## **Feminism Animals And Science:**

**Feminism, Animals, and Science** Lynda I. A. Birke, 1994 What we think other animals are matters to how we see ourselves how similar are they or how different Do humans belong to culture and animals or women to nature For feminists that matters particularly for it has so often been animal names that have been used to derogate women This book explores these boundaries focusing particularly on feminist analyses of science science not only uses animals but also names and defines them Beginning with some ways in which animals are defined and with feminist concerns about non humans as fellow sufferers the book goes on to look at how ideas about animals are constructed in different areas of biological science and how these intersect with feminist critiques of modern science *Feminism, Animals, and Science* Lynda I. A. Birke, 1994 What we think other animals are matters to how we see ourselves how similar are they or how different Do humans belong to culture and animals or women to nature For feminists that matters particularly for it has so often been animal names that have been used to derogate women This book explores these boundaries focusing particularly on feminist analyses of science science not only uses animals but also names and defines them Beginning with some ways in which animals are defined and with feminist concerns about non humans as fellow sufferers the book goes on to look at how ideas about animals are constructed in different areas of biological science and how these intersect with feminist critiques of modern science

**Animals and Women** Carol J. Adams, Josephine Donovan, 1995-11-14 Animals and Women is a collection of pioneering essays that explores the theoretical connections between feminism and animal defense Offering a feminist perspective on the status of animals this unique volume argues persuasively that both the social construction and oppressions of women are inextricably connected to the ways in which we comprehend and abuse other species Furthermore it demonstrates that such a focus does not distract from the struggle for women's rights but rather contributes to it This wide ranging multidisciplinary anthology presents original material from scholars in a variety of fields as well as a rare early article by Virginia Woolf Exploring the leading edge of the species gender boundary it addresses such issues as the relationship between abortion rights and animal rights the connection between woman battering and animal abuse and the speciesist basis for much sexist language Also considered are the ways in which animals have been regarded by science literature and the environmentalist movement A striking meditation on women and wolves is presented as is an examination of sexual harassment and the taxonomy of hunters and hunting Finally this compelling collection suggests that the subordination and degradation of women is a prototype for other forms of abuse and that to deny this connection is to participate in the continued mistreatment of animals and women *Science, Gender and the Exploitation of Animals in Britain Since 1945* Catherine Duxbury, 2021-09-30 This book offers an historical analysis of the culture of animal dependent science in Britain from 1945 to the present exploring key areas of animal experimentation such as warfare medical science and law from a gendered perspective Questioning the nature of knowledge production in this area and how animal experimentation intersects with

broader cultural norms and values concerning sex and gender it examines the impact of contemporary forms of capitalism on animal dependent science its historical trajectory and gendered configuration With close attention to the broad social context from the creation of the Welfare State and the loss of Empire to the emergence of neoliberalism in the 1980s and its present day omnipotent manifestation the author asks how animal experimentation and the use of nonhuman animals in specific areas of science is gendered and has implications for women Drawing on a variety of sociological philosophical feminist and historical theories and engaging with a wealth of primary and secondary materials of scientific research of the time *Science Gender and the Exploitation of Animals in Britain Since 1945* contends that there is a persistent gendered ideology of animal use which remains inscribed within the policies of the British neoliberal state As such it will appeal to scholars of sociology history and philosophy with interests in gender and the treatment of nonhuman animals

*Ecofeminism: Feminist Intersections with Other Animals and the Earth* Carol J. Adams, Lori Gruen, 2014-07-31 This book first offers an historical overview that situates ecofeminist theory and activism and provides a timeline for important publications and events This is followed by contributions from theorists and activists on how our emotions and embodiment can and must inform our relationships with the more than human world In the final section the contributors explore the complexities of appreciating difference and the possibilities of living less violently Throughout the book the authors engage with intersections of gender and gender non conformity race sexuality disability and species

*Feminism and the Biological Body* Lynda Birke, 2019-06-01 Biological bodies always seem to drop out of debates about the body and its importance in western culture They are assumed to be fixed their workings irrelevant to theory This text argues that these views of biology do not serve feminist politics well

*Has Feminism Changed Science?* Londa Schiebinger, 2001-04-02 This book is a history of women in science and an assessment of the role of gender in shaping scientific knowledge Schiebinger considers the lives of women scientists past and present and debunks the myth that women scientists because they are women are somehow more holistic and integrative and create more cooperative scientific communities

**Encyclopedia of Feminist Theories** Lorraine Code, 2002-06-01 The path breaking Encyclopedia of Feminist Theories is an accessible multidisciplinary insight into the complex field of feminist thought The Encyclopedia contains over 500 authoritative entries commissioned from an international team of contributors and includes clear concise and provocative explanations of key themes and ideas Each entry contains cross references and a bibliographic guide to further reading over 50 biographical entries provide readers with a sense of how the theories they encounter have developed out of the lives and situations of their authors

