Ferment in Education George D. Stoddard, 1948 *Ferment in Education* John J. Lane, 1995-11-05 This book lays no claim to uncovering the full range of problems confronting education elsewhere It shows however the great importance attached to education in a variety of contexts all of which are marked by dramatic social changes that place heavy demands upon the schools How can studies in comparative education play a role in such settings Some authors applaud the development of this field because of the opportunity it provides for systematic cross national studies of educational problems Others caution against accepting the findings of what they regard as ill conceived studies that compare educational achievement among nations The Ferment in Education on the Continent in America Sir Michael Sadler, 1905
