It shows how the sense of taste informs our preferences for and relationship to nature, pushes us toward ethical practices of consumption, and impresses upon us the importance of aesthetics. Eating is often dismissed as a necessary aspect of survival, and our personal enjoyment of food is considered a quirk. Nicola Perullo sees food as the only portion of the world we take in on a daily basis, constituting our first and most significant encounter with the earth. Perullo has long observed people's food practices and has

listened to their food experiences He draws on years of research to explain the complex meanings behind our food choices and the thinking that accompanies our gustatory actions He also considers our indifference toward food as a force influencing us as much as engagement For Perullo taste is value and wisdom It cannot be reduced to mere chemical or cultural factors but embodies the quality and quantity of our earthly experience *American Book Publishing Record Cumulative 1993* R R Bowker Publishing,1994-03 Cited in BCL3 Sheehy and Walford Compiled from the 12 monthly issues of the ABPR this edition of the annual cumulation lists by Dewey sequence some 41 700 titles for books published or distributed in the US Entry information is derived from MARC II tapes and books submitted to R R Bowker an *National Union Catalog* ,1956 Includes entries for maps and atlases Functional Food Carbohydrates Costas G.
