Frontiers of Ferroelectricity Sidney B. Lang, Helen L.W. Chan, 2007-12-31 The field of ferroelectricity is a very active one Many hundreds of papers in this field are published each year and a large number of local and international conferences are held We felt that it would be appropriate at this time to publish a set of papers in a single journal describing some of the most active areas in the field The Journal of Materials Science agreed to publish a special issue on ferroelectricity Accordingly we sent requests for papers to a number of research groups around the world It was difficult to select a small number of groups from among the many excellent ones in the field and we apologize to those not included We received 24 manuscripts from groups in North America Asia and Europe each one of which was reviewed by two referees The papers include reviews and current research both experimental and theoretical It was especially satisfying that the authors included not only established researchers but also many younger people who are destined to continue in the field in the future The special issue entitled Frontiers of Ferroelectricity appeared as Volume 41 Issue 1 of the Journal of Materials Science in January 2006 Because we believed that many researchers and students would find great value in having the complete set of papers on their bookshelf we suggested to the editors of Springer that Frontiers of Ferroelectricity should be published in book form
