Magellan and the First Voyage Around the World Nancy Smiler Levinson,2001 A biography of the Portuguese sea captain who set sail from Spain in 1519 and successfully sailed around the world to prove that the world is not only round but circumnavigable **The Killing of Dr. Albrecht Roscher** J. W. Heldring,2011-11-30 Africa in the mid nineteenth century

was still very much an unknown continent its vast lands a source of unceasing interest and mystery La the white man This was the age of discovery the decades before the fascination wore off and the scramble for Africa began in earnest Explorers such as Burton Speke and Livingstone were the names on everyone's lips In this climate Albrecht Roscher grew up La be an outstanding young scholar whose interest in the works of classical writers such as Ptolemy and Herodotus inspired in him a love of geography science and biology which the achievements of Burton and others only served to inflame Africa beckoned However little did he imagine as he left Germany for the shores of East Africa that he would never return His murder before he managed to fulfill his ambitions has ensured that he has been largely consigned to a footnote in the history of African exploration In *The Killing of Dr Albrecht Roscher* Heldring sets out to redress the balance in what is a fitting tribute to a man who had he lived longer might have gone on to rival the achievements of Burton Livingstone and the other great explorers of that age Strangers in the South Seas Richard Lansdown,2006-04-30 Long before Magellan entered the Pacific in 1521 Westerners entertained ideas of undiscovered oceans mighty continents and paradisaal islands at the far ends of the earth First set down by Egyptian storytellers Greek philosophers and Latin poets such ideas would have a long life and a deep impact in both the Pacific and the West With the discovery of Tahiti in 1767 another powerful myth was added to this collection the noble savage For the first time Westerners were confronted by a people who seemed happier than themselves This revolution in the human sciences was accompanied by one in the natural sciences as the region revealed gaps and anomalies in the great chain of being that Charles Darwin would begin to address after his momentous visit to the Galapagos Islands The Pacific produced similar challenges for nineteenth century researchers on race and culture and for those intent on exporting their religions to this immense quarter of the globe Although most missionary efforts ultimately met with success others ended in ignominious retreat As the century wore on the region presented opportunities and dilemmas for the imperial powers leading to a guilty desire on the part of some to pull out along with an equally guilty desire on the part of

others to stay and help This process was accelerated by the Pacific War between 1941 and 1945 After more than two millennia of fantasies the story of the West's fascination with the insular Pacific graduated to a marked sense of disillusion that is equally visible in the paintings of Gauguin and the journalism of the nuclear Pacific Strangers in the South Seas recounts and illustrates this story using a wealth of primary texts It includes generous excerpts from the work of explorers soldiers naturalists anthropologists artists and writers some famous some obscure It begins in 1521 with an account of Guam by Antonio Pigafetta one of the few men to survive Magellan's circumnavigation voyage and ends in the late 1980s with the writing of an American woman Joana McIntyre Varawa as she faces the personal and cultural insecurities of marriage and settlement in Fiji It shows how the Great South Sea has been an irreplaceable distant mirror of the West and its intellectual obsessions since the Renaissance Comprehensively illustrated and annotated this anthology will introduce readers to a region central to the development of modern Western ideas This is a carefully conceived anthology covering an excellent range of subjects The selections are well chosen and interesting and the introductory materials are both scholarly and accessible It should be widely used in university courses dealing with almost any aspect of the Pacific Rod Edmond University of Kent at Canterbury
