With an international and comparative perspective, chapters look at issues such as political economy, the judicial enforceability of social rights, implications of the privatisation of public services and the importance of active participation of most vulnerable groups in a constitutional drafting process. Christina M. Cerna, 2016-12-05. Over the past sixty years, the regional human rights systems have surpassed the UN human rights bodies in affording protection to the victims of human rights violations. Most of these systems have courts that are empowered to issue legally binding judgments and reparations for violations of human rights, which states have been unwilling to accord the UN system. The essays selected for this volume examine the structure and functioning of the principal regional human rights systems in the world today: 1 the Inter American Commission and Court of Human Rights, 2 the European Court of Human Rights, 3 the African Commission and Court of Human and Peoples Rights, and 4 the ASEAN Intergovernmental Human Rights Commission. These systems guarantee primarily civil and political rights. Central to all four systems is the necessity of a democratic form of government to guarantee these rights, although not all governments parties to these regional treaties are democracies. These articles trace the history of these systems, in particular the expansion of their membership to include almost all independent countries in the region and their evolution towards recognition of a right to democracy. **Equality and Non-discrimination**

Security Rights in Intellectual Property Eva-Maria Kieninger, 2020-06-11 This book discusses the main legal and economic challenges to the creation and enforcement of security rights in intellectual property and explores possible avenues of reform such as more specific rules for security in IP rights and better coordination between intellectual property law and secured transactions law In the context of business financing intellectual property rights are still only reluctantly used as collateral and on a small scale If they are used at all it is mostly done in the form of a floating charge or some other all asset security right The only sector in which security rights in intellectual property play a major role at least in some jurisdictions is the financing of movies On the other hand it is virtually undisputed that security rights in intellectual property could be economically valuable or even crucial for small and medium sized enterprises especially for start ups which are often very innovative and creative but have limited access to corporate financing and must rely on capital markets securitization capital market Therefore they need to secure bank loans yet lack their own traditional collateral such as land
