Fengpitou Tapenkeng And The Prehistory Of Taiwan:

Fengpitou, Tapenkeng, and the Prehistory of Taiwan Kwang Chih Chang, 1969 **Fengpitou, Tapenkeng, and the Prehistory of Taiwan** Kwang-chih Chang, 1969 **Prehistory of the Indo-Malaysian Archipelago** Peter Bellwood, 2007-03-01 Since its publication in 1985 Peter Bellwood's *Prehistory of the Indo-Malaysian Archipelago* has been hailed as the sole authoritative work on the subject by the leading expert in the field. Now that work has been fully revised and includes a complete up to date summary of the archaeology of the region and relevant neighboring areas of China and Oceania as well as a comprehensive discussion of new and important issues such as the Eve Garden of Eden hypothesis and its relevance to the Indo-Malaysian region and recent advances in macrofamily linguistic classification. Moving north to south from northern Peninsular Malaysia to Timor and west to east from Sumatra to the Moluccas Bellwood describes human prehistory from initial hominid settlement more than one million years ago to the eve of historical Hindu Buddhist and Islamic cultures of the region. The archaeological record provides the central focus but chapters also incorporate essential information from the paleoenvironmental sciences biological anthropology linguistics and social anthropology. Bellwood approaches questions about past cultural and biological developments in the region from a multidisciplinary perspective. Historical issues given extended treatment include the significance of the *Homo erectus* populations of Java the dispersal of the present Austronesian speaking peoples of the region within the past 4 000 years and the spread of metallurgy since 500 B C. Bellwood also discusses relationships between the prehistoric populations of the archipelago and those of neighboring regions such as Australia New Guinea and mainland Asia. *New Frontiers in the Neolithic Archaeology of Taiwan (5600-1800 BP)* Su-chiu Kuo, 2019-12-05 This book summarizes the systematic research on the Neolithic cultures of Taiwan based on the latest archaeological discoveries and focusing on the maritime interactions between mainland southeast China Taiwan and southeast Asia during 5600-1800 BP. The study demonstrates and sheds light on the distinctiveness of Taiwan's Neolithic cultures their interactions with the external cultures of its surrounding regions the maritime cultural diffusion and early seafaring across sea regions like the Taiwan Strait Bashi channel and South China Sea. Drawing on the author's deep understanding of Taiwan and its surrounding regions the book also incorporates recent archaeological findings by Taiwanese researchers. Further based on a new reconstruction of the spatiotemporal framework of Taiwanese prehistoric cultures the chronologically arranged chapters discuss Neolithic cultures of the early middle late and final stage of this island region revealing the prehistoric cultural development regional typology and their maritime interactions with surrounding regions. The typological study of the native traits and external cultural influences of each stage of Neolithic culture shows the prehistoric and early history of this key stepping stone in the Asia Pacific region. *Prehistoric Maritime Cultures and Seafaring in East Asia* Chunming Wu, Barry Vladimir Rolett, 2019-12-03 This book focuses on prehistoric East Asian maritime cultures that predated the Maritime Silk Road the Four Seas and Four Oceans navigation system recorded in historical

documents of ancient China Origins of the Maritime Silk Road can be traced to prosperous Neolithic and Metal Age maritime oriented cultures dispersed along the coastlines of prehistoric China and Southeast Asia The topics explored here include Neolithisation and the development of prehistoric maritime cultures during the Neolithic and early Metal Age the expansion and interaction of these cultures along coastlines and across straits the two layer hypothesis for explaining genetic and cultural diversity in south China and Southeast Asia prehistoric seafaring and early sea routes the paleogeography and vegetation history of coastal regions Neolithic maritime livelihoods based on hunting fishing foraging adaptations rice and millet cultivation and their dispersal along the coast and across the open sea and interaction between farmers and maritime oriented hunter fisher foragers In addition a series of case studies enhances understanding of the development of prehistoric navigation and the origin of the Maritime Silk Road in the Asia Pacific region
