Rogers, 2010-11 In Career Stories Juliette Rogers considers a body of largely unexamined novels from the Belle époque that defy the usual categories allowed the female protagonist of the period While most literary studies of the Belle époque 1880-1914 focus on the conventional housewife or harlot distinction for female protagonists the heroines investigated in Career Stories are professional lawyers doctors teachers writers archaeologists and scientists In addition to the one well known woman writer from the Belle époque Colette this study will expand our knowledge of relatively unknown authors including Gabrielle Reval Marcelle Tinayre and Colette Yver who actively participated in contemporary debates on women's possible roles in the public domain and in professional careers during this period Career Stories seeks to understand early twentieth century France by examining novels written about professional women bourgeois and working class heroines and the particular dilemmas that they faced This book contributes a new facet to literary histories of the Belle époque a subgenre of the bildungsroman that flourished briefly during the first decade of the twentieth century in France Rogers terms this subgenre the female berufsroman or novel of women's professional development Career Stories will change the way we think about the Belle époque and the interwar period in French literary history because these women writers and their novels changed the direction that fiction writing would take in post World War I France **Psychologie de la discrimination et des préjugés**, 2018-04-03 Fruit de la collaboration de nombreux experts cet ouvrage clarifie les origines les mécanismes et les conséquences des préjugés et des discriminations envers différents groupes sociaux au travail et dans la vie quotidienne Il décrit les modèles qui permettent de les comprendre de les combattre et offre un regard croisé dominants dominés **Civilization without Sexes** Mary Louise Roberts, 2009-02-15 In the raucous decade following World War I newly blurred boundaries between male and female created fears among the French that theirs was becoming a civilization without sexes This new gender confusion became a central

metaphor for the War's impact on French culture and led to a marked increase in public debate concerning female identity and woman's proper role. Mary Louise Roberts examines how in these debates French society came to grips with the catastrophic horrors of the Great War. In sources as diverse as parliamentary records, newspaper articles, novels, medical texts, writings on sexology and vocational literature, Roberts discovers a central question: how to come to terms with rapid economic, social, and cultural change and articulate a new order of social relationships. She examines the role of French trauma concerning the War in legislative efforts to ban propaganda for abortion and contraception and explains anxieties about the decline of maternity by a crisis in gender relations that linked soldiery virility and paternity. Through these debates, Roberts locates the seeds of actual change. She shows how the willingness to entertain or simply the need to condemn nontraditional gender roles created an indecisiveness over female identity that ultimately subverted even the most conservative efforts to return to traditional gender roles and irrevocably altered the social organization of gender in postwar France.

Dixième Congrès international des femmes Ghénia Avril de Sainte-Croix, Mme. Ghénia Avril de Sainte-Croix, 1914. This extensive text includes both the transcribed proceedings of the meeting of the Tenth International Congress of Women in Paris as well as formal essays included by conference participants. The conference itself met over a period of several days with themes and topics dispersed throughout various days' sessions, but the formal presentations appear thematically in the tome. The first topic explored is women's roles in public and private charities, with two essays focusing respectively on women's participation in private charities internationally in the ten years preceding the meeting and recent improvements made to workers' housing. The theme of hygiene comprises the conference's second major theme, with two formal presentations on women's roles combating alcoholism and tuberculosis. Third is the topic of education, and essay topics here explore character education, how different countries have used education to respond to contemporary anxieties, and how to protect youth from moral corruption found in magazines, plays, images, and public events. The fourth major theme is law and legislation, and authors in this domain questioned the legal rights of women vis-à-vis their husbands as well as the civic capacity of married women in various national contexts. Questions concerning women's right to work comprised the fifth major theme; protective labor laws for women's work and a discussion of a minimum wage for women supplemented this topic. The sixth topic addressed by the Congress was women's suffrage, including discussions on married women's nationality and

women's moral influence as voters The conference's major themes conclude with examinations of female university students possibilities open for women desiring careers and the role of women in pacifism and in international conflict resolution The text ends with a transcript of the conference's closing sessions as well as adopted resolutions and a helpful index outlining the contributions of all participants     **A grammar of the French tongue.
