context noting especially the complex interaction of national and regional societies it shows how the constitution continues to morph and shape itself These changes are explored through key constitutional themes democracy parliamentarism the rule of law federalism human rights and Indigenous rights and describes the country that has resulted from the interplay of these themes Clarity of expression and explanation which never veers into simplicity combined with the author's expertise makes this the ideal starting point for the student or comparative lawyer keen to gain a strong understanding of how Canadian democracy and government works

The Multilevel Politics of Trade Jorg Broschek, Patrica Goff, 2020-04-02 The Multilevel Politics of Trade presents a timely comparative analysis of eight federations plus the European Union to explore why some sub federal actors have become more active in trade politics in recent years As the contributing authors find there is considerable variation in the intensity and modes of sub federal participation This they attribute to three key factors the distinctive institutional features of federal systems the nature and scope of trade policy and trade agreements and the extent of social mobilization that accompanies a particular trade policy conversation As a whole The Multilevel Politics of Trade argues that sub federal actors' interests jurisdictional political and economic are what motivate them to participate in trade debates However institutional configurations coupled with the influence of civil society actors political parties and others determine the nature and scope of that participation Informed by a deep knowledge of federal dynamics this volume provides extensive comparative analyses of all seven of the North American and European federations and represents a significant intervention into the study of both federalism and political economy

Rethinking Federalism Karen Knop, Sylvia Ostry, Richard Simeon, Katherine Swinton, 2011-11-01 Federalism is at once a set of institutions the division of public authority between two or more constitutionally defined orders of government and a set of ideas which underpin such institutions As an idea federalism points us to issues such as shared and divided sovereignty multiple loyalties and identities and governance through multi level institutions Seen in this more complex way federalism is deeply relevant to a wide range of issues facing contemporary societies Global forces economic and social are forcing a rethinking of the role of the central state with power and authority diffusing both downwards to local and state institutions and upwards to supranational bodies Economic restructuring is altering relationships within countries as well as the relationships of countries with each other At a societal level the recent growth of ethnic and regional nationalisms most dramatically in Eastern Europe and the former Soviet Union but also in many other countries in western Europe and North America is forcing a rethinking of the relationship between state and nation and of the meaning and content of citizenship Rethinking Federalism explores the power and relevance of federalism in the contemporary world and provides a wide ranging assessment of its strengths weaknesses and potential in a variety of contexts Interdisciplinary in its approach it brings together leading scholars from law economics sociology and political science many of whom draw on their own extensive involvement in the public policy process Among the contributors each writing with the authority of experience are Tommaso Padoa Schioppa and Jacques

Pelkmans on the European Union Paul Chartrand on Aboriginal rights Samuel Beer on North American federalism Alan Cairns on identity and Vsevolod Vasiliev on citizenship after the breakup of the Soviet Union The themes refracted through these different disciplines and political perspectives include nationalism minority protection representation and economic integration The message throughout this volume is that federalism is not enough rights protection and representation are also of fundamental importance in designing multi level governments **Canada-Japan** Institute for Research on Public Policy, Sōgō Kenkyū Kaihatsu Kikō (Japan), 1989 The papers in this volume were developed for an informal symposium held in Vancouver in April 1988 The papers range from descriptions of possible realigned world political orders to questions of international trade and domestic economic priorities and from the greying of the population of the industrial world and associated social policy issues such as health care and pensions to the imperative of implementing sustainable economic development worldwide
