Feminist Anthropology:

Black Feminist Anthropology Irma McClaurin, 2001 In the discipline's early days anthropologists by definition were assumed to be white and male Women and black scholars were relegated to the field's periphery From this marginal place white feminist anthropologists have successfully carved out an acknowledged intellectual space identified as feminist anthropology Unfortunately the works of black and non western feminist anthropologists are rarely cited and they have yet to be respected as significant shapers of the direction and transformation of feminist anthropology In this volume Irma McClaurin has collected for the first time essays that explore the role and contributions of black feminist anthropologists She has asked her contributors to disclose how their experiences as black women have influenced their anthropological practice in Africa the Caribbean and the United States and how anthropology has influenced their development as black feminists Every chapter is a unique journey that enables the reader to see how scholars are made The writers present material from their own fieldwork to demonstrate how these experiences were shaped by their identities Finally each essay suggests how the author's field experiences have influenced the theoretical and methodological choices she has made throughout her career Not since Diane Wolf's *Feminist Dilemmas in the Field* or Hortense Powdermaker's *Stranger and Friend* have we had such a breadth of women anthropologists discussing the critical and personal issues that emerge when doing ethnographic research

Feminist Anthropology Ellen Lewin, 2009-02-09 *Feminist Anthropology* surveys the history of feminist anthropology and offers students and scholars a fascinating collection of both classic and contemporary articles grouped to highlight key themes from the past and present Offers vibrant examples of feminist ethnographic work rather than synthetic overviews of the field Each section is framed by a theoretical and bibliographic essay Includes a thoughtful introduction to the volume that provides context and discusses the intellectual foremothers of the field including Margaret Mead Ruth Landes Phyllis Kaberry and Zora Neale Hurston

Gender at the Crossroads of Knowledge Micaela Di Leonardo, 1991 *Gender at the Crossroads of Knowledge* offers us much more than a sampling of current work in feminist anthropology Taken together the chapters ought to convince readers that feminist anthropology is a force to be reckoned with in the reshaping of our intellectual life It presents a challenge to the familiar conceptual categories out of which not only our theories but also our everyday experience are built Feminist anthropology has a very important analytical position in gender studies generally This volume will do a good job of presenting anthropological contributions to non anthropological audiences Rena Lederman Princeton University

Mapping Feminist Anthropology in the Twenty-First Century Ellen Lewin, Leni M. Silverstein, 2016-07-07 Feminist anthropology emerged in the 1970s as a much needed corrective to the discipline's androcentric biases Far from being a marginalized subfield it has been at the forefront of developments that have revolutionized not only anthropology but also a host of other disciplines This landmark collection of essays provides a contemporary overview of feminist anthropology's historical and theoretical origins the transformations it has undergone and

the vital contributions it continues to make to cutting edge scholarship Mapping Feminist Anthropology in the Twenty First Century brings together a variety of contributors giving a voice to both younger researchers and pioneering scholars who offer insider perspectives on the field's foundational moments Some chapters reveal how the rise of feminist anthropology shaped and was shaped by the emergence of fields like women's studies black and Latina studies and LGBTQ studies Others consider how feminist anthropologists are helping to frame the direction of developing disciplines like masculinity studies affect theory and science and technology studies Spanning the globe from India to Canada from Vietnam to Peru Mapping Feminist Anthropology in the Twenty First Century reveals the important role that feminist anthropologists have played in worldwide campaigns against human rights abuses domestic violence and environmental degradation It also celebrates the work they have done closer to home helping to explode the developed world's preconceptions about sex gender and sexuality

Feminist Anthropology Pamela L. Geller, Miranda K. Stockett, 2007-06-19 Feminist Anthropology probes critical issues in the study of gender sex and sexuality While feminist anthropology is often perceived as fragmented this vital new work establishes common ground and situates feminist inquiries within the larger context of social theory and anthropological practice **Feminism and Anthropology** Henrietta L. Moore, 2013-04-23 This is the first book which examines the nature and significance of a feminist critique in anthropology It offers a clear introduction to and balanced assessment of the theoretical and practical issues raised by the development of a feminist anthropology Henrietta Moore situates the development of a feminist approach in anthropology within the context of the discipline examining the ways in which women have been studied in anthropology as well as the ways in which the study of gender has influenced the development of the discipline anthropology She considers the application of feminist work to key areas of anthropological research and addresses the question of what social anthropology has to contribute to contemporary feminism Throughout the book Henrietta Moore's analysis is informed by her own extensive fieldwork in Africa and by her concern to develop anthropological theory and method by means of feminist critique This book will be of particular value to students in anthropology women's studies and the social sciences **Black Feminist Anthropology, 25th Anniversary Edition** Irma McClaurin, 2024-11-15 Black Feminist Anthropology Theory Politics Praxis and Poetics is a groundbreaking collection that centers the imaginative intellectual perspectives voices and experiences of Black American feminist anthropologists Twenty five years ago as the Foreword states this book dared to put three words together in the title Black Feminist Anthropology that have not always kept company with each other and in the minds of many both in and outside of the academy they should remain separate Standing the test of time it is still a bold reimagining of anthropology and all social sciences as inclusive and decolonized while establishing a new Black feminist anthropology canon that decades later is too often taken for granted as normative Black Feminist Anthropology is filled with a message of theoretical possibilities that anyone who enters its pages will find healing life saving and an affirmation that Black women anthropologists have contributed much to the theory politics

praxis and poetics of anthropology gender and women s studies masculinity studies queer studies the social sciences generally and any other discipline that seeks transformation from the inside out It is both an archive and a legacy for the next generation
