Feminist Therapy Laura S. Brown, 2018 Feminist therapy came into existence toward the end of the 1960s Feminist practice is psychology derived from the realities that lie outside beneath and at variance from the visions of the dominant patriarchal mainstream It is an integrative and competency based paradigm that perceives human beings as responsive to the problems of their lives capable of solving those problems and desirous of change It is also a politically informed model that observes human experience within the framework of societal and cultural realities and through the dynamics of power informing those realities This book represents an attempt to synthesize feminist therapy's heritage and roots theory and modes of practice as they stand in the early 21st century The model of feminist therapy described in this book is strongly influenced by multicultural and global feminism and by the politics of the social justice movements of feminism multi culturalism and other similar movements working to transform society Feminist therapy and feminist therapists face the next eight decades of the 21st century wondering how transformations of our understandings of sex and gender of power and relationships and of the social and political context of therapy will transform our practice As a model for psychotherapy feminist therapy continues to offer the concept that psychotherapy can and should be liberatory and that liberation is not simply a freedom from distress but a move toward the power of being able to know and name one's experiences of oppression as well as those of joy
