Femenino Y El Pensamiento Complejo Lo:

El superyó en las mujeres Omar Mosquera, 2024-09-18 Este libro aborda el problema del supery en las mujeres desde los procesos que lo constituyen y los efectos eventualmente devastadores que genera en la subjetividad. Además propone desarrollos teóricos de gran interés para el psicoanálisis como para otras disciplinas porque en términos generales se inscribe en el contexto del debate del psicoanálisis con el feminismo al exponer un análisis crítico de eso que ha dado en llamarse identidad de género. Asimismo estamos en presencia de un estudio sociológico sobre la mujer que el psicoanálisis dice Omar Mosquera no sitúa como víctima sino como sujeto que toma como portavoz de un saber que la trasciende como sujeto de discurso donde radica su respuesta a la protesta inconsciente al desarreglo de la cultura. Con su habitual destreza en el manejo de la metapsicología freudiana articulada con la enseñanza de Lacan el autor despliega dos hipótesis que en buena medida le permiten elaborar la trama central del texto: el supery en femenino se constituye en un momento muy preciso del devenir mujer y además se lo considera un nombre del goce femenino cuando queda encarnado por el partenaire estrago. Entre otras cuestiones de actualidad cuenta con valiosos aportes para el abordaje de ciertas depresiones en las mujeres y de algunas problemáticas de los lazos amorosos relativos a la dramática de la violencia de género. A pesar de su importancia clínica el supery en las mujeres ha sido un tema escasamente valorado por los analistas de manera que la investigación que aquí se presenta asume el desafío de la originalidad. El autor sabe captar las fisuras del discurso freudiano para extraer una enseñanza tan precisa como esclarecedora al mismo tiempo que toma posición en el debate con los clínicos. Sin duda se trata de una obra que marca tendencia en el estudio de la subjetividad femenina en su relación con el goce y el amor. **Sexual**

Difference in Debate Leticia Glozier Fiorini, 2018-05-08 The greater part of this book focuses on a critical analysis of the logics and ways of thinking supporting both explicit and implicit theories of sexual difference and the masculine/feminine pair. These theories may be private or collective, conscious/preconscious or unconscious. They impact heavily on interpretations and constructions made in analytic practice while they also affect transference/countertransference patterns. This conceptual analysis reviews the Freudian oeuvre as well as the work of other significant authors post-Freudian and contemporary that have contributed specifically to this topic. The concept of sexual difference contains a persistent problem: binary/dichotomous thinking and its blind spots and aporias. For this reason the author has turned to other epistemologies that offer novel forms to think about the same problems such as the paradigm of hypercomplexity as well as thinking at intersections and limits between different categories. *Lo femenino y el pensamiento complejo* Leticia Glozier Fiorini, 2001 El debate sobre la diferencia sexual: las mujeres y lo femenino sigue presente en los comienzos del siglo XXI. Sujeto, deseo y feminismo son conceptos que no han logrado articulación en la modernidad. La autora aporta una visión contemporánea de estos temas desde el campo psicoanalítico y propone iluminar ciertas categorías clave a través del pensamiento de la complejidad. Las concepciones sobre el deseo y el amor, sobre la maternidad y la sexualidad femenina, los dilemas binarios, las relaciones de

poder formar parte de este volumen Gender, Identifications, and Identities Frances Thomson-Salo, Luca Bruno, Eva Reichelt, 2025-07-30 *Gender Identifications and Identities* considers the increasing visibility of sexual and gender diversity and reflects on how this is felt within psychoanalysis. The international contributors focus on identifications, gender and identity including gender and sexuality in psychic development as well as the link between identifications, body and gender. The book also considers how gender fluidity can be a challenge for approaching the coexistence of different states of the self as well as transference, countertransference experiences and implications working through and implications for theory and technique. It offers an opportunity to air conflicting psychoanalytic views and rethink established concepts. *Gender Identifications and Identities* will be key reading for psychoanalysts and psychotherapists in practice and in training. It will also be of interest to academics of psychoanalytic studies and gender studies.

Working Psychoanalytically with Gender Diversity and Sexualities Frances Thomson-Salo, Marco Posadas, Silvia R. Acosta, 2025-09-30 *Working Psychoanalytically with Gender Diversity and Sexualities* considers and challenges expectations about psychoanalytic work with LGBTQIA patients. The book is organised into three parts starting with a theoretical review which includes a discussion of the relevance of the Oedipus complex, resistance to infantile sexuality, the conquest of otherness and challenges in maintaining neutrality. Secondly, the contributors approach an ethical dimension with chapters describing different moments in the way in which psychoanalysts engage with ethical responsibility in the face of gender and sexual diversity. The third part of the book considers an ontological dimension that incorporates fluidity as a condition of the subject as an object of study and includes factors such as race and generational status, emergence of stigmas and a particular focus on the concept of helplessness. The contributors offer insight into countertransferential reactions and responses in clinical work ensuring that analysts can work with these patients without preconceptions standing in the way. Extending an opportunity to air conflicting psychoanalytic views and rethink established psychoanalytic concepts, this book will be key reading for psychoanalysts and psychotherapists in practice and in training. It will also be of interest to academics and students of psychoanalytic studies and gender studies.

