

A new life: the quest and the key...

Feminine Forever

by Robert A. Wilson, M.D.

A fully-documented discussion of one of medicine's most revolutionary breakthroughs—the discovery that *menopause is a hormone deficiency disease, curable and totally preventable*, and that every woman, no matter what her age, can safely live a fully-sexed life for her entire life.

With a bibliography of Dr. Wilson's findings as reported in The Journal of the American Medical Association, the Western Journal of Surgery, Obstetrics and Gynecology, the Journal of the American Geriatrics Society, and other professional publications; as well as corroborating reports by other medical researchers.

Feminine Forever Robert A. Wilson, 1966

The Pursuit of Perfection Sheila Rothman, David Rothman, 2011-04-06

What does it mean to live in a time when medical science can not only cure the human body but also reshape it? How should we as individuals and as a society respond to new drugs and genetic technologies? Sheila and David Rothman address these questions with a singular blend of history and analysis, taking us behind the scenes to explain how scientific research, medical practice, drug company policies, and a quest for peak performance combine to exaggerate potential benefits and minimize risks. They present a fascinating and factual story from the rise of estrogen and testosterone use in the 1920s and 1930s to the frenzy around liposuction and growth hormone to the latest research into the genetics of aging. The Rothmans reveal what happens when physicians view patients' unhappiness and dissatisfaction with their bodies—short stature, thunder thighs, aging as though they were diseases—to be treated. *The Pursuit of Perfection* takes us from the early days of endocrinology, the belief that you are your hormones, to today's frontier of genetic enhancements, the idea that you are your genes. It lays bare the always complicated and sometimes compromised positions of science, medicine, and commerce. This is the book to read before signing on for the latest medical fix.

Hot and Bothered Judith A. Houck, Judith A. Houck, 2009-06-30 How did menopause change from being a natural and often welcome end to a woman's childbearing years to a deficiency disease in need of medical and pharmacological intervention? By examining the history of menopause over the course of the twentieth century, Houck shows how the experience and representation of menopause has been profoundly influenced by biomedical developments and by changing roles for women and the changing definition of womanhood.

Reputation and Power Daniel Carpenter, 2014-04-24 How did the FDA become the world's most powerful regulatory agency? The U.S. Food and Drug Administration is the most powerful regulatory agency in the world. How did the FDA become so influential? And how exactly does it wield its extraordinary power? *Reputation and Power* traces the history of FDA regulation of pharmaceuticals, revealing how the agency's organizational reputation has been the primary source of its power yet also one of its ultimate constraints. Daniel Carpenter describes how the FDA cultivated a reputation for competence and vigilance throughout the last century and how this organizational image has enabled the agency to regulate an industry as powerful as American pharmaceuticals while resisting efforts to curb its own authority. Carpenter explains how the FDA's reputation and power have played out among committees in Congress and with drug companies, advocacy groups, the media, research hospitals, and universities, and governments in Europe and India. He shows how FDA regulatory power has influenced the way that business, medicine, and science are conducted in the United States and worldwide. Along the way, Carpenter offers new insights into the therapeutic revolution of the 1940s and 1950s, the 1980s AIDS crisis, the advent of oral contraceptives and cancer chemotherapy, the rise of antiregulatory conservatism, and the FDA's waning influence in drug regulation today. *Reputation and Power* demonstrates how reputation shapes the power and behavior of government agencies and sheds new light on how that power is used and

The Greatest Experiment Ever Performed on Women Barbara Seaman, 2011-01-04. With the ardent tone of a close friend, Barbara Seaman draws on forty years of journalistic research to expose the menopause industry and shows how estrogen therapy often causes more problems, including breast cancer, heart attack, and stroke, than it cures. *The Greatest Experiment Ever Performed on Women* tracks the well-intentioned discovery of synthetic estrogen through the unconscionable and misleading promotion of a dangerous drug.

The Hormone Decision Tara Parker-Pope, 2008-03-25. Discusses the benefits and risks of hormone replacement therapy while considering current debates to identify where both the scientific community and the media have misreported research findings.

Feminine Forever Robert A. Wilson, 1966. **Age, Gender and Sexuality through the Life Course** Susan Pickard, 2018-04-19. *Age, Gender and Sexuality through the Life Course* argues that the gendered structure of temporality defined in the dual sense of everyday time as well as age and stage of life is a key factor underpinning the stalling of the gender revolution. Taking as its central focus the idealised young woman who serves as the mascot of contemporary success, this book demonstrates how the celebration of the Girl is i) representative of social mobility, educational and professional achievement; ii) possesses diligence, docility, and emotional intelligence; and iii) displays a reassuring sexuality and youthfulness, but is constructed from the outset to have a fleetingly short life span. Pickard undertakes a theoretical and empirical exploration of the contemporary female experience of education, work, motherhood, sexuality, the challenge of having it all. Furthermore, through additional analysis of the transitional reproductive regime from youth into mid-life and beyond, this insightful monograph aims to demonstrate how age and time set very clear limits to what is possible and desirable for the female self, yet how the latter factors also, if used reflexively, can provide the key means of resisting and challenging patriarchy. This book is aimed at a broad interdisciplinary audience located in gender studies, age studies, culture studies.
