Fertility Decline In Indonesia Analysis And Interpretation:

Fertility Decline in Indonesia Geoffrey McNicoll, 1982 **Fertility Decline in Indonesia II.** Geoffrey McNicoll, Masri Singarimbun, Population Council. Center for Policy Studies, 1982 The Fertility Transition in Iran Mohammad Jalal Abbasi-Shavazi, Peter McDonald, Meimanat Hosseini-Chavoshi, 2009-09-30

Confounding all conventional wisdom the fertility rate in the Islamic Republic of Iran fell from around 7.0 births per woman in the early 1980s to 1.9 births per woman in 2006. That this the largest and fastest fall in fertility ever recorded should have occurred in one of the world's few Islamic Republics demands explanation. This book based upon a decade of research is the first to attempt such an explanation. The book documents the progress of the fertility decline and displays its association with social and economic characteristics. It addresses an explanation of the phenomenal fall of fertility in this Islamic context by considering the relevance of standard theories of fertility transition. The book is rich in data as well as the application of different demographic methods to interpret the data. All the available national demographic data are used in addition to two major surveys conducted by the authors. Demographic description is preceded by a socio-political history of Iran in recent decades providing a context for the demographic changes. The authors conclude with their views on the importance of specific socio-economic and political changes to the demographic transition. Their concluding arguments suggest continued low fertility in Iran. The book is recommended to not only demographers, social scientists and gender specialists but also to policy makers and those who are interested in social and demographic changes in Iran and other Islamic countries in the Middle East. It is also a useful reference for demography students and researchers who are interested in applying fertility theories in designing surveys and analysing data.

Basic Needs in Indonesia Bambang Suharnoko Sjahrir, 1986. This study attempts to look at the basic needs condition in Indonesia from 1969 to 1984 using economics, politics and public policy approaches. It synthesizes the macro and micro orientations, the studies on the sectoral issues of basic needs and the calculation of basic needs by single indicators. The politics of basic needs points to the importance of participation for future agenda while the public policy approach stresses the importance of economic incentives for the future success of the basic needs programme.

Vital Rates in India, 1961-1981 P. N. Mari Bhat, Samuel H. Preston, 1984 **Indonesia Assessment** Gavin W. Jones, Terence H. Hull, 1997-06-16

Indonesia's population, the fourth largest in the world, is expected to pass the 200 million mark in 1997. It has sustained high rates of economic growth over the past two decades. This has undoubtedly been related to its success in moderating earlier high rates of population growth and to its significant accomplishments in human resource development. This volume is therefore timely. It presents a comprehensive evaluation of the current situation and assesses future prospects.

Statistical Reference Index, 1986 **A Demographic History of the Indonesian Archipelago** H. Gooszen, 2021-12-06

The author offers a reconstruction of regional variations in the growth of the indigenous population of Indonesia from 1880 till the Japanese invasion in 1942. The demographic components of population growth, migration, fertility and mortality are not

only presented as demographic statistics but also interpreted as the aggregate effects of major events in the lives of indigenous people Hence migration is described in relation to employment opportunities the social structure and tradition fertility is examined in the light of aspects of family formation including marriage customs and birth control practices and mortality is linked to epidemics and Western health care Reproductive Rights and Wrongs Betsy Hartmann, 2016-11-21 Those involved in women s health issues Third World studies and economic development should find food for thought Kirkus Reviews This is an updated edition of the influential study Publishers Weekly of issues surrounding childbirth and the history of population control programs Challenging conventional wisdom about overpopulation and uncovering the deeper roots of poverty environmental degradation and gender inequalities the author uses data and vivid case studies to explore how population control programs came to be promoted by powerful governments foundations and international agencies as an instrument of Cold War development and security policy Mainly targeting poor women these programs were designed to drive down birth rates as rapidly and cheaply as possible with coercion often a matter of course In the war on population growth birth control was deployed as a weapon rather than a tool of reproductive choice Threaded throughout is the story of how international women s health activists fought to reform population control and promote a new agenda of sexual and reproductive health and rights for all While their efforts bore fruit obstacles remain On one side is the anti choice movement that wants to deny women access not only to abortion but to most methods of contraception On the other is a resurgent well funded population control lobby that often obscures its motives with the language of women s empowerment Despite declining birth rates worldwide average global family size is now 2.5 children overpopulation alarm is on the rise tied now to the threats of climate change and terrorism Reproductive Rights and Wrongs reveals how these developments are rooted in the longer history and politics of population control In this book a new generation of readers will find knowledge and inspiration for the ongoing struggle to achieve reproductive rights and social environmental and gender justice **National Academy Press ... Publications Catalog**, 1985 **Reproduction and Social Organization in Sub-Saharan Africa** Ron J. Lesthaeghe, 2023-11-15 Unlike most Asian and Latin American countries sub Saharan Africa has seen both an increase in population growth rates and a weakening of traditional patterns of child spacing since the 1960s It is tempting to conclude that sub Saharan countries have simply not reached adequate levels of income education and urbanization for a fertility decline to occur This book argues however that such a socioeconomic threshold hypothesis will not provide an adequate basis for comparison These authors take the view that any reproductive regime is also anchored to a broader pattern of social organization including the prevailing modes of production rules of exchange patterns of religious systems kinship structure division of labor and gender roles They link the characteristic features of the African reproductive regime with regard to nuptiality polygyny breastfeeding postpartum abstinence sterility and child fostering to other specifically African characteristics of social organization and culture Substantial attention is paid to the heterogeneity that prevails among sub