The Desire and Passion for a Child Patricia Alkolombre, 2023-06-05 In this book Patricia Alkolombre explores the desire for a child from a contemporary psychoanalytic perspective and covers the questions raised in the face of new resources offered by reproductive medicine. This volume reviews traditional psychoanalytic conceptualisations from the perspective of gender theories and analyses theoretical hegemonies related to the desire and passion for a child. Alkolombre discusses how the passion to have a child is a key aspect of motherhood characterised by emotional intensity, persistence and self-sacrificial aspects. The book is divided into three sections. Part One deals with the desire and passion to have a child while Part Two focuses on the impact of reproductive techniques as well as the ever-changing role of parenthood in the modern day. Throughout these fascinating chapters, clinical vignettes of both individual and couple analyses span topics such as mourning, the use of reproductive technology, the anonymity of gamete donors, enigmatic infertility, surrogacy and abortion from an

interdisciplinary perspective The historical and cultural contexts of infertility are reviewed from a psychoanalytic angle in Part Three with the view of transcending the former androcentric perspective that has deeply influenced the maternal ideal and expectations of men Alkolombre also proposes a new analysis of the Oedipus myth This book is vital reading for psychoanalysts mental health professionals teachers and students interested in contemporary parenting motherhood and infertility as well as the theoretical analysis of the desire for a child

Psicoanálisis y género en diálogo Patricia Alkolombre, Graciela Cardó, Aurora Romano, 2023-09-26 La pregunta que Freud se hace en 1933 ¿quieren las mujeres estímulo que se contestara que la ideología patriarcal era el obstáculo para hallar finalmente la respuesta la mujer no quiere nada distinto de lo que quiere un hombre Cuando en realidad la reivindicación de igualdad debe tener en cuenta justamente algo bien diferente que es la ausencia y desconocimiento de la especificidad femenina algo sobre lo que aún estamos trabajando Emilce Dio Bleichmar Asociación Psicoanalítica Argentina IPA Es necesario recordar que desde fines del siglo XIX se está actualizando cada vez más una problemática que existe desde muy antiguo pero que está en vías de deconstrucción el lugar de las mujeres en la trama de lazos sociales Tanto las prácticas como los discursos sociales y legalidades culturales se están transformando a este respecto y esto se acompaña inevitablemente de revisiones de su conceptualización teórica La violencia de género así como las desigualdades sociales desafían los intentos de naturalización del lugar de las mujeres tanto desde las teorías como desde las experiencias cotidianas Leticia Glocer Fiorini Asociación Psicoanalítica Argentina IPA Existen sobradas evidencias acerca de lo mucho que se ha trabajado sobre la sexualidad y de lo poco que se le ha dedicado a la paternidad El tema de la paternidad ha quedado relegado empujado al lado del tema de la sexualidad a pesar de que es justamente en el nivel de la paternidad donde se han dado en las últimas décadas los cambios más vertiginosos a partir de las innovaciones en la distribución y atribución de obligaciones y derechos determinados por las diferencias sexuales Juan Carlos Volnovich Foro de Psicoanálisis y Género APBA

Polymorphisms Leticia Glocer Fiorini, Jean Marc Tauszik, Silvia R. Acosta, 2025-06-30 *Polymorphisms* presents an overview of key theories ideas and issues within psychoanalysis relating to sexual and gender diversity The chapters consider key topics including the Oedipus castration complex the link between sexuality and gender identity and gender violence while also addressing queer transgender subjectivities countertransference and the implicit and explicit theories that shape clinical practice Taking an intra and interdisciplinary approach the collection considers ideas that enrich the clinical approach while highlighting contradictions and heterogeneities and moving away from essentialisms As a whole the book delimits debates and questions rather than offering definitive answers taking the perspective that psychoanalysis is a discipline in continuous interrogation of its own propositions *Polymorphisms Sexual and Gender Migrations in Contemporary Psychoanalysis* will be essential reading for psychoanalysts and psychotherapists in practice and in training It will also be of interest to academics of psychoanalytic studies and gender studies

Changing Sexualities and Parental Functions in the Twenty-First Century Candida Se