**The Feminist Care Tradition in Animal Ethics** Josephine Donovan, Carol J. Adams, 2007 In *Beyond Animal Rights* Josephine Donovan and Carol J Adams introduced feminist ethic of care theory into philosophical discussions of the treatment of animals In this new volume seven essays from *Beyond Animal Rights* are joined by nine new articles most of which were written in response to that book and a new introduction that situates feminist animal care theory within feminist theory and

the larger debate over animal rights Contributors critique theorists reliance on natural rights doctrine and utilitarianism which they suggest have a masculine bias They argue for ethical attentiveness and sympathy in our relationships with animals and propose a link between the continuing subjugation of women and the human domination of nature Beginning with the earliest articulation of the idea in the mid 1980s and continuing to the theory s most recent revisions this volume presents the most complete portrait of the evolution of the feminist care tradition **Animals and Women** Carol J. Adams, Josephine Donovan, 1995-11-14 *Animals and Women* is a collection of pioneering essays that explores the theoretical connections between feminism and animal defense Offering a feminist perspective on the status of animals this unique volume argues persuasively that both the social construction and oppressions of women are inextricably connected to the ways in which we comprehend and abuse other species Furthermore it demonstrates that such a focus does not distract from the struggle for women s rights but rather contributes to it This wide ranging multidisciplinary anthology presents original material from scholars in a variety of fields as well as a rare early article by Virginia Woolf Exploring the leading edge of the species gender boundary it addresses such issues as the relationship between abortion rights and animal rights the connection between woman battering and animal abuse and the speciesist basis for much sexist language Also considered are the ways in which animals have been regarded by science literature and the environmentalist movement A striking meditation on women and wolves is presented as is an examination of sexual harassment and the taxonomy of hunters and hunting Finally this compelling collection suggests that the subordination and degradation of women is a prototype for other forms of abuse and that to deny this connection is to participate in the continued mistreatment of animals and women

*Debates in Nordic Gender Studies* Cecilia Asberg, Malin Ronnblom, 2016-03-22 Celebrating more than two decades of feminist theory and gender research this book provides an essential overview of current theoretical positions hot topics and state of the art perspectives in the field of Nordic Gender Studies an area currently facing the challenges of internationalization and destabilized well fare states intersectionality materiality and academic transformation Forming an overview the introductory texts collected here are intended for Nordic and international students and teachers specializing in gender studies or related areas of interdisciplinary humanities and social sciences With vibrant contributions from Nordic and international key scholars think pieces and position papers culled from NORA Nordic Journal of Feminist and Gender Research are in fact essential reading for anyone in need of accessible yet condensed guidance on key discussion points such as post constructionism and new materialism neo liberal academia and interdisciplinarity and the role of critical gender theory and posthumanism The volume also looks at the differences within Nordic Gender Studies of today This book is made up of material that was previously published in various issues of NORA Nordic Journal of Feminist and Gender Research

**Feminism and Ancient Philosophy** Julie K. Ward, 1996 This book studies the representation of women in the philosophy of Plato and Aristotle and considers the effect on feminism **Writing About Animals in the Age of**

**Revolution** Jane Spencer, 2020-06-10 What did British people in the late eighteenth century think and feel about their relationship to nonhuman animals This book shows how an appreciation of human animal similarity and a literature of compassion for animals developed in the same years during which radical thinkers were first basing political demands on the concept of natural and universal human rights Some people began to conceptualise animal rights as an extension of the rights of man and woman But because oppressed people had to insist on their own separation from animals in order to claim the right to a full share in human privileges the relationship between human and animal rights was fraught and complex This book examines that relationship in chapters covering the abolition movement early feminism and the political reform movement Donkeys pigs apes and many other literary animals became central metaphors within political discourse fought over in the struggle for rights and freedoms while at the same time more and more writers became interested in exploring the experiences of animals themselves We learn how children's writers pioneered narrative techniques for representing animal subjectivity and how the anti cruelty campaign of the early 1800s drew on the legacy of 1790s radicalism Coleridge Wordsworth Clare Southey Blake Wollstonecraft Equiano Dorothy Kilner Thomas Spence Mary Hays Ignatius Sancho Anna Letitia Barbauld John Oswald John Lawrence and Thomas Erskine are just a few of the writers considered Along with other canonical and non canonical writers of many disciplines they placed nonhuman animals at the heart of British literature in the age of the French Revolution

