Fertility, Wealth, and Politics in Three Southwest German Villages, 1650-1900 Ernest Benz, 1999-12-01 The book traces the precocious diffusion of family limitation in Grafenhausen bei Lahr Kappel am Rhein and Rust using thousands of reconstituted family histories in local genealogies Ortssippenb cher as well as economic and political data from municipal and provincial archives Graphs tables and maps document the fertility transition on the densely populated Rhine plain A new measure of the percentage of couples practising family limitation is applied. The account highlights the r les of women as landholders under traditional partible inheritance and as workers in the cigar factories of the late 1800s Both circumstances increased fertility even as contraception spread along the networks of solidarity forged by economic and political independence The Oxford Handbook of Modern German History Helmut Walser Smith, 2011-09-29 This is the first comprehensive multi author survey of German history that features cutting edge syntheses of major topics by an international team of leading scholars Emphasizing demographic economic and political history this Handbook places German history in a denser transnational context than any other general history of Germany It underscores the centrality of war to the unfolding of German history and shows how it dramatically affected the development of German nationalism and the structure of German politics It also reaches out to scholars and students beyond the field of history with detailed and cutting edge chapters on religious history and on literary history as well as to contemporary observers with reflections on Germany and the European Union and on multi cultural Germany Covering the period from around 1760 to the present this Handbook represents a remarkable achievement of synthesis based on current scholarship It constitutes the starting point for anyone trying to understand the complexities of German history as well as the state of scholarly reflection on Germany s dramatic often destructive integration into the community of modern nations As it brings this story to the present it also places the current post unification Federal Republic of Germany into a multifaceted historical context It will be an indispensable resource for scholars students and anyone interested in modern Germany **Place and Politics: Local** Identity, Civic Culture, and German Nationalism in North Germany during the Revolutionary Era Katherine Aaslestad, 2005-12-01 This study examines North Germany during the transformative era of the French Revolution Napoleonic occupation and Wars of Liberation it reveals international exploitation military occupation economic destruction of the city state Hamburg as well as the republic s liberation and post Napoleonic autonomy Examining shifts within local culture and the role of public opinion on civic morality this book underscores the relationship between the civic ethics public language and collective memory in the construction of political identity and concludes that the transformation in values at the local level ultimately provides the crucial direction in the process of modern nation building Throughout the 1800s the public commemoration and memory of occupation and liberation rather than the actual Napoleonic experience shaped the development of German nationalism Recomposing German Music Elizabeth Janik, 2005-12-01 Recomposing German

Music illuminates the tangled relationship between music and politics in 20th century Germany Focusing on the reconstruction and division of Berlin's musical community after 1945 author Elizabeth Janik demonstrates how military occupation and Cold War rivalry transformed the city's elite musical institutions Berlin became a crucible for competing interpretations of German musical tradition Cultural authorities in East and West Berlin disputed the social authority responsible for defining and upholding musical standards the appropriate relationship between art and the state the definition of musical progress and finally the nature and purpose of music itself. This study is an important contribution to the social history of 20th century music and the comparative cultural history of the two Cold War Germanys and Heterodoxies in Early Modern German Culture, 2007-11-30 This interdisciplinary collection of essays about early modern Germany addresses the tensions both fruitful and destructive between normative systems of order on the one hand and a growing diversity of practices on the other Individual essays address crucial struggles over religious orthodoxy after the Reformation the transformation of political loyalties through propaganda and literature and efforts to redefine both canonical forms and new challenges to them in literature music and the arts Bringing together the most exciting papers from the 2005 conference of Fr he Neuzeit Interdisziplin r an international research and conference group the collection offers fresh comparative insights into the terrifying as well as exhilarating predicaments that the people of the Holy Roman Empire faced between the Reformation and the Enlightenment Contributors include Claudia Benthien Robert von Friedeburg Markus Friedrich Claire Gantet Susan Lewis Hammond Thomas Kaufmann Hildegard Elisabeth Keller Benjamin Marschke Nathan Orthodoxies and Heterodoxies in Early Modern German Culture Randolph Conrad Baruch Rein and Ashley West Head, Daniel Eric Christensen, 2007 Interdisciplinary essays on early modern Germany that address orthodoxy and its challenges in religion politics and the arts Confronting the transformation of normative canons after the Reformation the essays investigate authority and knowledge in an era of shifting cultural foundations **Boundaries and their Meanings** in the History of the Netherlands, 2009-06-17 Traditionally the term boundary applies to the demarcation between a physical place and another physical place most commonly associated with lines on a map As the essays in this volume demonstrate however a boundary can also function in a more broadly conceptual manner A boundary becomes not an imaginary line but a tool for thinking about how to separate any two elements whether ideas events etc into categories by which they become comprehensible and distinct The scholar contributors seek not simply to discern the boundaries but and perhaps more importantly to understand the process of delination and its consequences With its maverick history and grass root political traditions the Netherlands provides an auspicious setting to examine the historical function of boundaries both real and imagined Enduring Loss in Early Modern Germany Lynne Tatlock, 2010 Cross disciplinary perspectives on responses to material and spiritual loss in early modern Germany trace how individuals and communities registered coped with and made sense of deprivation through a spectrum of activities often turning loss into gain and acquiring agency

Divining Science Warren Dym,2010-09-24 The study of German mining and metallurgy has focused overwhelmingly on labor capitalism and progressive engineering and earth science This book addresses prospecting practices and mining culture Using the divining or dowsing rod as a means of exposing miner beliefs it argues that a robust vernacular science preceded institutionalized geology in Saxony and that the Freiberg Mining Academy f 1765 became a site for the synthesis of tradition and new science The tacit knowledge of dowsing was the mark of the experienced prospector and rather than decline in importance through the Enlightenment the practice transformed from a study of mineral vapors into an experimental branch of geophysics Mining administrations openly hired practitioners through the eighteenth century
