Frank Lloyd Wright And Japan Revisited: Traditional Japanese Culture As A Means To Modern American Architecture Kevin Nute,2024-12-13 Although it has long been accepted that America s most famous architect was influenced by Japanese culture the nature of Frank Lloyd Wright s debt to Japan has remained unclear This book argues that Japan had a more profound impact on Wright s approach to design and in particular on his notion of the organic than has previously been acknowledged It suggests that the influence of Ernest Fenollosa 1853 1908 the leading American authority on Japanese art at the turn of the 20th century who also happened to be the cousin of Wright s first employer in Chicago the Shingle Style architect Joseph Silsbee 1848 1913 was pivotal in bringing together what would become Wright s twin passions of Japanese art and the organic whole Building on the success of the original book which won the 1994 American Institute of Architects International Architectural Monograph Award this revised and expanded edition contains new sections on the Western image of Japan as other the question of cultural appropriation and Wright s translation of Japanese building forms into his own architectural language

Feng Shui Ernest J. Eitel,2022-01-04 Feng shui also known as Chinese geomancy is a traditional practice originating from ancient China which claims to use energy forces to harmonize individuals

begins by inspecting the garden's physical appearance and its architectural elements. He discusses the origin and evolution of these structures and the aesthetics of their design and arrangement. Throughout, he refers to maps and original models of individual buildings and other existing gardens of the Ming-Qing period, including the well-preserved Yihe Yuan and the Chengde Summer Mountain Retreat in Rehe. A special feature of the book is its exploration of the activities and daily life of the royal household.

How to Read Signs and Omens in Everyday Life Sarvananda Bluestone, 2001-10-01. Discover your psychic powers and learn to use the wonders of nature and the world around you as magical tools of divination. Practical and enjoyable exercises help readers reconnect with their innate psychic sensitivity. Includes 75 methods and practices of divination from around the world. Since the beginning of time, diviners and seers have been finding signs and omens in the world around them: in pools of water, tea leaves, delicate patterns of cracked animal bones, and the ripples of clouds in the sky. Because these observers have been able to tap into a deeper level of awareness, they have come to sense hidden truths in powerful and mysterious ways. In modern times, we call those who possess these abilities "psychic," but native cultures accepted that each of us has an innate sixth sense and can learn how to read the forces of nature that appear before us. In this fascinating and enlightening guide, historian and psychic Sarvananda Bluestone shows us how our innate knowledge can be rediscovered, allowing us to become far more in tune with our surroundings than we ever dreamed possible. He teaches us to use everyday objects and the wonders of nature as magical tools that offer a window into the future and ourselves. Whether watching birds cross the morning sky or divining the subtle energies of the earth, you will see the world in an entirely new light. Filled with practical exercises, *How to Read Signs and Omens in Everyday Life* demonstrates how the discovery of the power within ourselves requires nothing more than a little guidance and a willingness to see.

Sino-German Relations Since 1800 Jingsheng Mai, Ricardo King Sang Mak, Danny Shiu Lam Paa, 2000. In this volume containing fifteen papers on Sino-German relations since 1800, David Honey R. G. Tiedemann and Timothy M. K. Wong examine German missionary work in China as well as Hong Kong Papers dealing with German colonial administration in China. They pay attention to the German interaction with locals and other Europeans. Klaus M. Hahn, for example, reveals that the German governance of the Chinese Qingdao was not a single-track action. Winfried Speitkamp studies how Germans preserved their national identity in the British-dominated Hong Kong. On German economic activities, Ricardo K. S. Mak examines the relationship between German politics and the German businessmen in nineteenth-century Hong Kong. On mutual perceptions, Thomas Fuchs surveys the changing images of China in German literature. Laurent Pfister studies the case of Ernest Faber's Sinological Orientalism to reveal how Europeans created images of China which reflected perhaps more of their own frame of mind than the Chinese reality. On philosophical and linguistic interactions, Chiu Yee Cheung

examines the two different faces of Nietzsche in China Paul Levine suggests possible influence of Buddhism and Daoism on Nietzsche's views on language and translation Werner Hess shares with us his analysis supported with first hand observations of the German language in Chinese mainland Regarding the influence of German political thought Yik yi Chu studies Marxism in China Youwei Xu and Danny Paau both explore the impact of German Fascism on the Chinese Qichang Pan reviews PRC Germany diplomatic relations and expresses optimism in continuous friendly relations between the two countries With the wide span of training background and places of origin spacing out from East to West together the scholars present a multi disciplinary exploration of Sino German relations in the past two centuries

