engineering management **Encyclopedia Of The Global Economy A Guide For Students And Researchers** David E. O'connor,2006 **Manufacturing Knowledge** Richard Gillespie,1993-05-28 What motivates workers to work harder What can management do to create a contented and productive workforce Discussion of these questions would be incomplete without reference to the Hawthorne experiments one of the most famous pieces of research ever conducted in the social and behavioral sciences Drawing on the original records of the experiments and the personal papers of the researchers Richard Gillespie has reconstructed the intellectual and political dynamics of the experiments as they evolved from the tentative experimentation to seemingly authoritative publications Manufacturing Knowledge raises fundamental questions about the nature of scientific knowledge and about the assumptions and evidence that underlay debates on worker productivity

Semiotics of Happiness Ashley Frawley,2015-02-26 The Semiotics of Happiness examines the rise of happiness and its various satellite terminologies as a social and political semiotic exploring its origins in the US and subsequent spread into the UK and across the globe The research takes as its starting point the development of discussions about happiness in UK newspapers in which dedicated advocates began to claim that a new science of happiness had been discovered and argued for social and political change on its behalf Through an in depth analysis of the written and visual rhetoric and subsequent activities of these influential claims makers Frawley argues that happiness became a serious political issue not because of a growing unhappiness in society nor a demand on the ground for new knowledge about it but rather because influential and dedicated insiders took the issue on at a cultural moment when problems cast in emotional terms were particularly likely to make an impact Emerging from the analysis is the observation that while apparently positive and light hearted the concern with happiness implicitly affirms a vulnerability model of human functioning encourages a morality of low expectations and in spite of the radical language used to describe it is ultimately conservative and ideally suited to an era of no alternative to capitalism **Growing Prosperity** Barry Bluestone,Bennett Harrison,2001-05-25 Growing Prosperity could well be as important in shaping our future as Keynes General Theory A work as meticulous as it is powerful as promising as it is persuasive Robert Heilbroner author of The Worldly Philosophers Bluestone and Harrison have alerted us to the key issue confronting America how to achieve growth with equity This country needs a powerful dialogue on how to continue growth while deepening its benefits to all Americans This is the blueprint for the terms of that debate U S Representative Richard Gephardt **Parallel Computational Technologies** Leonid Sokolinsky,Mikhail Zymbler,2017-10-01 This book constitutes the refereed proceedings of the 11th International Conference on Parallel Computational Technologies PCT 2017 held in Kazan Russia in April 2017 The 24 revised full papers presented were carefully reviewed and selected from 167 submissions The papers are organized in topical sections on high performance architectures tools and technologies parallel numerical algorithms supercomputer simulation **Centres and Cycles of Accumulation in and Around the Netherlands During the Early Modern Period** Lissa Roberts,2011 The Netherlands housed a number of widely known envied and emulated

centers of accumulation during the early modern period Raw and manufactured goods passed through Dutch port cities linking the country to global cycles of accumulation and exchange Its institutions of learning and culture similarly served as internationally famous centers of accumulation that furthered knowledge and cultural production embodied in the form of books maps prints exhibits and the like This collection of essays brings together the Dutch histories of manufacture commerce and global exchange along with the histories of knowledge and cultural circulation during the 17th and 18th centuries by anatomizing the multi faceted concept of accumulation The book explores the processes that led to the formation of concentrated often hybrid sites of material intellectual and cultural accumulation in the Netherlands and its overseas stations as well as the concerns and consequences to which the successes and challenges of accumulation gave rise It will be of interest to historians of science technology culture and economics Series Low Countries Studies on the Circulation of Natural Knowledge Vol 2 *Strategic Factors in Nineteenth Century American Economic History* Claudia Goldin, Hugh Rockoff, 2008-04-15 Offering new research on strategic factors in the development of the nineteenth century American economy labor capital and political structure the contributors to this volume employ a methodology innovated by Robert W Fogel one of the leading pioneers of the new economic history Fogel s work is distinguished by the application of economic theory and large scale quantitative evidence to long standing historical questions These sixteen essays reveal by example the continuing vitality of Fogel s approach The authors use an astonishing variety of data including genealogies the U S federal population census manuscripts manumission and probate records firm accounts farmers account books and slave narratives to address collectively market integration and its impact on the lives of Americans The evolution of markets in agricultural and manufacturing labor is considered first that concerning capital and credit follows The demography of free and slave populations is the subject of the third section and the final group of papers examines the extra market institutions of governments and unions **The Palgrave Companion to Harvard Economics** Robert A. Cord, 2024-07-05 Harvard University has been and continues to be one of the most important global centres for economics With three chapters on themes in Harvard economics and 41 chapters on the lives and work of Harvard economists these two volumes show how economics became established at the University how it produced some of the world s best known economists including Joseph Schumpeter Wassily Leontief and John Kenneth Galbraith and how it remains a global force for the very best in teaching and research in economics With original contributions from a stellar cast the volumes provide economists especially those interested in macroeconomics and the history of economic thought with an in depth analysis of Harvard economics

History of Technology Volume 31 Ian Inkster, 2012-11-22 New work on early modern Europe has now opened up the hidden avenues that link changes of technologies with a complex of cognitive institutional spatial and cultural elements It is true that all divisions of history wish to incorporate all other divisions unto themselves but in the essays of our first collection there are specific cases and analyses clearly delineated to show how technologies and systems for the production

reproduction and representation of technological changes emerged out of fundamental aspects of European society and mentality The question must be How far were such fundamental aspects unique in their entirety and configuration to Europe The second collection on patent agency takes the modern industrialization of Europe as its focus and illustrates the manner in which systems of intellectual property rights generated manifold agencies that acted to both spread and control the use of knowledge in advanced sites Patent agency has been generally neglected by historians one reason for this being the difficulty of defining effective agency beyond the obvious confines of those who were actually trained and remunerated as agents of invention Informal networks or sites may have been crucial in converting general patent systems into local environs of technical advance A Select Bibliography On Economic Development John P. Powelson, 2019-05-20 This bibliography of more than 2 000 titles contains both books and journal articles primarily those published since 1970 Most of the entries are annotated The material is classified according to forty eight categories and there is also a list of relevant titles for each major country in Africa Asia and Latin America **Asian Profile** ,1993