**The Rise of Critical Animal Studies** Nik Taylor, Richard Twine, 2014-04-16 As the scholarly and interdisciplinary study of human animal relations becomes crucial to the urgent questions of our time notably in relation to environmental crisis this collection explores the inner tensions within the relatively new and broad field of animal studies This provides a platform for the latest critical thinking on the condition and experience of animals The volume is structured around four sections engaging theory doing critical animal studies critical animal studies and anti capitalism contesting the human liberating the animal veganism and activism The Rise of Critical Animal Studies demonstrates the centrality of the contribution of critical animal studies to vitally important contemporary debates and considers future directions for the field This edited collection will be useful for students and scholars of sociology gender studies psychology geography and social work

**Common Science?** Jean Barr, Lynda I. A. Birke, 1998 Authors Jean Barr and Lynda Birke explore the relationship of women and minorities to scientific knowledge In academia scientific fields remain largely an elitist masculine domain The authors here survey the wide range of initiatives designed to encourage the entry of women and minorities into scientific training

**Confronting Cruelty** Lyle Munro, 2005-03-01 Why and how do people campaign on behalf of a species that is not their own Responses to this question provide important insights into the much misunderstood animal rights movement and the people in it who challenge the moral orthodoxy that underpins our attitudes towards nonhuman animals The norm of moderate concern for animals that animals matter albeit less than humans permits the ab use of animals in vivisection factory farming bloodsports and other contexts where animals suffer Social movement theory is

used to show how animal rights activists are engaged in the social construction of cruelty as a social problem which they seek to prevent by their intellectual practical and emotion work in seminal campaigns against cruelty in the United States England and Australia

**Animal Subjects 2.0** Jodey Castricano, Lauren Corman, 2016-12-10 *Animal Subjects* An Ethical Reader in a Posthuman World WLU Press 2008 challenged cultural studies to include nonhuman animals within its purview While the question of the animal ricochets across the academy and reverberates within the public sphere *Animal Subjects 2 0* builds on the previous book and takes stock of this explosive turn It focuses on both critical animal studies and posthumanism two intertwining conversations that ask us to reconsider common sense understandings of other animals and what it means to be human This collection demonstrates that many pressing contemporary social problems how and why the oppression and exploitation of our species persist are entangled with our treatment of other animals and the environment Decades into the interrogation of our ethical and political responsibilities toward other animals fissures within the academy deepen as the interest in animal ethics and politics proliferates Although ideological fault lines have inspired important debates about how to address the very material concerns informing these theoretical discussions *Animal Subjects 2 0* brings together divergent voices to suggest how to foster richer human animal relations and to cultivate new ways of thinking and being with the rest of animalkind This collection demonstrates that appreciation of difference not just similarity is necessary for a more inclusive and compassionate world Linking issues of gender disability culture race and sexuality into species *Animal Subjects 2 0* maps vibrant developments in the emergent fields of critical animal studies and posthumanist thought Teaching the Animal ,

*The Routledge Companion to Science Fiction* Adam Roberts, 2009-03-30 *The Routledge Companion to Science Fiction* is a comprehensive overview of the history and study of science fiction It outlines major writers movements and texts in the genre established critical approaches and areas for future study Fifty six entries by a team of renowned international contributors are divided into four parts which look in turn at history an integrated chronological narrative of the genre s development theory detailed accounts of major theoretical approaches including feminism Marxism psychoanalysis cultural studies postcolonialism posthumanism and utopian studies issues and challenges anticipates future directions for study in areas as diverse as science studies music design environmentalism ethics and alterity subgenres a prismatic view of the genre tracing themes and developments within specific subgenres Bringing into dialogue the many perspectives on the genre *The Routledge Companion to Science Fiction* is essential reading for anyone interested in the history and the future of science fiction and the way it is taught and studied Feminism in Twentieth-Century Science, Technology, and Medicine Angela N. H. Creager, Elizabeth Lunbeck, Londa Schiebinger, 2001-11 What useful changes has feminism brought to science Feminists have enjoyed success in their efforts to open many fields to women as participants But the effects of feminism have not been restricted to altering employment and professional opportunities for women The essays in this volume explore how feminist theory has had a direct impact on research in the biological and social sciences in medicine and in technology often providing

the impetus for fundamentally changing the theoretical underpinnings and practices of such research In archaeology evidence of women s hunting activities suggested by spears found in women s graves is no longer dismissed computer scientists have used feminist epistemologies for rethinking the human interface problems of our growing reliance on computers Attention to women s movements often tends to reinforce a presumption that feminism changes institutions through critique from without This volume reveals the potent but not always visible transformations feminism has brought to science technology and medicine from within Contributors Ruth Schwartz Cowan Linda Marie Fedigan Scott Gilbert Evelyn M Hammonds Evelyn Fox Keller Pamela E Mack Michael S Mahoney Emily Martin Ruth Oldenziel Nelly Oudshoorn Carroll Pursell Karen Rader Alison Wylie
