## **Feminism And Ecological Communities An Ethic Of Flourishing:**

**Feminism and Ecological Communities** Christine Cuomo, 2002-09-11 *Feminism and Ecological Communities* presents a bold and passionate rethinking of the ecofeminist movement. It is one of the first books to acknowledge the importance of postmodern feminist arguments against ecofeminism whilst persuasively presenting a strong new case for ecological feminism. Chris J Cuomo first traces the emergence of ecofeminism from the ecological and feminist movements before clearly discussing the weaknesses of some ecofeminist positions. Exploring the dualisms of nature/culture and masculine/feminine that are the bulwark of many contemporary ecofeminist positions and questioning traditional feminist analyses of gender and caring. *Feminism and Ecological Communities* asks whether women are essentially closer to nature than men and how we ought to link the oppression of women, people of colour and other subjugated groups to the degradation of nature. Chris J Cuomo addresses these key issues by drawing on recent work in feminist ethics as well as the work of diverse figures such as Aristotle, John Dewey, Donna Haraway and Maria Lugones. A fascinating feature of the book is the use of the metaphor of the cyborg to highlight the fluidity of the nature/culture distinction and how this can enrich ecofeminist ethics and politics. An outstanding new argument for an ecological feminism that links both theory and practice. *Feminism and Ecological Communities* bravely redraws the ecofeminist map. It will be essential reading for all those

interested in gender studies, environmental studies and philosophy. **Feminism and Ecological Communities** Chris J. Cuomo, 1997-11 If some of our values have contributed to the creation of a toxic and damaged planet and to the maintenance of systems of oppression based on gender, race and other types of differences, any attempts to foster alternative values requires attention to social and as well as ecological concerns. *Feminism and Ecological Communities* presents a bold and passionate rethinking of the ecofeminist movement. It is one of the first books to acknowledge the importance of postmodern feminist arguments against ecofeminism while persuasively supporting a strong new case for ecofeminism. Chris J Cuomo explores the dualisms of nature/culture and masculine/feminine that defend many contemporary ecofeminist positions and questions traditional feminist analyses of gender and caring. Munford,2007-04-17 This revised and expanded edition new in paperback provides a definitive collection on the current period in feminism known by many as the third wave Three sections genealogies and generations locales and locations politics and popular culture interrogate the wave metaphor and through questioning the generational account of feminism indicate possible future trajectories for the feminist movement New to this edition are an interview with Luce Irigaray a foreword by Imelda Whelehan as well as newly commissioned chapters      **The Ethics of Mobilities** Tore Sager,2016-03-23 With this book the international academic discourse on mobility is taken a step further through the intertwined perspectives of different social sciences engineering and the humanities The Ethics of Mobilities departs from the recent interest in social surveillance raised by the use of technology for the surveillance and control of mobility as well as for transport It widens this theme to encompass a broad scale of issues ranging from freedom and escape to social exclusion and control thus raising important questions of ethics identity and religion questions that are dealt with by a diverse yet structured range of chapters arranged around the themes of ethics and religion and freedom and control Through their variety and diversity of perspectives the chapters of this book offer a substantial interdisciplinary contribution to the socially and environmentally relevant discussion about what a technically and economically accelerating mobility does to life and how it might be transformed to sustain a more life enhancing future Ethics of Mobilities will excite not only international interest but will also appeal to scholars across a wide range of disciplines in fields as diverse as theology and engineering      Landscapes of the Song of Songs Elaine T. James,2017-06-01 In this masterful new study of the ancient poetry of the Song of Songs Elaine T James explores the Song s underlying interest in the natural world Engaging with the fields of geography landscape architecture and literature James critiques the tendency of scholars to reify a perceived dichotomy between nature and culture and instead argues that the poetic attention to landscape indicates an awareness of a viewer Nature is here a poetic device that informs James s close readings of agrarianism gardens cities social control and feminism and the gaze in the Song With this two fold emphasis on landscape and lyric Landscape of the Song of Songs shows how the Song persistently envisions a world in which human lovers are embedded in the natural world complexly enfolded in relationships of fragility and care      *Encyclopedia of Feminist Theories* Lorraine Code,2002-06-01 The path breaking Encyclopedia of Feminist Theories is an accessible multidisciplinary insight into the complex field of feminist thought The Encyclopedia contains over 500 authoritative entries commissioned from an international team of contributors and includes clear concise and provocative explanations of key themes and ideas Each entry contains cross references and a bibliographic guide to further reading over 50 biographical entries provide readers with a sense of how the theories they encounter have

developed out of the lives and situations of their authors

### **Recognizing the Autonomy of Nature** Thomas

Heyd, 2005-11-09 How do the ways in which we think about and describe nature shape the use and protection of the environment? Do our seemingly well intentioned efforts in environmental conservation reflect a respect for nature or our desire to control nature's wildness? The contributors to this collection address these and other questions as they explore the theoretical and practical implications of a crucial aspect of environmental philosophy and policy: the autonomy of nature. In focusing on the recognition and meaning of nature's autonomy and linking issues of metaphysics, epistemology, ethics, and policy, the essays provide a variety of new perspectives on human relationships to nature. The authors begin by exploring what is meant by nature in what sense it can be seen as autonomous and what respect for the autonomy of nature might entail. They examine the conflicts that arise between the satisfaction of human needs (food, shelter, etc.) and the natural world. The contributors also consider whether the activities of human beings contribute to nature's autonomy. In their investigation of these issues, they not only draw on philosophy and ethics; they also discuss how the idea of nature's autonomy affects policy decisions regarding the protection of agricultural, rural, and beach areas. The essays in the book's final section turn to management and restoration practices. The essays in this section pay close attention to how efforts at environmental protection alter or reinforce the traditional relationship between humans and nature. More specifically, the contributors examine whether management practices as they are applied in nature conservation actually promote the autonomy of nature or whether they turn the environment into a client for policymakers.