Holovko,2018-03-26 Recent societal changes have challenged long established concepts in psychoanalysis including the Oedipus complex parental functions and male and female psychosexuality Postmodern families based on sexual and emotional exchanges independent of gender now include homoerotic couples who adopt children or who create them through assisted fertilisation as well as single parent families and blended families A number of highly renowned Latin American psychoanalysts have drawn attention to the urgency of revising theoretical and clinical concepts in the light of these new scenarios In this book they open up ideas which cover familiar territory of current concerns in psychoanalytic work as well as other little explored areas with the emphasis on evolving sexualities and new experiences of parenthood The first section revisits psychoanalytic theories particularly parental functions in the area of sexuality and gender The following section discusses new family configurations and vicissitudes of the desire to have a child in men and women with the authors presenting some psychic consequences for parents in therapy who have turned to assisted fertilisation On Freud's Femininity Graciela Abelin-Sas Rose,Leticia Glocer Fiorini,2018-03-29 In this book a group of contemporary psychoanalytic authors dedicated to studies on women and the feminine have been assembled with the objective of displaying points of concordance and discordance in relation to Freudian proposals Discourse on women has changed greatly since Freud's time It coincides with deep changes experienced by women and the feminine position at least in most of the Western world It is common knowledge that contraceptives assisted fertilization advances in women's rights growingly evident sublimational capacities and demonstrations of professional success have definitely changed ideas regarding an eternal and immutable feminine nature The authors are interested in illuminating ways in which these changes have or have not influenced psychoanalytic debate in relation to the feminine This implies renewing the question of what is authentically feminine and whether there is any essential truth concerning the feminine Studies on Femininity Mariam Alizade,2020-03-11 Studies on Femininity is the second volume in a unique series edited by the author for the Committee on Women and Psychoanalysis of the International Psychoanalytical Association Providing a forum for exploration and discussion of diverse issues relating to gender constructs sexuality and sexual identity the series brings together an internationally renowned group of contributors trained in the psychoanalytic tradition Studies on Femininity discusses gender roles femininity and motherhood The various stages in a woman's life adolescence adulthood and menopause are all examined In this volume the reader will find not only papers from different essentialist constructivist and culture based standpoints but will also note the existence of theoretical and clinical intersections where psychoanalysis borders on closely related disciplines *Women and Creativity* Frances Thomson-Salo,Laura Tognoli Pasquali,2018-05-08 This book addresses aspects of how creativity is viewed in psychoanalytic theory and worked with in the consulting room with particular reference to human generativity and the life cycle within the arts in the broadest sense and its workings in society and culture in the widest sense **Deconstructing the Feminine** Leticia Glocer Fiorini,2018-03-26 The guiding thread of this theoretical review is the illumination of the impasses of binary

thought and of the essentialist conceptions of women and the feminine In this trajectory the author's ongoing dialogue with Freud is connected with one aspect of his way of thinking multicentred and complex The text addresses questions relating to love sexual desire maternity beauty and the passing of time and highlights current debates concerning women the feminine and sexual difference as well as some controversial topics that have been discussed throughout the history of the psychoanalytic movement One of the most relevant subjects is the notion of feminine enigma and the conceptions of the feminine as the negative of the masculine which means going into the nature nurture debate as well as into considerations of the feminine seen as the other of the masculine The author points out that the notion of feminine enigma is a displacement of the enigmas inherent to the origins to the finite time of life the inevitability of death and to sexual difference Motherhood in the Twenty-First Century Mariam Alizade, 2020-06-16 Mothers in the twenty first century confront us both in clinical practice and in theory with fascinating challenges that to some extent subvert the traditional maternal ideal the motherhood of single women motherhood in which the mother child relationship seems minimal in the case of very busy working mothers teenage motherhood in which there is no true awareness of the maternal function motherhood in couples of homosexual women men who take upon themselves the maternal function men mothers complex motherhood by virtue of the multiple variants that have nowadays become possible thanks to new reproductive techniques shared motherhood surrogate motherhood sublimated motherhood and perverse motherhood **Un dolor sin sujeto** Juan Eduardo Tesone, 2023-05-23 El autor aborda los desafíos desde un psicoanálisis que se resaca a ser una reliquia Hay muchas causas del actual malestar del psicoanálisis Una de ellas es la divergencia entre lo que se hace con los pacientes y una producción escrita redundante en lugar de transmitir los cuestionamientos propios de la práctica Tesone repiensa la producción subjetiva a través de las vicisitudes pulsionales y su devenir identificadorio en un trayecto entre la indiscriminación la aceptación de la alteridad y el devenir Como producir un pensamiento rico que anclado en la clínica sea capaz de desafiar dogmatismos De qué manera abordar la complejidad del sujeto que oscila entre la redundancia y la imprevisibilidad entre la repetición y la novedad Estos interrogantes atraviesan este libro Es un libro que entusiasma porque se atreve a la apertura sustentada por la experiencia Un libro que dialoga Me ha hecho repensar nociones que creía definitivas De allí mi agradecimiento y mi recomendación Dr Luis Hornstein El autor destaca dos polos estructurantes de lo traumático la existencia del otro y la propia sexualidad La representación como base de la subjetividad y la creatividad inmersa en el dolor de ser Nadie cambia por el otro sino por los caminos de su propio deseo Enfatiza lo específico de lo Disruptivo lo Traumático y la Simbolización por medio del neologismo troumatique como un vacío de representación agujero negro del psiquismo Alerta acerca del exceso de ligadura como anttesis del caos base del cambio psíquico De lo fáctico que se le produce al cuerpo despliega la dinámica de las nuevas sexualidades realizando un minucioso recorrido por el sentido de la nada El psicoanálisis debe elaborar la tensión en los sexos del orden fálico con el orden nódico generando representaciones psíquicas idiosincrásicas superando el cisgénero producto del
