Digital Transformation and the Economics of Banking Piotr Łasak,Jonathan Williams,2023-11-07 The book provides deep insight into the processes of digital transformation of banking according to economic institutional and social dimensions Together with the transformation of incumbent banks the processes result in changes in the scope of existing banking services Moreover new entities FinTech firms partner with incumbent banks and reshape the banking sector and its financial environment The far reaching transformation of banks and the banking sectors is accompanied by some institutional and socioeconomic processes

Regarding institutional processes the book provides insight into the digitalization of the banking sector from a legal point of view. Traditionally banking is strongly regulated by norms and rules and this status should be maintained when new entities are entering the sector and or when new technological solutions contribute to the provision of banking services. Regarding socioeconomic processes it must be highlighted that digitalization is exerting a powerful impact on societies. One significant example among others is the increase in the financial inclusion of disadvantaged groups especially customers either underserved by the traditional financial sector or unbanked. The socioeconomic aspect however has a much greater dimension and its selected aspects are described in this book. The principal audience of the book will be scholars in the fields of banking and finance but also other related disciplines in the social sciences that are of particular relevance to the banking sector's digital transformation. This includes legal science, management and psychology. The book also targets professionals in the financial industry interested in the impact of new financial technologies on banking sectors and bank services particularly with a main focus on legal and socioeconomic dimensions. Currency Interventions, Fluctuations and Economic Issues Lawrence C. Hilbert, 2007. A currency is a unit of exchange facilitating the transfer of goods and services. It is one form of money where money is anything that serves as a medium of exchange, a store of value and a standard of value. A currency zone is a country or region in which a specific currency is the dominant medium of exchange. To facilitate trade between currency zones there are exchange rates which are the prices at which currencies and the goods and services of individual currency zones can be exchanged against each other. Currencies can be classified as either floating currencies or fixed currencies based on their exchange rate regime. In common usage currency sometimes refers to only paper money as in coins and currency but this is misleading. Coins and paper money are both forms of currency. In most cases each country has monopoly control over the supply and production of its own currency. Member countries of the European Union's Economic and Monetary Union are a notable exception to this rule as they have c
