Social Work Theory and Ethics Dorothee Hölscher, Richard Hugman, Donna McAuliffe, 2023-03-17 This reference work addresses the ideas that shape social work Much of the social work literature addresses questions of theory and ethics separately so that the body of thought that is represented in social work scholarship and research creates a distinction between them However the differences between these categories of thought can be somewhat arbitrary This volume goes beyond this simple separation of categories Although it recognises that questions of theory and ethics may be addressed distinctly the connections between them can be made evident and drawn out by analysing them alongside each other Social work's use and development of theory can be understood in two complementary ways First theory from the social sciences and other disciplines can be applied for social work second considered systematic examinations of practice have enabled theory to be developed out of social work These different approaches are usually referred to as theory for practice and practice theory The advancement of social work theory occurs often through the interplay between these two dimensions through research and scholarship in the field Similarly social work ethics draw on principles and concepts that have their roots in philosophical inquiry and also involve applied analysis in the particular issues with which social workers engage and their practices in doing so In this way social work contributes to wider debates through advancement of its own perspectives and knowledge gained through practice *Social Work Theory and Ethics: Ideas in Practice* offers a unique approach by bringing together the complementary dimensions of theory with each other and at the same time with ethical research and scholarship It presents an analysis of the ideas of social work in a way that enables connections between them to be identified and explored This reference is essential reading for social work practitioners researchers policy makers academics and students as well as an invaluable resource for universities research institutes

Welfare Research Fiona William,Jennie Popay,Ann Oakley,2005-08-12 First published in 1998 This book attempts to contribute a new framework for social research in the welfare field As such it engages with new theories new approaches and new methods alongside a constructive critique of both the old and the new It attempts to illustrate approaches to conceptualization and operationalization within policy relevant research to reflect and explore both new thinking in social theory and in welfare policy as well as to maintain a connection with old concerns Our concern is with welfare research both theory and method broadly defined as the wider landscape of policy and provision captured in the past at least by the notion of the welfare state The new thinking with which the book is primarily concerned involves a shift away from seeing people as the passive beneficiaries of welfare provided through state interventions and professional expertise and from seeing them as fixed single social categories of poor old single parent or as one dimensional objective socio economic classifications

Negotiating the Disabled Body Anna Rebecca Solevåg,2018-10-29 An intersectional study of New Testament and noncanonical literature Anna Rebecca Solevåg explores how nonnormative bodies are presented in early Christian literature through the lens of disability studies In a number of case studies Solevåg shows how early Christians struggled to come to terms with issues relating to body health and disability in the gospel stories apocryphal narratives Pauline letters and patristic expositions Solevåg uses the concepts of narrative prosthesis gaze and stare stigma monster theory and crip theory to examine early Christian material to reveal the multiple polyphonous contradictory ways in which nonnormative bodies appear Features Case studies that reveal a variety of understandings attitudes medical frameworks and taxonomies for how disabled bodies were interpreted A methodology that uses disability as an analytical tool that contributes insights about cultural categories ideas of otherness and social groups access to or lack of power An intersectional perspective drawing on feminist gender queer race class and postcolonial studies

how the social is organized Starting from experience is a central step in challenging taken for granted assumptions and relations of power whilst responding critically to the neoliberal cost benefit ideology that has come to permeate welfare institutions and the research sector This book explicates the Nordic response to institutional ethnography showing how it has been adapted and interpreted within the theoretical and methodological landscape of social scientific research in the region as well as the institutional particularities of the Nordic welfare state Addressing the main topics of concern in the Nordic context together with the way in which research is undertaken the authors show how institutional ethnography is combined with different theories and methodologies in order to address particular problematics as well as examining its standing in relation to contemporary research policy and university reforms With both theoretical and empirical chapters this book will appeal to scholars and students of sociology professional studies and anthropology with interests in research methods and the Nordic region

Social Work with Children and Families Steve Rogowski, 2016-04-20 Professional social work has changed considerably over the last forty years coinciding with the demise of the social democratic consensus of the post war years and the emergence and now domination of neoliberalism Rather than the state through the government of the day ensuring citizens basic needs were met via the welfare state the belief in free market economics entails people having to be self reliant and self responsible This has involved social work with children and families moving from a helping and supportive role to one that is more authoritarian this often involving telling parents to change their behaviour and lifestyle or face the consequences This book outlines the development of social work with children and families over the period in question drawing on the author s unique practice experience and his extensive writings It charts the highs and lows of social work the latter including the dominance of managerialism which emphasises speedy completion of bureaucracy so as to ration resources and assess manage risk Despite this the argument is for a critical practice which addresses service users immediate needs while simultaneously aiming towards a more socially just and equal society This book is essential reading for everyone interested in social work including academics students practitioners and managers both in the UK and overseas Social care and allied professionals more generally will also find it insightful as will academics students and educators of social policy and related disciplines