Saharan societies and considerable use is made therefore of interethnic comparisons As a result the book goes considerably beyond mere demographic description and builds bridges between demography and anthropology or sociology This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1989

From Death to Birth National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Population, 1998-01-12 The last 35 years or so have witnessed a dramatic shift in the demography of many developing countries Before 1960 there were substantial improvements in life expectancy but fertility declines were very rare Few people used modern contraceptives and couples had large families Since 1960 however fertility rates have fallen in virtually every major geographic region of the world for almost all political social and economic groups What factors are responsible for the sharp decline in fertility What role do child survival programs or family programs play in fertility declines Casual observation suggests that a decline in infant and child mortality is the most important cause but there is surprisingly little hard evidence for this conclusion The papers in this volume explore the theoretical methodological and empirical dimensions of the fertility mortality relationship It includes several detailed case studies based on contemporary data from developing countries and on historical data from Europe and the United States

Micro-Approaches to Demographic Research John Caldwell, Allan Hill, Valerie J. Hull, 2023-10-02 Originally published in 1988 this collection of essays was the first attempt by population scientists to incorporate some of the methods and materials of anthropologists into their work The essays bridge the gap in the conceptualisation and organisation of field research by 2 sets of social scientists demographers and social anthropologists who share an interest in the explanation of particular patterns of population composition and change

Economic Change in Modern Indonesia Anne Booth, 2016-02-11 Indonesia is often viewed as a country with substantial natural resources which has achieved solid economic growth since the 1960s but which still faces serious economic challenges In 2010 its per capita GDP was only nineteen per cent of that of the Netherlands and twenty two per cent of that of Japan In recent decades per capita GDP has fallen behind that of neighbouring countries such as Malaysia and Thailand and behind China In this accessible but thorough new study Anne Booth explains the long term factors which have influenced Indonesian economic performance taking into account the Dutch colonial legacy and the reaction to it after the transfer of power in 1949 The first part of the book offers a chronological study of economic development from the late nineteenth to the early twenty first century while the second part explores topics including the persistence of economic nationalism and the ongoing tensions between Indonesia s diverse regions

Detailed Statistics on the Urban and Rural Population of Indonesia, 1950 to 2010 Peter O. Way, 1984

Two is Enough A. Niehof, 2022-07-04 This book was written with basically two objectives in mind The

first one was to provide a comprehensive description of the Indonesian family planning program during the New Order regime of Suharto. The second to explain the fertility transition that took place in Indonesia during the same period. The rationale behind the first objective is the rather unique character of the Indonesian family planning program as a national program being part of both the New Order's development effort and rhetoric and people's everyday life. The extent to which it became part of people's and especially women's everyday life in various ways sets the Indonesian family planning program apart from comparable programs in Asia. The second objective is an ambitious one. From all the theoretical and anecdotal literature on fertility transition particularly in Asia it is clear that it is a complex phenomenon that cannot be captured in a simple model. Nevertheless the dramatic fertility decline that took place in Indonesia during 1968-1998 begs for an attempt at explanation. In this book fertility decline is placed against a background of social cultural and economic change and is related to the way the family planning program was designed and implemented. The question of the exact contribution of the family planning program to fertility decline is addressed but can never be fully answered. This is because the impact of the family planning program cannot be isolated from the influence of other factors such as for example cultural change leading to a rise of age at marriage, women's higher levels of educational attainment, increased family income and so on. As the book shows Indonesia provides a rich context for studying fertility decline and its determinants. The contributors come from several countries and have different backgrounds. They have in common their professional involvement with family planning, fertility and social change in Indonesia and their love for the country and its people.

Historical Dictionary of Indonesia R. B. Cribb, Audrey Kahin, 2004. Indonesia is Asia's third largest country in both population and area, a sprawling tropical archipelago of some 180 million people from hundreds of ethnic groups with a complex and turbulent history. One of Asia's newly industrializing countries, it is already a major economic powerhouse. In over 800 clear and succinct entries the dictionary covers people, places and organizations as well as economics, culture and political thought from Indonesia's ancient history up until the recent past. Includes a comprehensive bibliography, maps, chronology, list of abbreviations and appendix of election results and major office holders. This second edition has been thoroughly updated and expanded to cover the events that have occurred in Indonesia's history in the past fifteen years.

Historical Dictionary of Indonesia Audrey Kahin, 2015-10-29. A wide flung archipelago lying between the Pacific and Indian Oceans, Indonesia is the world's most populous Islamic country. For over two thousand years it was a crossroads on the major trading route between China and India, but it was not brought together into a single entity until the Dutch extended their rule throughout the Netherlands East Indies in the early part of the 20th century. Declaring its independence from the Dutch in 1945, the Republic of Indonesia was ruled by only two regimes over the next half century. Throughout the years the country has continued to be dogged by an

inefficient bureaucracy and by perpetual problems of corruption However since 2004 Indonesia has successfully carried out four direct elections for president together with an equal number of elections for legislative bodies at all levels of government and has finally in 2014 elected a president with no ties to either the military or to the previous authoritarian power structure This third edition of Historical Dictionary of Indonesia contains a chronology an introductory essay appendixes and an extensive bibliography The dictionary section has over 900 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent access point for students researchers and anyone wanting to know more about Indonesia Development, Demography, And Family Decision-making Linda B Williams, 2019-03-04 The shift toward the small nuclear family and the emergence of new roles for women have been among the conspicuous changes accompanying economic development and social modernization The importance of changing autonomy for women in the reduction of control over women s lives by the extended family in the process of development raises questions abo
