*The Cult of the Market* Lee Boldeman,2007-10-01 The Cult of the Market Economic Fundamentalism and its Discontents disputes the practical value of the shallow all encompassing dogmatic economic fundamentalism espoused by policy elites in recent public policy debates along with their gross simplifications and sacred rules Economics cannot provide a convincing overarching theory of government action or of social action more generally Furthermore mainstream economics fails to get to grips with the economic system as it actually operates It advocates a more overtly experimental eclectic and pragmatic approach to policy development which takes more seriously the complex interdependent evolving nature of society and the economy Importantly it is an outlook that recognises the pervasive influence of asymmetries of wealth power and information on bargaining power and prospects throughout society The book advocates a major reform of the teaching of economics Provided by publisher

**Social Economics: Retrospect and Prospect** Mark A. Lutz,2012-12-06 At the very heart of the conception of the present volume lies the conviction that social economics is a highly pluralistic discipline inspired and enriched by several often radically different world views Schumpeterian visions and at times even quite antagonistic social doctrines Yet in spite of all these differences social economists can nevertheless be seen and also approached as some kind of

economic brotherhood for various reasons dissatisfied with the austere value free diet offered by the pOSitivistic neoclassical paradigm What all social economists seem to have in common is a profound interest in values and the process of valuation in order to more fully understand both economic behavior and the possibilities of improving the economic system Such a distinguishing characteristic is also well articulated and enshrined in Article I of the Constitution of the Association of Social Economics where we are told that the aims and objectives of the Association shall be 1 To foster research and publication centered on the reciprocal relationship between economic science and broader questions of human dignity ethical values and social philosophy and to encourage the efforts of all scholars who are dedicated to exploring the ethical presuppositions and implications of economic science 2 To consider the personal and social dimensions of economic problems and to assist in the formulation of economic policies consistent with a concern for ethical values and pluralistic community and the demands of personal dignity
