Mauthner, Maxine Birch, 2002 This title examines the theoretical and practical aspects of ethical dilemmas in qualitative research **The Engaged Sociologist** Kathleen Odell Korgen, Jonathan Michael White, 2007 *The Engaged Sociologist Connecting the Classroom to the Community* brings the public sociology movement into the classroom as it teaches students to use the tools of sociology to become effective participants in our democratic society Through exercises and projects authors Kathleen Korgen and Jonathan M White encourage students to practice the application of these tools in order to get both hands on training in sociology and experience with civic engagement in their communities *Embodied Performances* B. through an integration of performance psychotherapy and feminist philosophy *Emotion and the Researcher* Tracey Loughran, Dawn Mannay, 2018-08-28 Contributors to this edited collection argue for an emotional rebellion in the academic world arguing that the presentation of research as objective conceals the subject positions of researchers and the emotional imperatives that often drive research Train Tracks Gayle Letherby, Gillian Reynolds, 2020-08-25 This book provides an in depth exploration of trains and train travel Letherby and Reynolds have conducted extensive research with all those concerned with trains from leisure travelers and enthusiasts to railway workers and commuters Overturning conventional wisdom they show that the train has a social life in and of itself and is not simply a way to get from A to B The book also looks at the depiction of train travel through cultural media such as music films books and art The authors consider the personal politics of train travel and political discussion surrounding the railways as well as the relationship trains have to leisure and work The media often paints a gloomy picture of the railways and there is a general view that the romance of train travel ended with the steam locomotive Letherby and Reynolds show that this is far from the case *Harnessing Knowledge, Innovation and Competence in Engineering of Mission Critical Systems* Ali G. Hessami, 2020-03-04 This book explores the critical role of acquisition application enhancement and management of knowledge and human competence in the context of the largely digital and data information dominated modern world Whilst humanity owes much of its achievements to the distinct capability to learn from observation analyse data gain insights and perceive beyond original realities the systematic treatment of knowledge as a core capability and driver of success has largely remained the forte of pedagogy In an increasingly intertwined global community faced with existential challenges and risks the significance of knowledge creation innovation and systematic understanding and treatment of human competence is likely to be humanity's greatest weapon against adversity This book was conceived to inform the decision makers and practitioners about the best practice pertinent to many disciplines and sectors The chapters fall into three broad categories to guide the readers to gain insight from generic fundamentals to discipline specific case studies and of the latest practice in knowledge and competence management
