**Conservation and Management** Bruce Prideaux, 2014-09-19 Globally rainforests are under threat on numerous fronts including clearing for agriculture harvesting for timber and urban expansion Yet they have a crucial role in biodiversity conservation climate change mitigation and providing other ecosystem services As the term is used in this book rainforests include both temperate and tropical although the emphasis is on tropical rainforests Rainforests are also attractive tourist spaces and where they have been used as a tourism resource have generated significant income for local communities However not all use of rainforests as a tourism resource has been sustainable This book argues that sustainability must be the foundation on which tourism use of this complex but ultimately fragile ecosystem must be built upon It provides a multi disciplinary perspective incorporating rainforest science management and tourism issues The book is organized into four

sections commencing with Rainforest Ecology and Management followed by People and Rainforests Opportunities for Rainforest Tourism Development and finally Threats to Rainforests Each major rainforest region is covered including the Amazon Central America Africa Australia and south east Asia in the context of a specific issue For example rainforests in Papua New Guinea are examined in the context of community based ecotourism development while the rainforests in Borneo are discussed in an examination of wildlife issues Other issues covered in this manner include governance empowerment issues for rainforest peoples and climate change **Jamaica** Fodor's,Fodor's Travel Publications, Inc. **Jamaica in 1896, [etc]** Frank Cundall,1912     Melbourne, Victoria & Tasmania Holly Smith,2010-09-14 The author a native Australian covers everything you might want to know about Australia guaranteed The places to stay from budget to luxury rentals to B Bs the restaurants from fast food to the highest quality the beachwalks and bushwalks the wildlife and how to see it exploring the country by air on water by bike and every other way Following are a few excerpts from the guide The gathering of landscapes within the compact state of Victoria seem as if a giant had taken different pieces from around the continent squashed them together and shaken them up and then tossed them to let them fall where they may The

awesome wave lashed coastal edges are among the state's classic sights with crumpled pillars of orange rock stacked tall out in the water. Where the shores aren't rough the beaches are silky and white as soft and tame as a kitten with cold but gentle waters. Behind this edge are thick patches of temperate rainforests leading up into drier locales including inland deserts, an unmade bed of mountain foothills and folds and smooth river marshes and plains. You'd never expect that much of the terrain here was once actually volcanic resulting in wild peaks, bluffs and valleys throughout the center. There's 227 600 sq km of land in the state and the Great Dividing Range arches through the center of it with major collections of peaks in the Dandenongs and Macedons. The highest summits are in the east at 1 986 m 6 514 ft Mt Bogong and 1 922 m 6 304 ft Mt Feathertop and snowfields are found throughout the northeastern Australian Alps from June to September. Hemming in the land are 1 800 km 1 116 mi of coastlines along the Bass Strait and the Southern Ocean with Melbourne and Geelong fronting the central cut inland to Port Phillip Bay. This is a cool state akin to the Pacific Northwest or the lower New England states of the U.S. with warm summers but chilling wet winters. Some regions do dip below freezing namely the northeastern mountains while the Gippsland highlands in the east and the western Otway Ranges see more rain than anywhere else. Skip a couple hours south or west and you'll hit the arid Mallee region and the Little Desert and Big Desert national park areas. Farmlands fill in the gaps where orchards and vineyards are filled with apples, grapes, oranges and other citrus fruits. Main crops are grains and vegetables, the fields fronting huge dairy farms or sheep and cattle ranches. Tasmania is offshore from Victoria. The name Tasmania is one of the world's most intriguing and it rightfully sounds such as one of the most fascinating places on earth. And yes it's a heck of a journey to reach this offshore Australian state but once you're here if you're adventurous you won't want to leave. Indeed the island state of Tasmania is ripe for adventure. A heart shaped mountainous landmass 298 km 185 mi southeast of the main Australian continent it's covered with forests threaded with rivers and edged by wild rugged beaches and bays. Its wilderness comprises an international Heritage Site of its own filled with some of the world's oldest and most unusual plants, animals that are found nowhere else on earth, rock formations that span every geological era and among the longest underground tunnels ever found. The capital of Hobart where almost half the island's residents live is tucked into the southeastern edge and the sleepy northern ferry town of Devonport brings in visitors from the mainland. No one ventures far though which leaves the majority of the island open to exploring and free of crowds even at the loveliest of national wonders such as Tasman National Park in the southeast, Freycinet National Park in the east and Franklin Gordon Wild Rivers National Park in the west.
