Bru,W. de Siqueira Pedra,2016-11-30 Lieb Robinson bounds for multi commutators are effective mathematical tools to handle analytic aspects of infinite volume dynamics of non relativistic quantum particles with short range possibly time dependent interactions In particular the existence of fundamental solutions is shown for those non autonomous C dynamical systems for which the usual conditions found in standard theories of parabolic or hyperbolic non autonomous evolution equations are not given In mathematical physics bounds on multi commutators of an order higher than two can be used to study linear and non linear responses of interacting particles to external perturbations These bounds are derived for lattice fermions in view of applications to microscopic quantum theory of electrical conduction discussed in this book All results also apply to quantum spin systems with obvious modifications In order to make the results accessible to a wide audience in particular to students in mathematics with little Physics background basics of Quantum Mechanics are presented keeping in mind its algebraic formulation The C algebraic setting for lattice fermions as well as the celebrated Lieb Robinson bounds for commutators are explained in detail for completeness [Applied Mechanics Reviews](#) ,1967
