Canales Serrano, Amparo Gómez Rodríguez, 2019-07-11 Es posible una ciencia sin sesgos de ningún tipo. Tendemos a pensar en la ciencia como una herramienta infalible de estudio del ser humano. Sin embargo, hay quienes la entienden como un producto en sí mismo permeable a los valores que imperan en cada momento. Por desgracia, sabemos que existen malas ciencias que han servido como herramienta para justificar las distintas opresiones y discriminaciones que la sociedad ha llevado a cabo a lo largo de su historia. Los diversos artículos de este libro firmados por la desaparecida Amparo Gómez Rodríguez abordan sesgos, malas prácticas y terrenos inexplorados de la ciencia desde la perspectiva de género. Esta obra nace del deseo de recopilar algunos de los mejores textos de la filosofía, muchos de los cuales publicados a lo largo de los noventa en medios locales, siguen siendo textos de referencia con el fin de visibilizarlos y facilitar su uso. Fundadora del Centro de Estudios de la Mujer en la Universidad de La Laguna y directora de la revista *Clepsydra* de estudios feministas, Amparo persiguió tanto la crítica fundamentada a la ciencia ya hecha y pensada por hombres como la búsqueda y creación de una nueva ciencia feminista y escrita por mujeres. Una ciencia que permita a las mujeres pensarse a sí mismas que aborde el objeto de estudio desde una perspectiva objetiva que incluya epistemologías diferentes y que busque respuestas a preguntas formuladas por sujetos con modos de pensar distintos, pues como se afirma entre estas páginas, los problemas que pueden interesar a todo el mundo no tienen que ser los de los hombres blancos. Creer lo contrario supone dejar inexplicadas muchas cuestiones y aspectos de las cosas fundamentales.

Figurations Claudia Castañeda, 2002-11-29 An interdisciplinary examination of debates surrounding the figure of the child in transnational politics and culture. *Women, Science, and Technology* Mary Wyer, Mary Barbercheck, Donna Cookmeyer, Hatice Ozturk, Marta Wayne, 2013-09-11 *Women Science and Technology* is an ideal reader for courses in feminist science studies. This third edition fully updates its predecessor with a new introduction and twenty-eight new readings that explore social constructions mediated by technologies, expand the scope of feminist technoscience studies and move beyond the nature/culture paradigm.

Sampanikou, Jan Stasienko, 2021-04-20 The new reader presents an up-to-date collection of seminal texts dedicated to all branches of debates on Posthuman Studies, Transhumanism, Critical Posthumanism and Metahumanism. movements and those works from which excerpts are included in it Yunus Tuncel The New School New York Since Sorgner Sampanikou Stasienco and their colleagues almost singlehandedly are crafting and advancing this discipline through its forming stages when they publish a book with handpicked canonic texts it should be treated as a landmark Carmel Vaisman The Cohn Institute and The Multidisciplinary Program in the Humanities Tel Aviv University What makes the Posthuman Studies Reader interesting and exciting is the facility to have in one volume the basic ideas and essentials of transhumanism critical posthumanism and metahumanism The reader provides in a condensed version an introduction to posthuman studies for both academic and nonacademic audiences Leo Igwe Department of Religious Studies University of Cape Town The Posthuman Studies Reader serves as a comprehensive guide and or manual of an evolving and expanding Post Trans Meta Humanism discourse because of the clarity of organization by the editors and the highest scholarship of the writers the collection was able to drive the interest of readers a notch or two higher Joseph Reylan B Viray Polytechnic University of the Philippines
