Hunt,James M. Murray,1999-03-28 This book demolishes the widely held view that the phrase medieval business is an oxymoron The authors review the entire range of business in medieval western Europe probing its Roman and Christian heritage to discover the economic and political forces that shaped the organization of agriculture manufacturing construction mining transportation and marketing Businessmen s responses to the devastating plagues famines and warfare that beset Europe in the late Middle Ages are equally well covered Medieval businessmen s remarkable success in coping with this hostile new environment was a harvest of adversity that prepared the way for the economic expansion of the sixteenth century Two main themes run through this book First the force and direction of business development in this period stemmed primarily from the demands of the elite Second the lasting legacy of medieval businessmen was less their skillful adaptations of imported inventions than their brilliant innovations in business organization      **A Source Book for Medieval Economic History** Roy Clinton Cave,Herbert H. Coulson,1965      **An Economic History of Medieval Europe** Norman John Greville Pounds,2014-06-06 A clear and readable account of the development of the European economy and its infrastructure from the second century to 1500 Professor Pounds provides a balanced view of the many controversies within the subject and he has a particular gift for bringing a human dimension to its technicalities He deals with continental Europe as a whole including an unusually rich treatment of Eastern Europe For this welcome new edition the first in twenty years text and bibliography have been reworked and updated throughout and the book redesigned and reset      The Economic Development of Medieval Europe Robert Henri Bautier,1971      An Economic and Social History of Later Medieval Europe, 1000-1500 Steven A. Epstein,2009-04-27 This book examines the most important themes in European social and economic history from the beginning of growth around the year 1000 to the first wave of global exchange in the 1490s These five hundred years witnessed the rise of economic systems such as capitalism and the social theories that would have a profound influence on the rest of the world over the next five centuries The basic story the human search for food clothing and shelter in a world of violence and scarcity is a familiar one and the work and daily routines of ordinary women and men are the focus of this volume Surveying the full extent of Europe from east to west and north to south Steven Epstein illuminates family life economic and social thought war technologies and other major themes while giving equal attention to developments in trade crafts and agriculture The great waves of famine and then plague in the fourteenth century provide the centerpiece of a book that seeks to explain the causes of Europe s uneven prosperity and its response to catastrophic levels of death Epstein also sets social and economic developments within the context of the Christian culture and values that were common across

Europe and that were in constant tension with Muslims Jews and dissidents within its boundaries and the great Islamic and Tartar states on its frontier     The Medieval Near East Eliyahu Ashtor,1978     **Money and its Use in Medieval Europe** Peter Spufford,1989-09-21 This is a full scale study of the history of money not merely of coinage to have been written for medieval Europe The book is not limited to one country or to any one period or theme but extracts the most important elements for the historian across the broadest possible canvas Its scope extends from the mining of precious metals on the one hand to banking including the use of cheques and bills of exchange on the other Chapters are arranged chronologically rather than regionally or thematically and offer a detailed picture of the many and changing roles played by money in all its forms in all parts of Europe throughout the Middle Ages Thus money is seen as having differing values for differing parts of individual societies The book shows money moving and changing as a result of war and trade and other political economic and ecclesiastical activities without regard for national barriers or the supposed separation between East and West     **An Economic History of Medieval Europe** Norman J. G. Pounds,1983     Internal Colonization in Medieval Europe Felipe Fernandez-Armesto,James Muldoon,2017-05-15 Around the year 1000 Rodulfus Glaber described France as being in the throes of a building boom He may have been the first writer to perceive the early medieval period as a Dark Age that was ending to be replaced by a better world In the articles gathered here distinguished medieval historians discuss the ways in which this transformation took place European society was becoming more stable the climate was improving and the population increasing so that it was necessary to increase food production These circumstances in turn led to the cutting down of forests the draining of wetlands and the creation of pastures on higher elevations from which the glaciers had retreated New towns were established to serve as economic and administrative centers These developments were witness to the processes of internal colonization that helped create medieval Europe
