Cars You Must Drive puts you in the driver's seat of a century's worth of sports car legends and a few rather less legendary each presented with a fun and informative profile and fact and spec box. It's the ultimate gearhead's bucket list and poses the challenge: How many have you driven? Whoever coined the phrase 'getting there is half the fun' must have owned a sports car. And the wag who suggested that it's the journey not the destination. Probably driving a Lotus or MG at the time. From towering icons like Ferrari, Lamborghini, Porsche and Corvette to everyman sportsters from Triumph, MG, Sunbeam and Miata to oddballs like Crosley, Sabra and DB, sports cars inspire passion and strong opinions as few other vehicles on the road can. In one beautiful book, long-time Road & Track magazine chief photographer John Lamm along with other top motoring contributors gives the reader illustrated profiles of every sports car you've ever dreamed of driving. Now imagine if you could drive a different sports car any sports car every single day for a year. Which would you choose? Car Crazy Clive Gifford, 2014-05-14 Buckle your seat belt and get ready for an action-packed race through the world of automobiles. Car Crazy is an exhilarating celebration of the motor vehicle in all its weird and wonderful glory. Prepare to be dazzled by the fastest, the loudest, the most beautiful, the most powerful, the most expensive and the most outrageous vehicles ever to hit the tarmac. More than just a beautiful book of pictures and facts, Car Crazy also tells the amazing human interest stories behind the greatest racing drivers and stuntmen. Marvel at the death-defying bravery of Evel Knievel and Ayrton Senna and find out how scientists and designers changed the shape of the car forever in their quest for perfect aerodynamics. *The Museum of Engines and Mechanisms of the University of Palermo* Giuseppe Genchi, 2024-10-04 The book describes the collection of the Museum of Engines and Mechanisms of the University of Palermo, Italy, one of the most important and heterogeneous collections of engines and mechanisms in Europe, the first one in Italy to be awarded as Mechanical Engineering Heritage Collection by the American Society of Mechanical Engineers. Thanks to its numerous items, this book showcases the evolution of fluid machinery and applied mechanics from steam engines up to turbojet engines as well as hybrid systems, giving several technical and historical information about its most important engines, which are described in detail through pictures and original drawings. The Museum preserves and makes freely available this almost unique collection of more than 300 engines, didactic models and technical equipment, including various unique exemplars continuously enhanced thanks to donations and through restoration activities carried out in a dedicated laboratory of the Museum. As a result of a great deal of philological research carried out on the documents collected in the Museum's archive as well as in other institutional and corporate historical archives, this book serves as the reference tool of the collection and more generally of the Museum itself. Despite the technical subject and the academic environment in which it was created, the catalogue is realized to be read even by non-experts, offering different levels of detail, the first of which is the historical, economic and in certain cases even sporting context related to an engine, such as the vehicle for which it was designed and used.
