Feminist Contentions Nancy Fraser, 2017-08-02 First published in 1995 This volume presents a debate between four of the top feminist theorists in the United States Seyla Benhabib Judith Butler Drucilla Cornell and Nancy Fraser discuss some of the key questions facing feminist theory Each articulates her own position in an initial essay then responds to the others in a follow up essay making possible a conversation between these influential feminist thinkers Begun as a symposium on the issue of feminism and postmodernism the volume evolved into a discussion of broader issues such as the usefulness of postmodernism as a theoretical concept the role of philosophy in social criticism how historical narrative is best conceptualized the status of the subject of feminism and the political effects of different formulations of all these issues Unlike many collections which assume a given topic and ask various thinkers to respond to it this format enables the contributors themselves to articulate their own views on the key questions facing feminist theory and distinguish their views from others

Feminist Ethics and Natural Law Cristina L. H. Traina, 1999-04-28 Heated debates over such issues as abortion contraception ordination and Church hierarchy suggest that feminist and natural law ethics are diametrically opposed Cristina L H Traina now reexamines both Roman Catholic natural law tradition and Anglo American feminist ethics and reconciles the two positions by showing how some of their aims and assumptions complement one another After carefully scrutinizing Aquinas's moral theology she analyzes trends in both contemporary feminist ethics theological as well as secular and twentieth century Roman Catholic moral theology Although feminist ethics reject many of the methods and conclusions of the scholastic and revisionist natural law schools Traina shows that a truly Thomistic natural law ethic nonetheless provides a much needed holistic foundation for contemporary feminist ethics On the other hand she offers new perspectives on the writings of Josef Fuchs Richard McCormick and Gustavo Gutierrez arguing that their failure to catch the full spirit of Thomas's moral vision is due to inadequate attention to feminist critical methods This highly original book proposes an innovative union of two supposedly antagonistic schools of thought a new feminist natural law that would yield more comprehensive moral analysis than either existing tradition alone This is a provocative book not only for students of moral theology but also for feminists who may object to the very notion of natural law ethics suggesting how each might find insight in an unlikely place

Continental Feminism Reader Ann J. Cahill, Jennifer Hansen, 2003 In an era of backlash and supposed stagnation feminist philosophers are still providing fresh and challenging perspectives you just have to know where to look Continental feminist theory continues to address pressing questions of equality and difference identity and subjectivity Modern thinkers like Judith Butler Kelly Oliver and Drucilla Cornell give strikingly new perspectives on sex gender sexual politics and the various social reasons for gender inequality Yet

their theories are not always well received Continental Feminism Reader responds to the marginalization of these thinkers and others like them In this volume Ann J Cahill and Jennifer Hansen collect the most groundbreaking recent work in Continental Feminist Theory introducing and explaining pieces that are often mystifying to those outside the field and outside academia With these essays Continental Feminism Reader begins the process of reanimating feminist politics through the critical tools of its contributors

Handbook of Feminist Research Sharlene Nagy Hesse-Biber, 2012 The second edition of the Handbook of Feminist Research Theory and Praxis presents both a theoretical and practical approach to conducting social science research on for and about women The Handbook enables readers to develop an understanding of feminist research by introducing a range of feminist epistemologies methodologies and methods that have had a significant impact on feminist research practice and women s studies scholarship The Handbook continues to provide a set of clearly defined research concepts that are devoid of as much technical language as possible It continues to engage readers with cutting edge debates in the field as well as the practical applications and issues for those whose research affects social policy and social change It also expands on the wealth of interdisciplinary understanding of feminist research praxis that is grounded in a tight link between epistemology methodology and method The second edition of this Handbook will provide researchers with the tools for excavating subjugated knowledge on women s lives and the lives of other marginalized groups with the goals of empowerment and social change

Feminist Perspectives on Family Law Alison Diduck, Katherine O'Donovan, 2007-03-12 Examining specific areas of family law from a feminist perspective this book assesses the impact that feminism has had upon family law It is deliberately broad in scope as it takes the view that family law cannot be defined in a traditional way In addition to issues of long standing concern for feminists it explores issues of current legal and political preoccupation such as civil partnerships home sharing reproductive technologies and new initiatives in regulating family practices through criminal law including domestic violence and youth justice

The Feminine Subject Susan J. Hekman, 2014-11-11 In 1949 Simone de Beauvoir asked What does it mean to be a woman Her answer to that question inaugurated a radical transformation of the meaning of woman that defined the direction of subsequent feminist theory What Beauvoir discovered is that it is impossible to define woman as an equal human being in our philosophical and political tradition Her effort to redefine woman outside these parameters set feminist theory on a path of radical transformation The feminist theorists who wrote in the wake of Beauvoir s work followed that path Susan Hekman s original and highly engaging new book traces the evolution of woman from Beauvoir to the present In a comprehensive synthesis of a number of feminist theorists she covers French feminist thinkers Luce Irigaray and Helene Cixous as well as theorists such as Carol Gilligan Carole Pateman and Judith Butler The book examines the relational self feminist liberalism and Marxism as well as feminist theories of race and ethnicity radical feminism postmodern feminism and material feminism Hekman argues that the effort to redefine woman in the course of

feminist theory is a cumulative process in which each approach builds on that which has gone before Although they have approached woman from different perspectives feminist theorists has moved beyond the negative definition of our tradition to a new concept that continues to evolve The Feminine Subject is a remarkably succinct yet wide ranging analysis which will appeal to all feminist scholars and students as well as anyone interested in the changing nature of feminism since the 1950s

EBOOK: Doing Collective Biography Bronwyn Davies,Susanne Gannon,2006-08-16 At last a book that not only describes what collective biography is but also explains how to use it The book describes how to set up collective biography workshops in which participants examine how discursive structures and power relations have both enabled and limited the conditions of possibility for their lived experience Focusing on a more complicated reflexivity than is usually described in social science research collective biography inspired by Frigga Haug and refined by Davies will no doubt be used increasingly by researchers interested in the production of subjects in a postmodern world Elizabeth Adams St Pierre University of Georgia USA This book introduces the reader to collective biography an innovative research methodology for use in education and the social sciences The methodology of collective biography overcomes the theory practice divide by putting theory to use in everyday life and using everyday life to understand and to extend theory Doing Collective Biography provides guidelines for developing a collective biography project and demonstrates how these guidelines emerged from and were shaped by projects on such topics as subjectivity power agency reflexivity literacy gender and neoliberalism at work Each chapter gives a detailed example of collective biography in practice showing how a group of students and or scholars can work collaboratively to investigate aspects of the production of subjectivity and clearly demonstrates how poststructural theory can be elaborated and refracted through the experiences of ordinary everyday life This is key reading for undergraduate and postgraduate students on Education and social science courses with a research element as well as for academics and professionals undertaking research projects

Subjectivity After Wittgenstein Chantal Bax,2011-03-31 Although Wittgenstein is often held co responsible for the so called death of man as it was pronounced in the course of the previous century no detailed description of his alternative to the traditional or Cartesian account of human being has so far been available By consulting several parts of Wittgenstein s later oeuvre Subjectivity after Wittgenstein aims to fill this gap However it also contributes to the debate about the Cartesian subject and its demise by discussing the criticism that the rethinking of subjectivity received for it has been argued that the anti Cartesian turn in continental philosophy has lead to a loss of a centre for both ethics and politics By further exploring the implications of the Wittgensteinian account of human being this book makes it clear that a non Cartesian view on the subject is not necessarily ethically and politically inert Moreover it argues that ethical and political arguments should not automatically take precedence in a debate about the nature of man
