Feminist Perspectives in Philosophy Morwenna Griffiths, Margaret Whitford, 1988-02-19 **New Feminist Perspectives on Embodiment** Clara Fischer, Luna Dolezal, 2018-02-16 Despite several decades of feminist activism and scholarship women's bodies continue to be sites of control and contention both materially and symbolically Issues such as reproductive technologies sexual violence objectification motherhood and sex trafficking among others constitute ongoing pressing concerns for women's bodies in our contemporary milieu arguably exacerbated in a neoliberal world where bodies are instrumentalized as sites of human capital This book engages with these themes by building on the strong tradition of feminist thought focused on women's bodies and by making novel contributions that reflect feminists concerns both theoretically and empirically about gender and embodiment in the present context and beyond The collection brings together essays from a variety of feminist scholars who deploy diverse theoretical approaches including phenomenology pragmatism and new materialisms in order to examine philosophically the question of the current status of gendered bodies through cutting edge feminist theory *Discovering Reality* Sandra Harding, Merrill B.P. Hintikka, 2005-12-30 Are Western epistemology metaphysics methodology and the philosophy of science grounded only in men's distinctive understandings of themselves others and nature Does this less than human understanding distort our models of reason and of scientific inquiry In different ways the papers in this collection explore the evidence for these increasingly reasonable and intriguing questions They identify how it is distinctively masculine perspectives on masculine experience which have shaped the most fundamental and formal aspects of systematic thought in philosophy and the natural and social sciences precisely the aspects of thought believed most gender neutral They show how these understandings ground Aristotle's biology and metaphysics the very definition of the problems of philosophy in Plato Descartes Hobbes and Rousseau the adversary method which is the paradigm of philosophic and scientific reasoning principles of individuation in philosophical ontology and the philosophy of language individualistic assumptions in psychology functionalism in sociological and biological theory evolutionary theory the methodology of political science Marxist political economy and conceptions of objective inquiry in the social and natural sciences These essays also begin to identify for us the distinctive aspects of women's experience which can provide the resources needed for the creation of a truly human understanding Audience The book will be of interest to those involved in epistemology and philosophy of the natural and social sciences as well as feminist scholars in philosophy The work will also be of value for theorists methodologists and feminist scholars in the natural and social sciences **Feminist Perspectives** Lorraine Code, Sheila Mullett, Christine Overall, 1988 *Aesthetics in Feminist Perspective* Hilde Hein, Carolyn C. and Literature this volume represents an eloquent and enlightened attempt to reconceptualize the field of aesthetic theory by encouraging its tendencies toward openness self reflexivity and plurality Discourse Society All of the authors challenge the traditional notion of a pure and disinterested observer that does not allow for questions of race ethnicity class sexual preference or gender Signs These essays examine the intellectual traditions of the philosophy of art and aesthetics Containing essays by scholars and by the writer Marilyn French the collection ranges from the history of aesthetic theory to a philosophical reflection on fashion The contributions are unified by a sustained scrutiny of the nature of feminist feminine or female art creativity and interpretation **Knowing the Difference** Kathleen Lennon, Margaret Whitford, 2012-10-12