Far Out Nancy Weatherly Sharp, 2025-05-31 Far Out is not a book to debunk conventional ideas But over the years I have learned about experienced and been impressed by a number of alternative healing techniques Over time I became so intrigued with things alternative that I was impelled to learn more and more about them Even so I have done so cautiously never abandoning the skepticism and tough questions that were the hallmarks of my career as a reporter and writer for newspapers in Missouri California Washington D C and New York The journey I've been on has ended up being enlightening inspirational and life changing Despite my initial doubts the efforts I set in motion to push back boundaries and unlock doors have brought me tremendous rewards personally Even though not every experience I have had has been totally positive and not everything I have read or been told has been credible along the way I have had truly amazing experiences made deep friendships enjoyed countless provocative conversations and spent hour after hour engrossed in what I have been reading or witnessing The people I've come to know either in person or through their writings have taught me so much and enriched my life in so many ways And for this I owe so much to so many In sum not only am I a happier healthier more peaceful and more loving person now but also my eyes have been opened to a whole new way of living not to mention a whole new way of way of looking at our existence in this miraculous universe of ours Many of the ideas and practices I have been introduced to ones that seemed so wrong headed in the beginning I now accept as sound and valuable even though they often directly contradict what I grew up knowing to be the truth Others have just added new dimensions and perspectives to the understandings I had so long ago So why have I put this story about my own personal journey to paper It's a question I've wrestled with myself Certainly writing a book was not my objective when I initially set out on my explorations and I do sometimes wonder how what I have to say will be perceived by my more orthodox friends and readers But people who open their minds to the vast possibilities outside the boundaries of conventional wisdom and talk seriously of such things in the here and now are sometimes taken with a grain of salt I do hope that will not be the case with me I see my work as both enlightening and significant Also I am perfectly happy with my life just the way it is without being the author of this book Not only have I always been blessed career wise but also I am in excellent health have great friends and am married to the world's best husband James Roger Sharp a well known American historian and author of important studies on the birth of the nation and its development in the Jacksonian period

And Roger and I have a loving family including a son daughter daughter in law and four grandchildren It certainly was not my intention to debunk conventional ideas most of which I am in complete agreement with anyway Although over the years I have learned about experienced and been impressed by a number of alternative healing techniques that does not mean that I am not a fan of Western medicine as well In fact my own personal experience with allopathic medicine has been superb In addition to not wanting to discredit conventional ideas I have not written this book to sell anyone on specific alternative ideas or approaches It is not my goal to persuade others to follow in my specific footsteps Far from it I see my path as mine and mine alone Although I ve spent more than a quarter century tirelessly exploring the multifaceted out of the mainstream world I only want to tell my story as accurately and entertainingly as possible But it is my experience and my story I am definitely not in any position to endorse anything I ve learned about experienced myself or witnessed someone else experience In the end then I have come to the conclusion that my primary motivation in writing this book is to tell a fascinating illuminating significant story a story I need to share because it sheds light on our incredible magnificent exquisite universe with its tantalizing mysteries As a newspaper reporter that has been my calling to use whatever knowledge and talents I have to investigate the world and then report back to readers what I have found and to do so as clearly accurately and entertainingly as I have known how Finally I have to say I would not be unhappy if reading my story were to enable at least a few readers to suspend their disbelief open their minds to out of the mainstream ideas and approaches and then set out themselves on their own individual journeys of discovery For those readers ready to personally dip a toe into the realm of things alternative then it is my hope that what I have written will serve as a useful how to guidebook to the territory ahead I wish them all the success in the world Furthermore sharing my story today seems even more timely relevant and maybe even urgent than when the writing of the book began I say this after becoming aware of predictions coming from both conventional and unconventional sources about the possibility that our future could be fundamentally different than our present is and past has been Not only are mainstream figures like former Vice President Al Gore and many scientists urgently and repeatedly warning about changes we may all soon face as a result of the ways climate change may affect our planet but many alternative visionaries also are looking ahead to a planet unlike the one we know today In the final analysis I hope that my book while offering insights and guidance to readers no matter what the future brings turns out to be a great read Thus it is my desire that those who experience my journey vicariously by following in my footsteps will not only gain a far greater understanding of and appreciation for what this miraculous world of ours is all about but also enjoy the ride And if it should turn out that the Earth s future is one of great change it is my wish that the holistic ideas and approaches that I ve discovered along my path become especially empowering and valuable as they are less dependent on 21st century technology and more in line with the natural cycles and rhythms of our planet and the universe in which it resides So come with me It s an awesome place to be It s Far Out *Feng Shui Almanac 2000* Gary Quelch,1999 **Ecopolis** Paul F.

Downton,2008-11-19 From 2008 for the first time in human history half of the world's population now live in cities Yet despite a wealth of literature on green architecture and planning there is to date no single book which draws together theory from the full range of disciplines from architecture planning and ecology which we must come to grips with if we are to design future cities which are genuinely sustainable Paul Downton's Ecopolis takes a major step along this path It highlights the urgent need to understand the role of cities as both agents of change and means of survival at a time when climate change has finally grabbed world attention and it provides a framework for designing cities that integrates knowledge both academic and practical from a range of relevant disciplines Identifying key theorists practitioners places and philosophies the book provides a solid theoretical context which introduces the concept of urban fractals and goes on to present a series of design and planning tools for achieving Sustainable Human Ecological Development SHED Combining knowledge from diverse fields to present a synthesis of urban ecology the book will provide a valuable resource for students researchers and practitioners in architecture construction planning geography and the traditional life sciences **The Complete Illustrated Guide to Feng Shui for Gardens** Lillian Too,1999 The principles and practise of the ancient art of Feng Shui
