward some combination of corporatism, nationalism, and militarism. For all the similarities, however, there was still a great divide between two different general approaches to the economic crisis. Those countries that enjoyed easy, unchallenged access to resources and markets—the United States, Great Britain, the Soviet Union, and France—tended to turn inward, erecting tariff walls and promoting domestic recovery at the expense of the international order. On the other hand, those nations that lacked such access—Germany and Japan—sought to take the necessary resources and markets by force. The interplay of these powers then constituted the dynamic of international relations of the 1930s, having nots attempting to achieve self-sufficiency through aggressive means, challenging haves that were too distrustful of one another and too preoccupied with their own domestic affairs to work cooperatively in an effort to stop them.

An Economic History of Regional Industrialization Bas van Leeuwen, Robin C.M. Philips, Erik Buyst, 2020-10-22. This book offers a comprehensive study of regional industrialization in Europe and Asia from the early nineteenth century to the present. The book is an invaluable reference that attempts to bridge the fields of economic history, political history, economic geography, and economics, while contributing to the debates on economic divergence between Europe and Asia, as well as on the role of economic integration and globalization.

Industrial Transformation in Eastern Europe in the Light of the East Asian Experience Jeffrey Henderson, Karoly Balaton, Gyorgy Lengyel, 2016-07-27 Since 1989 the postcommunist societies of Eastern Europe have been subject to policy advice and political and economic pressure which assumes that the development of free market economies is the best route to economic growth and prosperity The contributors to this volume take issue with this proposition Though working from different theoretical perspectives with different interests they collectively argue that there are better ways to build dynamic and prosperous industrial economies in Eastern Europe than encouraging the respective societies of the region to ape the contents and swallow the myths of the Anglo American form of capitalism The contributors to this volume are among the leading authorities on economic transformation in Eastern Europe

Allawi, 2009-04-28 Islam as a religion is central to the lives of over a billion people but its outer expression as a distinctive civilization has been undergoing a monumental crisis Buffeted by powerful adverse currents Islamic civilization today is a shadow of its former self The most disturbing and possibly fatal of these currents the imperial expansion of the West into Muslim lands and the blast of modernity that accompanied it are now compounded by a third giant wave globalization These forces have increasingly tested Islam and Islamic civilization for validity adaptability and the ability to hold on to the loyalty of Muslims says Ali A Allawi in his provocative new book While the faith has proved resilient in the face of these challenges other aspects of Islamic civilization have atrophied or died Allawi contends and Islamic civilization is now undergoing its last crisis The book explores how Islamic civilization began to unravel under colonial rule as its institutions laws and economies were often replaced by inadequate modern equivalents Allawi also examines the backlash expressed through the increasing religiosity of Muslim societies and the spectacular rise of political Islam and its terrorist offshoots Assessing the status of each of the building blocks of Islamic civilization the author concludes that Islamic civilization cannot survive without the vital spirituality that underpinned it in the past He identifies a key set of principles for moving forward principles that will surprise some and anger others yet clearly must be considered
