just a way of denying art's social contexts its roots in the lives of its creators its political and ethical obligations *Fictions of Autonomy* argues that the concept of autonomy is on the contrary essential for understanding modernism historically Disputing the prevailing skepticism about autonomy Andrew Goldstone shows that the pursuit of relative independence within society is modernism's distinctive way of relating to its contexts Modernist autonomy is grounded in connections to servants and audiences aging bodies and wardrobe choices it joins T S Eliot to Adorno as exponents of late style and Djuna Barnes to Joyce as anti communal cosmopolitans *Autonomy* reveals new affinities across an expansive modernist field from Henry James and Proust to Stevens and de Man Drawing on Bourdieu's sociology formalist reading and historical contextualization this book shows autonomy's range and its limitations as a modernist mode of social practice Nothing less than an argument for a wholesale revision of the assumptions of modernist studies *Fictions of Autonomy* is also an intervention in literary theory This book shows why anyone interested in literary history the sociology of culture and aesthetics needs to take account of the social stylistic and political significance of the problem and the potential of autonomy
