Contested Concepts in Gender and Social Politics Barbara Hobson, Jane Lewis, Birte Siim, 2002-01-01 This text challenges mainstream thinking on welfare states citizenship family work and social policy. It analyses the corresponding shifts in political discourse and the changes in socio political configurations that mirror changing gender relations. **Why Women Rebel** Alexis Henshaw, 2016-12-08 *Why Women Rebel* presents a global analysis of the extent to which women are engaged in armed organized rebellions and why they choose to join such rebellions. Henshaw has collected and analyzed data on women's participation in over 70 post Cold War rebel groups. The book provides a theoretical analysis drawing upon both mainstream literature in the social sciences and critical feminist inquiry on women and political violence to offer a new gendered theory on why women rebel. The book reveals that women are active in over half of all rebel groups sampled and that while the majority of rebel groups have women serving in support roles away from direct combat approximately a third of these groups employ women in the conduct of armed attacks and just over a quarter have women in a leadership capacity. Henshaw reaffirms the idea that women are more likely to be engaged in left wing political organizations but does suggest that more conservative or traditional movements may also successfully incorporate women by appealing to concerns about community rights. Addressing several gaps in the current literature on this topic this book will be of interest to academics in the fields of political science international relations security studies and gender and women's studies.
