Female Life Careers: A Pattern Approach Sigrid B. Gustafson, David Magnusson, 2022-08-24 Originally published in 1991 this volume represents the first systematic attempt to apply a pattern approach to a comprehensive longitudinal investigation It focuses on individual differences in female career development from early adolescence through young adulthood Rather than constructing a general model of career development the authors use the interplay between theory and observation to build networks of patterns demonstrating the long term consequences for adult women s career involvement their educational levels their family commitments and their social networks Throughout their investigation the authors interpret individuals patterns as characterizing processes that underlie women s differential development They illustrate that a research strategy oriented toward pattern analysis and related methodology reveals information that is generally obscured in more traditional variable oriented designs They also argue that a pattern approach is particularly suited to the tenets of modern interactionism which provides the theoretical foundation of the study [A Living Systems Theory of Vocational Behavior and Development](#) Fred W. Vondracek, Donald H. Ford, Erik J. Porfeli, 2014-07-03 The Living Systems Theory of Vocational Behavior and Development LSVD explains and illustrates the processes by which individuals construct their work experiences vocational pathways and career patterns through episodes of interaction with affordances they recognize within their contexts and how counseling can facilitate those processes The LSVD was created by combining the scientifically based systems theory that explicates the dynamics of all aspects of human functioning and development called Humans as Self Constructing Living Systems with important ideas about vocational behavior and development The resulting integrative theory represents the individual person as a dynamic self directing and self constructing entity i e a living system Behavior Episodes BEs are the fundamental person in context dynamic units of analysis that serve as the building blocks by which individuals construct and retain their experiences in patterns that can be reactivated to facilitate future BEs The book describes how individuals history of satisfying BEs and their current activities provide the means by which vocational and career counselors can assist them to create satisfying vocational pathways It also describes for researchers how new non linear person centered quantitative and qualitative research methods can be used to analyze BE patterns to advance understanding of person level processes that play key roles in individuals vocational behavior and development The LSVD was designed to be not just an integrative framework for the field of career development but also to reconnect the field to related areas such as human resources and industrial organizational psychology and to the range of human sciences that have already embraced a living systems theoretical model **International Handbook of Career Guidance** James A.
